Philosophy and Theory in Educational Research Amanda Fulford, Naomi Hodgson, 2016-06-10 Philosophy and Theory in Educational Research Writing in the margin explores the practices of reading and writing in educational philosophy and theory Showing that there is no right way to approach research in educational philosophy but illustrating its possibilities this text invites an engagement with philosophy as a possibility and opening possibilities for educational research Drawing on their own research and theoretical and philosophical sources the authors investigate the important issue of what it means to read and write when there is no prescribed structure Innovative in its contribution to the literature this edited volume enlightens readers in three ways The volume focuses on the practices of reading and writing that are central to research in educational philosophy suggesting that these practices constitute the research rather than simply reporting it It is not a prescriptive guide and should not be read

procedurally Rather it is intended to illustrate the possibilities for this kind of research and to suggest starting points for those pursuing research projects Finally attention is given to the ways in which conducting educational philosophy can be educative in itself both to the researcher in writing it and to its audience in reading it With contributions from international scholars in the field of educational philosophy this book is a valuable guide for practitioner researchers taught postgraduate and doctoral students and early career researchers in university education departments Academic staff teaching research methods and seeking to introduce their students to philosophy as research without wishing to offer a prescriptive how to guide will also find this book of particular interest

Ramaekers,Naomi Hodgson,2018-08-17 On the occasion of the retirement of Paul Smeyers this book considers the state and status of the philosophy and history of education today Over the last 20 years the conditions in which research takes place have changed considerably They have done so in ways that are often less than favourable to disciplines such as history and philosophy of education and the space and time for the practices that constitute these disciplines of reading of writing of collegiality is increasingly under pressure During this time the Research Community on the History and Philosophy of Educational Research has convened annually to bring its critical lenses to bear on these emergent conditions and to suggest ways that educational research might or ought to be done otherwise As co founder and co convenor of the Research Community this volume explores and recounts Paul Smeyers development of Wittgensteinian scholarship and its legacy in education his formative role in the development of philosophy of education as an international field his many international

collaborations the useless educational philosophical deepening of concepts and the wider educational philosophical import of this This gives rise to consideration of the failure of these fields to halt the changes in the governance and status of the university that threatens them and those practices that remain and that are emerging in academia that we wish to protect to pass on to the next generation of researchers in these fields

Fiction written under Oath? David Bridges, 2006-04-18 The essays bring to contemporary debates about educational research both a first hand familiarity with the practices and arguments of the educational research community and a clear grasp of the ways in which philosophical sources and analysis can inform them They are both measured and passionate sparked by an intense personal curiosity which takes Bridges into unexpected resources and territory such as the insights of museology into debates on educational research as narrative fiction as well as more familiar material relating to for example issues about the assessment of quality of educational research and the concern for its relevance The book makes an articulate case by its own example as well as in its argument for the continuing contribution of philosophical thinking to the development and critique of educational research It will be essential reading for researchers already engaged in this development and for masters and doctoral students who are coming to terms with educational research and it offers a contribution to the literature in philosophy of education which is richly grounded in the wider field of educational research

Philosophy of Educational Research Leonard I. Krimerman, 1973 *Encyclopedia of Educational Theory and*

Philosophy D. C. Phillips, 2014-06-06 The two volume Encyclopedia of Educational Theory and Philosophy introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice Drawing together a team of international scholars this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses Understanding Education and Educational Research Paul Smeyers, Richard Smith, 2014-11-13 Argues that good educational research is often in essence philosophical rather than a matter of conventional research methods *Thinking in Education Research* Nick Peim, 2018-03-08 Thinking in Education Research examines the resources available from philosophy and theory that can be practically applied to any educational research project Nick Peim argues that the current well established divide between theory and the empirical in research methods is unhelpful to students Instead Thinking in Education Research looks at major lines of thinking in modern European philosophy from Kant to Freud and Derrida to Malabou and how they provide a rich resource for every stage of conducting research By getting students engaged in how to think and how to do Peim illustrates that thinking is in fact a vital part of how you do research and is not an aside Essential aspects of the research endeavour are re examined in the light of key philosophical positions to offer constructive potential including defining the object giving an account of the field the relation to truth the process of writing and constructing a case and the value attributed to formal knowledge Thinking in Education Research does not try to resolve the unresolved issues of research thinking but rather encourages readers to productively engage with them so that we can enhance the possibilities of research practice and find opportunities for its expansion and refinement Throughout the chapters clear and concise summaries of key philosophical positions and ideas are complemented with boxed accounts of how the philosophical debates discussed can be applied to real research projects These features encourage the reader to consider how they can develop thinking and apply theory at every stage of their own research This is essential reading for any educational research methods student or practicing researcher for important ways of thinking afresh about research methodology What Do Philosophers of Education Do? Claudia Ruitenberg, 2010-05-18 This volume of essays demonstrates and comments on philosophical methods in educational research Offers a clear picture of what philosophers do when they study education Brings together a series of essays from an international cast of contributors from Canada UK Finland and Cyprus Examines a range of new and established philosophical methods which can be used in educational research Demonstrates how philosophy of education can be understood methodologically Draws from both Continental and Analytical traditions Fills a gap in the research methods literature in education and the social sciences The Ethics of Educational Research Mike J.
