Public Policy And Economic Competition In Japan:

Public Policy and Economic Competition in Japan Michael L. Beeman, 2003-08-29 Viewed historically as the lapdog of business bureaucratic and political interests Japan's Fair Trade Commission has had mixed success in promoting its agenda for stronger antimonopoly policy since the early 1970s Dr Beeman unravels antimonopoly politics in Japan through an analysis of the diverse interests of industry government and other parties to reveal how and why antimonopoly policy has made important inroads yet ultimately failed to gain deep acceptance in Japan Employing extensive use of primary research materials and numerous interviews Dr Beeman finds predictable patterns of change as well as themes of continuity in the development of Japan's antimonopoly policy By addressing a broad array of industry sectors and policy issues the book provides fresh insight into an agency and a policy that have often been criticized from within Japan as too stringent and from outside Japan as too lax

Beer in East Asia Paul Chambers, Nithi Nuangjamnong, 2023-03-17 Chambers Nuangjamnong and their contributors look at how the development of the beer industry in East Asia presents a unique opportunity for understanding the region's political economy. Asia is both the world's largest beer consuming and beer producing region and the fastest growing beer market. Per capita consumption is lower than Europe but catching up fast. Beer consumption is also widely understood to correlate closely with economic growth and urbanization much more so than other alcoholic beverages like spirits. With ten country case studies from both Northeast and Southeast Asia, the contributors to this volume look at the history of beer production and consumption across East Asia through a lens of historical institutionalism and political economy. In doing so they not only examine the development of the beer industry in the region but also what it tells us about the countries themselves. They ask questions such as: To what extent have state versus societal actors influenced the path of beer production? How has beer production changed? Was there a critical juncture at which beer production abruptly changed course? A valuable resource for students and scholars of modern East Asian History and particularly those with a focus on colonial history, industrial history and state-society relations. Comparative Politics: Comparative public policy Howard J. Wiarda, 2005. This collection reprints essential articles in the systematic study of all of the world's political systems. The pieces here focus on issues such as public opinion, formation, interest group lobbying, political party activity as well as the institutions of government including executives, legislatures and legal systems. The editors have also written an introductory volume explaining the history, main approaches and controversies in the field, covering the debates on formal legalism, developmentalism, dependency theory, corporatism, rational choice and much more. *Changing Governance and Public Policy in East Asia* Ka Ho Mok, Ray Forrest, 2008-11-24. administration and political systems in order to develop new mechanisms and structures to promote good governance This book focuses on how selected Asian states have responded to the growing impact of liberalizing and marketizing trends in public policy formulation and public management To what extent is the state guided regime in Asia still relevant to governing public policy public management What are the policy implications for a growing number of Asian states which are pursuing more pro competition policy instruments The book is a timely and important collection that offers critical analysis of the search for new governance in Asia and compares and contrasts experiences in selected Asian societies such as China Japan Hong Kong Taiwan South Korea Singapore and other parts of South East Asia Chapters are written by leading scholars in the fields of comparative development policy and governance studies from Hong Kong Macau Taiwan China Singapore Japan and the United Kingdom

Competition, Commitment, and Welfare Kōtarō Suzumura, 1995 This book examines one of the classical issues in theoretical welfare economics the effects on social welfare of increasing competition between firms The author explores whether promoting competition is in fact desirable an issue which is central to modern debates about the role of markets The desirability of competition an idea which can be traced back to Adam Smith is widely accepted resulting in the widespread belief that by increasing interfirm competition we may always improve social welfare However this is challenged by another piece of conventional wisdom which claims that excessive competition is as harmful as insufficient competition The work will be of interest to researchers and practitioners working in industrial organization and welfare economics
