## **Positions And Presuppositions In Science Fiction:**

**Positions and Presuppositions in Science Fiction** Darko Suvin, 1988-06-18      **Positions and Presuppositions in Science Fiction** Darko Suvin, 1988 In this major theoretical survey of contemporary authors of science fiction Suvin argues for a radically new approach which considers science fiction as neither prophecy nor the folklore of technology but as parables for our times Annotation copyrighted by Book News Inc Portland OR      **The Role of Science Fiction** Stefan Weißhampel, 2008-02-26 Inhaltsangabe Abstract Since Kurt Vonnegut passed away aged 84 earlier this year 11th April 2007 his life and work received considerable media recognition While FOX news could not refrain from expressing rather hostile criticism in their Vonnegut obituary admirers of Vonnegut's works reacted with angry comments to the aforementioned programme All over the internet bloggers expressed their regrets and wrote their own obituaries commenting on Vonnegut's life as well as his books Why does the death of an 84 year old author leaving a body of 14 novels three collections of short stories one compilation of fictitious interviews with dead celebrities four works of non fiction five plays and one requiem lead to public reactions which differ so widely How can the works of an author who persisted to write his last book on an old typewriter be so relevant for the technophiles of the blogosphere These questions alone justify the continuation of an academic discourse on the works of Kurt Vonnegut which has been going on for almost forty years following the publication of *Slaughterhouse Five* in 1969 Ever since that novel critics rarely fail to mention the considerable influence of science fiction on Vonnegut's writing Man's relationship to technology and the effects of technology on inter human communication are central motifs in science fiction hence the web 2.0 generation's reaction to Vonnegut's death provides an extraordinary indication that the problems pondered upon in Vonnegut's science fiction are still relevant today However it has to be said that most critics' references to science fiction elements in Vonnegut's works remain limited to a surface level and evoke the impression that either the scholar is not well informed about the implications of the term science fiction or fails to name his or her references The effect of such an approach is that the works on the subject will either seem to be apologetic annexions of Vonnegut's novels by science fiction buffs and space opera fans or attempts to minimise the role of science fiction in the works of Kurt Vonnegut to mere parody Neither impression is adequate for a thorough understanding of the role of science fiction in the works of Kurt Vonnegut Therefore in this paper a coordinate system discussing the implication of the term science fiction will be set up in which Vonnegut's works can be located In order to find a valid reference point a fixed set of aspects will be      **Political Theory, Science Fiction, and Utopian Literature** Tony Burns, 2010-02-19 Ursula K Le Guin's *The Dispossessed* is of interest to political theorists partly because of its association with anarchism and partly because it is thought to represent a turning point in the history of utopian dystopian political thought and literature and of science fiction Published in 1974 it marked a revival of utopianism after decades of dystopian writing According to this widely accepted view *The Dispossessed* represents a new kind of literary utopia which Tom Moylan calls a critical utopia The present work

challenges this reading of *The Dispossessed* and its place in the histories of utopian dystopian literature and science fiction It explores the difference between traditional literary utopia and novels and suggests that *The Dispossessed* is not a literary utopia but a novel about utopianism in politics Le Guin's concerns have more to do with those of the novelists of the 19th century writing in the tradition of European Realism than they do with the science fiction or utopian literature It also claims that her theory of the novel has an affinity with the ancient Greek tragedy This implies that there is a conservatism in Le Guin's work as a creative writer or as a novelist which fits uneasily with her personal commitment to anarchism

Becoming Utopian Tom Moylan, 2020-11-26 A dream of a better world is a powerful human force that inspires activists artists and citizens alike In this book Tom Moylan one of the pioneering scholars of contemporary utopian studies explores the utopian process in its individual and collective trajectory from dream to realization Drawing on theorists such as Fredric Jameson Donna Haraway and Alain Badiou and science fiction writers such as Kim Stanley Robinson and China Miéville *Becoming Utopian* develops its argument for sociopolitical action through studies that range from liberation theology ecological activism and radical pedagogy to the radical movements of 1968 Throughout Moylan speaks to the urgent need to confront and transform the global environmental economic political and cultural crises of our time **Parables of Freedom**

**and Narrative Logics** Darko Suvin, 2021 This major two volume collection presents Darko Suvin's critical meditations on science fiction and utopia from the late 1960s through the early years of the new millennium **Science Fiction, Critical Frontiers** NA NA, 2016-04-30 Science fiction has recently been identified as providing the narrative paradigm for postmodernity This volume of essays combines theoretical discussions of the nature of science fiction with specific studies of utopian and dystopian narratives Alongside of this the essays here address feminist and African American issues the envisioning of radical alternative realities and futures cyborgs cyberpunk and cyber space age and aging hybridity and monstrosity and contemporary society and the postmodern condition The Mechanics of Wonder Gary

Westfahl, 1998-01-01 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition *The Mechanics of Wonder* will arouse debate

and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read     *Science Fiction - The Evolutionary Mythology of the Future* Thomas Lombardo,2018-12-14 An evolutionary and transformative journey through the history of science fiction from the innermost passions and dreams of the human spirit to the farthest reaches of the universe human imagination and beyond     *Disputing the Deluge* Darko Suvin,2021-12-02 Featured on the 2021 Locus Recommended Reading List For over 50 years Darko Suvin has set the agenda for science fiction studies through his innovative linking of scifi to utopian studies formalist and leftist critical theory and his broader engagement with what he terms political epistemology *Disputing the Deluge* joins a rapidly growing renewal of critical interest in Suvin s work on scifi and utopianism by bringing together in a single volume 24 of Suvin s most significant interventions in the field from the 21st century with an Introduction by editor Hugh O Connell and a new preface by the author Beginning with writings from the early 2000s that investigate the function of literary genres and reconsider the relationship between science fiction and fantasy the essays collected here each a brilliant example of engaged thought highlight the value of scifi for grappling with the key events and transformations of recent years Suvin s interrogations show how speculative fiction has responded to 9 11 the global war on terror the 2008 economic collapse and the rise of conservative populism along with contemporary critical utopian analyses of the Capitalocene the climate crisis COVID 19 and the decline of democracy By bringing together Suvin s essays all in one place this collection allows new generations of students and scholars to engage directly with his work and its continuing importance and timeliness

*Eschatology and the Technological Future* Michael S. Burdett,2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett s argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard J ngel and J rgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo Christian understanding of the future     *Narrating Utopia* Chris Ferns,1999-05-01 Utopian societies exhibit a variety of ways of organising the financial political and emotional relationships between people For all this diversity

however one thing that exhibits far less variation is the story the framing narrative that accounts for how the narrator reaches the more perfect society and obtains the opportunity to witness its distinctive excellences Narrating Utopia is about that story the curious hybrid of the traveller s tale and the classical dialogue that emerges in the Renaissance but whose outlines remain clearly apparent even in some of the most recent utopian writing [Philip K Dick](#) Christopher Palmer,2003-03-01 Once the sole possession of fans and buffs the SF author Philip K Dick is now finding a much wider audience as the success of the films Blade Runner and Minority Report shows The kind of world he predicted in his funny and frightening novels and stories is coming closer to most of us shifting realities unstable relations uncertain moralities Philip K Dick Exhilaration and Terror of the Postmodern examines a wide range of Dick s work including his short stories and posthumously published realist novels Christopher Palmer analyses the puzzling and dazzling effects of Dick s fiction and argues that at its heart is a clash between exhilarating possibilities of transformation and a frightening lack of ethical certainties Dick s work is seen as the inscription of his own historical predicament the clash between humanism and postmodernism being played out in the complex forms of the fiction The problem is never resolved but Dick s ways of imagining it become steadily more ingenious and challenging **Toward Other Worlds** Michael R. Collings,2010-05-01 This collection of 25 essays of literary criticism includes pieces on British poet John Milton British fantasy writer C S Lewis American horror writer Stephen King American SF and fantasy writer Orson Scott Card British horror writer Clive Barker and several others Complete with bibliography and index **Surveying the American Tropics** Maria Cristina Fumagalli,Peter Hulme,Owen Robinson,Lesley Wylie,2013-07-01 A collection of essays from distinguished international scholars that explore the idea of a literary geography of the American Tropics [Wells Meets Deleuze](#) Michael Starr,2017-05-21 The writings of H G Wells have had a profound influence on literary and cinematic depictions of the present and the possible future and modern science fiction continues to be indebted to his scientific romances such as The Time Machine The War of the Worlds and The Island of Doctor Moreau Interpreted and adapted for more than a century Wells s texts have resisted easy categorization and are perennial subjects for emerging critical and theoretical perspectives The author examines Wells s works through the post structuralist philosophy of Gilles Deleuze Via this critical perspective concepts now synonymous with science fiction such as time travel alien invasion and transhumanism demonstrate the intrinsic relevance of Wells to the genre and contemporary thought **Imaginary Communities** Phillip Wegner,2002-06-04 Drawing from literary history social theory and political critique this far reaching study explores the utopian narrative as a medium for understanding the social space of the modern nation state Considering the narrative utopia from its earliest manifestation in Thomas More s sixteenth century work Utopia to some of the most influential utopias of the late nineteenth and twentieth centuries this book is an astute study of a literary genre as well as a nuanced dialectical meditation on the history of utopian thinking as a quintessential history of modernity As he unravels the dialectics at work in the utopian

narrative Wegner gives an ambitious synthetic discussion of theories of modernity considering and evaluating the ideas of writers such as Ernst Bloch Louis Marin Gilles Deleuze Walter Benjamin Martin Heidegger Henri Lefebvre Paul de Man Karl Mannheim Mikhail Bakhtin Jürgen Habermas Slavoj Žižek and Homi Bhabha

**Cyberpunk Culture and Psychology** Anna McFarlane, 2021-06-30 This book traces developments in cyberpunk culture through a close engagement with the novels of the godfather of cyberpunk William Gibson Connecting his relational model of gestalt psychology and imagery with that of the posthuman networked identities found in cyberpunk the author draws out relations with key cultural moments of the last 40 years postmodernism posthumanism 9 11 and the Anthropocene By identifying cyberpunk ways of seeing with cyberpunk ways of being the author shows how a visual style is crucial to cyberpunk on a philosophical level as well as on an aesthetic level Tracing a trajectory over Gibson's work that brings him from an emphasis on the visual that elevates the human over posthuman entities to a perspective based on touch a truly posthuman understanding of humans as networked with their environments she argues for connections between the visual and the posthuman that have not been explored elsewhere and that have implications for future work in posthumanism and the arts Proposing an innovative model of reading through gestalt psychology this book will be of key importance to scholars and students in the medical humanities posthumanism literary and cultural studies dystopian and utopian studies and psychology

**The Angle Between Two Walls** Roger Luckhurst, 1998-01-01 This is the first theoretically informed book on Ballard reading his work not only within the science fiction genre but also connecting it to issues of popular culture and legitimisation postmodernism and the legacy of the avant garde Aiming where necessary to contextualise Ballard's fiction within the science fiction genre Luckhurst's study also travels over many terrains more or less foreign to SF existentialism Surrealism Pop Art psychoanalysis ethnologies of contemporary modernity and the theory of autobiography

**Parasocial Politics** Jason Zenor, 2014-10-21 The popularity of cable news satire documentaries and political blogs suggest that people are often absorbing and dissecting direct political messages from informational media But entertainment media also discusses the important political issues of our time though not as overtly Nonetheless consumers still learn debate and form opinions on important political issues through their relationship with entertainment media While many scholarly books examine these political messages found in popular culture very few examine how actual audiences read these messages Parasocial Politics explores how consumers form complex relationships with media texts and characters and how these readings exist in the nexus between real and fictional worlds This collection of empirical studies uses various methodologies including surveys experiments focus groups and mixed methods to analyze how actual consumers interpret the texts and the overt and covert political messages encoded in popular culture
