### **Chapter 13**

#### **Process Evaluation and Implementation Theory**

"A single governmental strategy may involve the complex and interrelated activities of several levels of governmental bureaus and agencies, private organizations, professional associations, interest groups, and clientele populations. How can this profusion of activities be controlled and directed? This question is at the heart of what has come to be known ... as the "implementation problem."

-Eugene Bardach

The extent to which government interventions contribute to measured results is central to public sector evaluation. Occasionally, evaluations ought to aspire to even higher ambitions. They should try to answer why outcomes do or do not stem from the measures enacted. Following the lead of Urban Dahllöf and several other scholars, I wish to emphasize strongly that the evaluation of at least established interventions should have this extended explanatory ambition. Apart from data on output, outcomes, and general intervention impact on results, evaluations should include more specific information on why installed interventions have succeeded or failed. The evaluation of vintage measures ought to be a theoretical enterprise in the meaning of trying to explain in more detail why the measures have conditioned the impacts or not. I shall call this process evaluation.

## **Public Policy And Program Evaluation:**

**Public Policy and Program Evaluation** Evert Vedung, 2017-07-12 Evaluation is a controversial and little understood strategy of public governance control and decision making As early as classical antiquity scholars were summoned to court to counsel kings Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state Evaluation scholars are asked to provide retrospective assessments of the implementation output and outcome of government measures in order to effect deeper understanding and well grounded decisions on the part of those in charge of government operations Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation Evert Vedung examines evaluation as a mechanism for monitoring systematizing and grading government activities and their results so that public officials in their future oriented work will be able to act as responsibly creatively and efficiently as possible Topics discussed include Evaluation Rationality and Theories of Public Management Models of Evaluation Internal or External Evaluation Impact Assessment as Tryout and Social Experimentation Process Evaluation and Implementation Theory The Eight Problems Approach to Evaluation and Uses and Users of Evaluation All evaluation rests upon the idea that perceptions opinions intentions judgments in short everything concerned with the world of human consciousness play such interesting roles in political and administrative action that their functions are worth investigating Through experience humans may learn from past actions The interventions of the modern state are so extensive their execu The Politics of Program Evaluation Dennis J. Palumbo, 1987 Evaluation and politics are related in a number of ways While programme evaluators have traditionally tried to be neutral objective and scientific in their assessment of programmes the results of evaluation are inherently political and are used by politicians programme administrators special interest groups and other stakeholders for political purposes The contributors argue that since evaluation cannot be divorced from its political context the political dimension must be understood in order to conduct effective evaluations Public Policy and Program Evaluation E. Vedung, Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation **Program Evaluation and the Management of Government** Eliot Freidson, Ray Rist, 2020-02-18 This book appears at an opportune time in the history of evaluation Its detailed and up to date account of the organization and use of evaluation in eight Western democratic countries Canada Germany United Kingdom United States Denmark Holland Norway and Switzerland shows how evaluation functions at different levels of development Focusing on the national or federal level of government this volume presents a systematic and comparative view of eight

to this sceptical question is at the heart of the book The newly established Research Group for Methodology of Law and Legal Research at Tilburg University the Netherlands brought together some of Europe s top specialists in the field of ex ante evaluation of legislation with backgrounds in law social science political science and law and economics The result of their collaborative effort is a comprehensive and critical book on the pros and cons and on the opportunities limitations and challenges of ex ante assessment of legislation      **Handbook of Practical Program Evaluation** Kathryn E.
