## **Public Policies And The Misuse Of Forest Resources:**

**The Forest for the Trees?** Robert C. Repetto, 1988 Experts have clearly established the extent of forest decline and likely economic social and environmental consequences They have also discussed deforestation's principal causes This report goes further by showing how governments committed in principle to conservation and wise resource use are aggravating the losses of forests under their stewardship through mistaken policies Such policies by and large were adopted for worthy objectives industrial or agricultural growth regional development job creation or poverty alleviation But this study finds such objectives typically have not been realized or have been attained only at excessive costs *Public Policies and the Misuse of Forest Resources* World Resources Institute, 1988-09-30 Six contributors explore the role of governments in accelerating the rate of forest destruction by providing direct and indirect subsidies to support what would otherwise be non commercial logging operations Without these financial incentives most timber operations in the tropics would cease In a series of country by country investigations including examples from the developed and developing worlds this book documents the government policies that are leading to the misuse of forest resources Each is written by an authority on the country and each contains descriptive analytical and empirical material on key policies and their effects The final country analysis focuses on the United States where the consequences of the subsidized timber sales by the US Forest Service from most of the national forests are discussed The book concludes with an overview of the impact of forest policies and the role of bilateral and multilateral agencies in their formulation By directing attention toward the political dimension involved in forest clearance this book will provide a clearer insight into the basic reasons why forests continue to be destroyed despite the outcry raised by conservationists *Public Policies and the Misuse of Forest Resources* R. REPETTO, 1998 *Public policies and the misuse of forest resources* Robert Repetto, 1988

**Why Governments Waste Natural Resources** William Ascher, 1999 Drawing on 16 case studies from Africa Asia and Latin America reveals the complex political and programmatic reasons why government officials in developing countries often willfully adopt wasteful natural resource policies *Handbook of Forest Resource Economics* Shashi Kant, Janaki Alavalapati, 2014-04-03 It is increasingly recognized that the economic value of forests is not merely the production of timber Forests provide other key ecosystem services such as being sinks for greenhouse gases hotspots of biodiversity tourism and recreation They are also vitally important in preventing soil erosion and controlling water supplies as well as providing non timber forest products and supporting the livelihoods of many local people This handbook provides a detailed comprehensive and broad coverage of forest economics including traditional forest economics of timber production economics of environmental role of forests and recent developments in forest economics The chapters are grouped into six parts fundamental topics in forest resource economics economics of forest ecosystems economics of forests climate change and bioenergy economics of risk uncertainty and natural disturbances economics of forest property rights and certification and emerging issues and developments Written by leading environmental forest and

natural resource economists the book represents a definitive reference volume for students of economics environment forestry and natural resource economics and management

Ellefson, 2019-04-12 This book reviews the status of discipline wide activity in forest economics and policy research especially investment levels past and current program emphasis program planning and organizational involvement It defines strategic directions for forest economics and policy research

**Forest Resource Policy in Latin America** Ronnie de Camino, Julio C. Tresierra, Ramón López, Thomas Kelly, Markku Simula, Kari Keipi, Carlos Felipe Jaramillo, Olli Haltia, Jared J. Hardner, Marc J. Dourojeanni, Jan G. Laarman, Richard Rice, 2000-01-01 Forest Resource Policy in Latin America gathers the thinking of a score of experts on sustainable use and management of forests including incentives for investment The authors tackle the thorny social issues of property rights deforestation and forest management and ownership by indigenous people and take a hard look at the trade and environmental issues in forest production that will affect future directions for sustainable forestry development in Latin America Some argue that the main opportunity to conserve natural forests lies in recognizing and paying for the environmental services they provide In addition compensatory measures such as the establishment and better management of strictly protected areas appear to be the best tools to delay the loss of ecosystems and species Alternative forest concession policies and trade and environmental issues in forest production are also analyzed

*New Directions in Sustainable Design* Adrian Parr, Michael Zaretsky, 2010-10-09 This book brings together new and emerging perspectives on sustainability Combining a series of well know authors in contemporary philosophy with established practitioners of sustainable design it develops a coherent theoretical framework for how a philosophy of sustainability might engage with the growing practice of sustainable design

Forest Concession Policies and Revenue Systems John Andrew Gray, 2002-01-01 Forest concessions have been an important element of forestry and forest management in many countries including developing countries However if sustainable management of tropical forests is to be achieved and deforestation brought under control the allocation management and supervision of forest concessions will need to be strengthened This study examines the failures of forest concessions over the last 20 years and highlights the potential gains resulting from concentrating on improving procedures introducing performance incentives and monitoring key performance elements

**Beyond Interdependence : The Meshing of the World's Economy and the Earth's Ecology** Ottawa Jim MacNeill Senior Fellow Institute for Research on Public Policy, Physical Planning Pieter Winsemius Senior Fellow former Dutch Minister of Housing, and Environment, Taizo Yakushiji Professor of Technology and International Relations Saitama University, 1991-08-01 Over the last year the world has seen some cataclysmic changes Eastern Europe is no longer yoked with Soviet communism Germany

is again a single powerful nation and Russia itself is pursuing a free market economy at an almost frantic pace Yet as we focus on the triumph of democracy it is easy to overlook the potentially catastrophic changes that face the world environment changes that are inextricably linked to the workings of the political and economic institutions of our time Beyond Interdependence builds upon the Brundtland Commission's landmark report Our Common Future a book that has been hailed as the most important document of the decade on the future of the world and has sold over one half million copies in nineteen foreign languages Dr Jim MacNeill the principal author of both works has in this latest study extended the Commission's analysis of the critical relationships between the global environment the world economy and the international order Together with his eminent colleagues Pieter Winsemius and Taizo Yakushiji MacNeill shows that while our global economy and ecology have become completely interlocked they have remained separate in our institutions and in the minds of our policymakers The result is a wide range of domestic and international policies that are accelerating the depletion of Earth's basic ecological and economic capital its rivers lakes and oceans its soils and forests its flora and fauna and its ozone shield These short sighted policies also threaten us in the next century with a greater rise in global warming and sea level than have occurred in the ten thousand years since the last ice age The authors argue that this environmental degradation and resource depletion will be the principal source of interstate conflict in the post cold war world Providing a fresh analysis of the issues of global change and taking into account such recent events as the tidal shift in East West relations and the G7 Economic Summit in Houston Beyond Interdependence shows how industrialized nations can take unilateral action to address environmental threats while improving macroeconomic efficiency and international competitiveness It also demonstrates how developed nations can negotiate a series of mutually advantageous bargains with Eastern European and Third World nations With its incisive analysis and far reaching recommendations for policy reform Beyond Interdependence shows us how we can act urgently but intelligently to advance our common future

**Humans as Components of Ecosystems** Mark J.

McDonnell, Steward T.A. Pickett, 2012-12-06 This book a product of the fourth Cary Conference amply demonstrates the achievement of a major goal of all Cary Conferences That is Cary Conferences were conceived to provide a forum for comprehensive discussion of major ecological issues from more philosophical and comprehensive perspectives The Institute of Ecosystem Studies is proud to make its staff and facilities available on a biennial basis for the purpose of initiating and fostering these important discussions On the one hand the influence of humans on ecosystems may be quite obvious such as when a forest is cut On the other humans live within and among ecosystems but ecologists largely have avoided making detailed and rigorous analyses of the more subtle effects that human activities generate Indeed most ecologists have sought out rather pristine or remote areas for study rather than those which include humans This book brings together a stimulating mix of disciplines to highlight and evaluate these problems as well as the opportunities of including humans as integral components in studies of natural ecosystems An exciting dialogue has ensued Hopefully this book will convey some of the

excitement and challenges that were generated at this Cary Conference      Conservation de la Forêt Dense en Afrique Centrale Et de L'Ouest Kevin M. Cleaver,1992 This volume brings together selected papers presented and discussed at the Conference on Conservation of West and Central African Rainforests held in Abidjan November 5 9 1990      **People and Forests** Clark C.
