Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia

and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter      **Companion to**

**Public Space** Matthew Carmona,Claudio de Magalhães,Leo Hammond,2008-06-03 In both the UK and the US there is a sense of dissatisfaction and pessimism about the state of urban environments particularly with the quality of everyday public

spaces Explanations for this have emphasized the poor quality of design that characterizes many new public spaces spaces that are dominated by parking roads infrastructure introspective buildings a lack of enclosure and a poor sense of place and which in different ways for different groups are too often exclusionary Yet many well designed public spaces have also experienced decline and neglect as the services and activities upon which the continuing quality of those spaces have been subject to the same constraints and pressures for change as public services in general These issues touch upon the daily management of public space that is the coordination of the many different activities that constantly define and redefine the characteristics and quality of public space This book draws on three empirical projects to examine the questions of public space management on an international stage They are set within a context of theoretical debates about public space its history contemporary patterns of use and changing nature in western society and about the new management approaches that are increasingly being adopted

Green parks are privatized in order to cater to the growing demand for leisure space. At the same time, official spaces like Ba Dinh Square or Ly Thai To Square are occupied by Hanoi's residents for sports and gatherings. This dissertation takes a close look at the practices and the meaning of public spaces and the development of public spheres in Hanoi. Dissertation Series Southeast Asian Modernities Vol 13.

**CyberParks - The Interface Between People, Places and Technology** Carlos Smaniotto Costa, Ina Šuklje Erjavec, Therese Kenna, Michiel de Lange, Konstantinos Ioannidis, Gabriela Maksymiuk, Martijn de Waal, 2019-03-01. This open access book is about public open spaces, about people, and about the relationship between them and the role of technology in this relationship. It is about different approaches, methods, empirical studies, and concerns about a phenomenon that is increasingly being in the centre of sciences and strategies: the penetration of digital technologies in the urban space. As the main outcome of the CyberParks Project, this book aims at fostering the understanding about the current and future interactions of the nexus people, public spaces, and technology. It addresses a wide range of challenges and multidisciplinary perspectives on emerging phenomena related to the penetration of technology in people's lifestyles, affecting therefore the whole society and, with this, the production and use of public spaces. Cyberparks coined the term cyberpark to describe the mediated public space, that emerging type of urban spaces where nature and cybertechnologies blend together to generate hybrid experiences and enhance quality of life.
