Public Spaces Architecture And Urbanism:

Privately Owned Public Space Jerold S. Kayden, The New York City Department of City Planning, The Municipal Art Society of New York, 2000-11-10 Hailed by the Wall Street Journal as a juicy little time bomb of a book *Privately Owned Public Space* The New York City Experience examines for the first time New York City's 39 year mixed experience with the production of more than 500 plazas parks and atriums located on private property yet by law accessible to and usable by the public Until now comprehensive systematic knowledge about this vast collection of public spaces has not existed either for experts or members of the public To remedy this gap Harvard University professor Jerold S Kayden The New York City Department of City Planning and The Municipal Art Society of New York have joined forces to research and write *Privately Owned Public Space* The New York City Experience Through words photographs scaled site plans maps and analysis of newly assembled data they examine history law design and use of the city's privately owned public spaces Each of the more than 500 spaces is individually discussed to provide far reaching comparative information about this unique category of public space In reading this book designers planners lawyers and academics will gain greater understanding about the possibilities and problems inherent in the design management and enforcement of privately owned public space Public officials private owners and civic group representatives will learn more about their roles in ensuring public access and vitality of such spaces Individuals will discover where New York City's public spaces are located and what amenities they offer Everyone will comprehend more completely the contribution that privately owned public space can make toward open and attractive cities in which all individuals have access to a diversity of public places

Streets Zeynep Çelik,Diane Favro,Richard Ingersoll,2023-11-15 This collection of twenty one essays written by colleagues and former students of the architectural historian Spiro Kostof 1936 1991 presents case studies on Kostof s model of urban forms and fabrics The essays are remarkably diverse the range includes pre Columbian Inca settlements fourteenth century Cairo nineteenth century New Orleans and twentieth century Tokyo Focusing on individual streets around the world and from different historical periods the collection is an inviting overview of the street as an urban institution The theme of the volume is that the street presents itself as the basic structuring device of a city s form and also as the locus of its civilization Each essay is a detailed investigation of a single urban street with unique historical conditions The authors shared concern regarding anthropological political and technical aspects of street making coalesce into a critical discourse on urban space A fitting tribute to Spiro Kostof this collection will be greatly admired by scholars and general readers alike This collection of twenty one essays written by colleagues and former students of the architectural historian Spiro Kostof 1936 1991 presents case studies on Kostof s model of urban forms and fabrics The essays are remarkably diverse the range inclu

Public Space and Relational Perspectives Chiara Tornaghi,Sabine Knierbein,2014-12-05 Traditional approaches to understand space tend to view public space mainly as a shell or container focussing on its morphological structures and functional uses That way its ever changing meanings contested or challenged uses have been largely ignored as well as the contextual and on going dynamics between social actors their cultures and struggles The key role of space in enabling spatial opportunities for social action the fluidity of its social meaning and the changing degree of publicness of a space remain unexplored fields of academic inquiry and professional practice Public Space and Relational Perspectives offers a different understanding of public spaces in the city The aim of the book is to re introduce the lived experiences in public life into the teaching curricula of those academic disciplines which deal with public space and the built environment such as architecture planning and urban design as well as the social sciences The book presents conceptual practical and research challenges and brings together findings from activists practitioners and theorists The editors provide eight educational challenges that educators can endorse when training future practitioners and researchers to accept and to engage with the social relations that unfold in and through public space Cover image KARO

Insurgent Public Space Jeffrey Hou,2010-04-21 Winner of the EDRA book prize for 2012 In cities around the world individuals and groups are reclaiming and creating urban sites temporary spaces and informal gathering places These insurgent public spaces challenge conventional views of how urban areas are defined and used and how they can transform the city environment No longer confined to traditional public areas like neighbourhood parks and public plazas these

guerrilla spaces express the alternative social and spatial relationships in our changing cities With nearly twenty illustrated case studies this volume shows how instances of insurgent public space occur across the world Examples range from community gardening in Seattle and Los Angeles street dancing in Beijing to the transformation of parking spaces into temporary parks in San Francisco Drawing on the experiences and knowledge of individuals extensively engaged in the actual implementation of these spaces *Insurgent Public Space* is a unique cross disciplinary approach to the study of public space use and how it is utilized in the contemporary urban world Appealing to professionals and students in both urban studies and more social courses Hou has brought together valuable commentaries on an area of urbanism which has up until now been largely ignored

Public Space in Informal Settlements Jaime Hernández-García, 2013-12-05 *Public Space in Informal Settlements* The Barrios of Bogotá contributes to the debate on informal settlements by viewing them as an opportunity to understand different ways of seeing and thinking about the city Public spaces in informal settlements like the housing stock are to a large extent the product of local self help and self managed processes however the equivalent level of understanding has not been achieved partly because such settlements are often seen as spare spaces with little value Public spaces in informal settlements are public in terms of ownership and accessibility but are communal in terms of use and attachment They play an important role in the physical and social dynamics of the barrios and have done since their inception however the improvement and consolidation of such spaces may not be realised for many years The book will be of primary importance to architects urban planners and researchers who are interested in the city in general and in informal settlements in particular The book will also be of interest to those in the humanities and social sciences who are concerned with politics and postcolonial studies and to academics working in people environment studies and in the relationship between people and place in terms of place self building place attachment and place identity However the volume will be of most interest for Latin Americanists who do not read Spanish or Portuguese and would like to know more about the region the problems and the views from the perspective of an insider with extended knowledge of the field

Identity in Post-Socialist Public Space Bohdan Cherkas, Józef Hernik, 2021-11-29 This book is a comparative analysis of the architecture of central public spaces of capital cities in Central and Eastern Europe during the period of their authoritarian and post authoritarian development It demonstrates that national identity transformations cause structural changes in urban public spaces and theorises identity and national identity within urban planning in order to explain the influence of historical cultural mental social as well as ideological and political conditions on the processes of shaping and perceiving the architecture of public space The book addresses the process of shaping and restructuring historic centres of European capital cities of Kiev Moscow Berlin and Warsaw which developed under authoritarian regime conditions throughout the 20th century and were characterised by ideological determinism and the influence of state ideology and politics on the architecture of public spaces The book will be useful for urban planners architects land management specialists art

historians political scientists and readers interested in the theory and history of cities the fundamentals of urban planning and architecture and the planning of cities and public spaces *Whose Public Space?* Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders **Public Space** Matthew Carmona, Claudio de Magalhães, Leo Hammond, 2008-06-03 In both the UK and the US there is a sense of dissatisfaction and pessimism about the state of urban environments particularly with the quality of everyday public spaces Explanations for this have emphasized the poor quality of design that characterizes many new public spaces spaces that are dominated by parking roads infrastructure introspective buildings a lack of enclosure and a poor sense of place and which in different ways for different groups are too often exclusionary Yet many well designed public spaces have also experienced decline and neglect as the services and activities upon which the continuing quality of those spaces have been subject to the same constraints and pressures for change as public services in general These issues touch upon the daily management of public space that is the coordination of the many different activities that constantly define and redefine the characteristics and quality of public space This book draws on three empirical projects to examine the questions of public space management on an international stage They are set within a context of theoretical debates about public space its history contemporary patterns of use and changing nature in western society and about the new management approaches that are increasingly being adopted *The Cybercities Reader* Stephen Graham, 2004 Providing the most comprehensive international and interdisciplinary analysis yet of the relationships between cities urban life and new technologies this informative book incorporates detailed discussions of cybercity history theory economic processes mobilities physical forms social and cultural worlds digital divides public domains strategies politics and futures The book includes coverage of post modern technoculture virtual reality and the body global city economies urban surveillance e commerce teleworking community informatics digital architecture urban technology strategies and the role of

cities and new technologies in the war on terrorism The first interdisciplinary book to address the complex interrelationships between the use and application of electronic technologies and practices and processes of contemporary metropolitan life this key text adopts a uniquely international perspective Detailed case studies include virtual cities in Amsterdam Internet cabins in Lima back offices in Jamaica and smart highways in Melbourne An excellent teaching aid with part section and individual extract introductions this outstanding book provides an up to date snapshot of how policies for cities and cyberspaces are being combined across the world *The Routledge Handbook of Urban Design Research Methods* Hesam Kamalipour, Patricia Aelbrecht, Nastaran Peimani, 2023-08-24 As an evolving and contested field urban design has been made unmade and remade at the intersections of multiple disciplines and professions It is now a decisive moment for urban design to reflect on its rigour and relevance This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus on the related research designs and methods The specific aim scope and structure of this handbook are appealing to a range of audiences interested and or involved in shaping places and public spaces What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency affordance place informality and performance In addition to the introduction chapter this handbook includes 80 contributors and 52 chapters organised into five parts The commissioned chapters showcase a wide range of topics research designs and methods with references to relevant scholarly works on the related topics and methods Public Spaces and Urbanity: Construction and Design Manual Karsten Pålsson, 2017 Taking examples from major European cities Public Spaces and Urbanity is a practical guide demonstrating what urban development with a human face might look like This involves renewing and enhancing humane cities using architecture on a human scale while taking their history into account Thus the book follows the tradition established by Jan Gehl that regards urban space as a framework for people to live in and socialise The European tradition of the dense classical city marks the point of departure for this book Special emphasis is placed on physical and spatial parameters on development patterns and building types on the guiding principles governing access and on interconnections with public roads and pathways all of which form the foundations of urban life as well as cities that provide safety and security The book is divided into ten thematic chapters each providing a definition and general outline of core challenges together with proposals for meeting them An historical outline of urban development and the practically organised thematic structure underlying concepts discussed allow the examples given to greatly broaden the field of understanding around this topic Urbanisms Steven Holl, 2009-11-04 Foreword Urbanisms working with doubt Geo spatial
