Public Procurement and the EU Competition Rules Albert Sánchez Graells,2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law

**A New Role for Citizens in Public Procurement** , *European Public Procurement Law* Constant de Koninck,Peter Flamey,2009-01-01 The European directives on public procurement do not contain any specific provisions ensuring their effective application These provisions can be found in the Public Sector Remedies Directive 89 665 EEC and the Utilities Remedies Directive 92 13 EEC as these directives have recently been amended by Directive 2007 66 EC These measures provide means of redress for tenderers who have been prejudiced by a breach of the EU rules on public procurement Following the highly user friendly approach of its Part I predecessor and which cited and analyzed the Court of Justiceand s case law concerning the substantive EU procurement rules laid down in the Public Sector Directive and the Utilities Directives and this book combines and links the full texts of the procurement remedies directives with 31 pertinent judgements issued by the Court of Justice of the European Communities In one easy to use volume this book provides full texts of the the Public Sector Remedies Directive and the Utilities Remedies Directive with the articles of these directives linked to the relevant Court of Justice case law in depth analysis of 31 judgements rendered by the Court of Justice in the period 1993and 2008 in connection with subject matter treated by the articles of the two directives expert discussion of major innovations introduced by Amending Directive 2007 66

EC with analysis of its ratio legis and full text essential excerpts from the chronologically ordered judgments with each excerpt preceded by an overview of the subject matter and points of law treated in the judgment pertinent passages of the opinions of the Advocate General and an exhaustive subject index By thus combining the theory and and reality and of European procurement law the book not only saves readers time and effort but also provides profound and practical insight into the Remedies Directives and the important rights and obligations which they create The pursuit of remedies for breaches of the EU procurement rules is a topic of high interest to public authorities and their suppliers contractors and service providers across Europe This book will be of great value to practitioners and to officials charged with ensuring that decisions taken by the public contracting authorities and entities may be reviewed effectively and rapidly thus building confidence among businesses and the public that public procurement procedures are fair

Joint Public Procurement and Innovation  
Gabriella Margherita Racca, Christopher Yukins, 2020-02-12 Innovation in public procurement is essential for sustainable and inclusive growth in an increasingly globalized economy To achieve that potential both the promises and the perils of innovation must be investigated including the risks and opportunities of joint procurement across borders in the European Union and the United States This in depth research investigates innovation in public procurement from three different perspectives First leading academics and practitioners assess the purchase of innovation with a particular focus on urban public contracting in smart cities involving meta infrastructures public private partnership arrangements and smart contracts A second line of inquiry looks for ways to encourage innovative suppliers Here the collected authors draw on emerging lessons from the US and Europe to explore both the costs and the benefits of spurring innovation through procurement A third perspective looks to various innovations in the procurement process itself with a focus on the effects of joint and cross border procurement in the EU and US landscapes The chapters review new technologies and platforms the increasingly automated means of selecting suppliers and the related efficiencies that big data can bring to public procurement Expanding on research in the editors prior volume Integrity and Efficiency in Sustainable Public Contracts Balancing Corruption Concerns in Public Procurement Internationally Bruylant 2014 this volume builds on a series of academic conferences and exchanges to address these issues from sophisticated academic institutional and practical perspectives and to point the way to future research on the contractual models that are emerging from new procurement technologies

Reformation or Deformation of the EU Public Procurement Rules Grith Skovgaard Ølykke, Albert

Sanchez-Graells, 2016-11-25 Using an innovative law and political science methodology this timely book carries out a critical assessment of the reform of the EU public procurement rules It provides a rich account of the policy directions and the spaces for national regulatory decisions in the transposition of the 2014 Public Procurement Package as well as areas of uncertainty and indications on how to interpret the rules in order to make them operational in practice Most EU law research focuses on the content of rules and the impact of case law on their interpretation and application It rarely discusses how the CJEU s case law influences the creation of new rules or the way EU law makers enact them issues which conversely are a staple for political scientists By blending both approaches this book finds that political science provides a useful framework to describe the law making process and shows that the influence of the CJEU was significant Though the specific case studies identify many reforms the ultimate assessment is that EU public procurement law was deformed Offering a clear contribution to the emerging scholarship on flexible EU law making this book s novel methodology will appeal to scholars and students of

both law and political science Law and policy makers as well as legal practitioners will also find its practical approach compelling R sum de l diteur
