

## Toilet Training

Potty training is a big undertaking and requires consistent effort on the part of the child, the parents, and the provider. We wish to assist your child in the potty-training process. Our potty training method is to prompt children to "listen" to their bodies at each transition between activities. Children who have shown interest and had at least a week's worth of practice of potty training at home can begin potty training at Sparrow's Roost Child Care. We will prompt your child to "try" to use the toilet each time we transition to a meal, before we go outside, and before rest time. Children will also be encouraged to go potty if they happen to be showing cues such as the "potty dance", hiding in the corner, crossing legs, etc. Please send pull-ups, underwear, and extra changes of clothing during this learning period.

## Rest Time

Children will have a 90-minute quiet period every afternoon. During this time, children may sleep, look at books, or play independently with puzzles or other quiet toys. Children who do not nap will be expected not to wake their sleeping peers during this time. If children fall asleep, they will remain undisturbed until they naturally wake up. A cot (or pack 'n' play, if needed) and bedding is provided. Special comfort items such as stuffed animals and/or blankets will be allowed. Morning naps will be accommodated for younger children.

## Screen Time Limits

At Sparrow's Roost Child Care, we recognize that we live in a technological age. We know that children enjoy media and we will engage in screen time within reason. We respect parent's decisions on what type of content their children will be allowed to watch, and we do not feel we should be the ones making those decisions. Therefore, any videos or shows watched will either be for educational purposes or will have a Christian theme (e.g. Veggie Tales). Any other movies or shows we wish to play will be discussed with parents beforehand. Most days, we will limit screen time to 30 minutes at a maximum.

## **Public Policy For Day Care Of Young Children Organization Finance And Planning:**

Public Policy for Day Care of Young Children: Organization, Finance, and Planning Dennis R. Young, Richard R. Nelson, 1973 Monographic compilation of social research papers on social policy implications of child care facilities in the USA covers administrative aspects and financial aspects the role of public subsidies planning and evaluation of day care at the community level etc Flow chart references and statistical tables *The Limits of Market Organization* Richard R. Nelson, 2005-03-24 The last quarter century has seen a broad but qualified belief in the efficacy of market organization slide into an unyielding dogma that the market as unconstrained as possible is the best way to govern virtually all economic activity However unrestricted markets can often lead to gross inequalities in access to important resources the creation of monopolies and other negative effects that require regulation or public subsidies to remedy In *The Limits of Market Organization* editor Richard Nelson and a group of economic experts take a more sophisticated look at the public private debate noting where markets are useful where they can be effective only if augmented by non market mechanisms and where they are simply inappropriate *The Limits of Market Organization* examines the appropriateness of markets in four areas where support for privatization varies widely human services public utilities science and technology and activities where market involvement is altogether inappropriate Richard Murnane makes the case that a social interest in providing equal access to high quality education means that for school voucher plans to be effective substantial government oversight is necessary Federal involvement in a transcontinental railroad system was initially applauded but recent financial troubles at Amtrak have prompted many to call for privatization of the rails Yet contributor Elliot Sclar argues that public subsidies are the only way to maintain this vital part of the American transportation infrastructure While market principles can promote competition and foster innovation applying them in certain areas can actually stifle progress Nelson argues that aggressive patenting has hindered scientific research by restricting access to tools and processes that could be used to generate new findings He suggests that some kind of exception to patent law should be made for scientists who seek to build off of patented findings and then put their research results into the public domain In other spheres market organization is altogether unsuitable Legal expert Richard Briffault looks at one such example the democratic political process and profiles the successes and failures of campaign finance reform in preventing parties from buying political influence This important volume shows that market organization has its virtues but also its drawbacks Just as regulation can be over applied so too can market principles *The Limits of Market Organization* encourages readers to think more discriminately about the march toward privatization and to remember the importance of public institutions Clearinghouse Review , 1975
