*Christianity and Civil Society* Robert Wuthnow, 1996-10-01 In this book well known author Robert Wuthnow considers three aspects of the relationship between Christianity and civil society whether civil society is in jeopardy and what effects Christianity's declining influence has on civil society whether Christians can be civil in the face of conflicts that have arisen among religious groups in the public arena and the so called culture wars that many in the media have been discussing and growing multiculturalism in the United States how Christians are responding to this new diversity and how Christianity can regain a critical voice for itself in these debates

**Public Religions in the Future World** David Morris, 2021-12-01 Public Religions in the Future World is the first book to map the utopian terrain of the political religious movements of the past four

decades Examining a politically diverse set of utopian fictions this book cuts across the usual Right Left political divisions to show a surprising convergence each political religious vision imagines a revived world of care and community over and against the economization and fragmentation of neoliberalism Understanding these religions as utopian movements in reaction to neoliberalism Public Religions invites us to rethink the bases of religious identification and practice Offering new insights on texts from the Left Behind series to the novels of Octavia Butler Public Religions shows that the utopian energy of the present opens new opportunities for political organizing and genuine lasting community building Public Religions in the Future World presents a literary history of the political religious present arguing that the power of public religion lies in the utopian visions that underlie religious beliefs It shows that contemporary literary utopianism is deeply inflected with religious ideas with the visions values and ambitions of Christianity Islam nature mysticism and other traditions Further Public Religions demonstrates that this utopianism s religiosity is in turn politically inflected that it resonates with and underwrites a range of competing political projects those of imperialism globalization neoliberal capitalism deep ecology and the pro migration movement David Morris constructs a working theory of how religion makes large scale interventions in political debates The novels in his study draw on religious traditions to articulate visions programs or missions for achieving some version of an improved world In doing so they undertake the work of literary postmodernism to represent globality to recover the voices of the underrepresented and to imagine a future that escapes the destructiveness of global capitalism

**Pluralizing Humanism** Slavica Jakelić, 2025-02-28 Humanism is appealed to today whenever we want to tackle the conditions of dehumanization in the contemporary world But for humanism to be viable in the twenty first century this book argues it needs to be pluralized Employing theoretical historical and sociological arguments this book moves beyond the discourse of critique It engages theories of religion and secularism as well as postmodern postcolonial and decolonial critiques of Western humanist projects to uncover the ideas and practices of religious and secular humanisms when they challenge dehumanization in the pursuit of conditions of flourishing for all Through studies of the Solidarity movement in Poland and the anti apartheid movement in South Africa the book demonstrates the centrality of humanist traditions to the emergence of religious secular solidarities that transformed the political landscapes of the world By highlighting the instances in which humanisms functioned as checks on each other s absolutist claims the book contends that humanisms supply a constructive path for addressing the challenges of our time a time of radically divided societies and intolerant even violent forms of nationalism A challenge to the critiques of humanism that seek to identify it solely as the legacy of the West as anti religious discourse or relegate it to the domain of power constellations Pluralizing Humanism highlights the rich plurality of humanist discourses and the need for their mutual engagements It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it As such this book will appeal to social scientists social theorists religious studies scholars and ethicists with interests in religion secularism social movements and humanist

thought and practice      The Politics of Religious Literacy Justine Ellis,2022-11-07 Religious Literacy has become a popular concept for navigating religious diversity in public life Spanning classrooms to boardrooms The Politics of Religious Literacy challenges commonly held understandings of religious literacy as an inclusive framework for engaging with religion in modern multifaith democracies As the first book to rethink religious literacy from the perspective of affect theory and secularism studies this new approach calls for a constructive reconsideration focused on the often overlooked feelings and practices that inform our questionably secular age This study offers fresh insights into the changing dynamics of religion and secularism in the public sphere      *A Revolutionary Faith* Raúl E. Zagarra,2023-03-14 Religious commitments can be a powerful engine for progressive social change and in this new book Raúl E Zagarra examines the process of articulation of religious beliefs and political concerns that takes place in religious organizing and activism Focusing on the example of Latin American liberation theology and the work of Peruvian theologian Gustavo Gutiérrez Zagarra shows how liberation theology advocates have been able to produce a new balance between faith and politics that advances an agenda of progressive social change without reducing politics to faith or faith to politics Drawing from theologian David Tracy's method of critical correlation the book focuses on key historical philosophical and theological shifts that have allowed liberation theologians to produce a new interpretation of the relationship between faith and politics in the Christian tradition especially when issues of social justice are at stake The book further approaches liberation theology's contributions to theorizing social justice through an unconventional path a critical dialogue with the work of philosopher John Rawls This dialogue as Zagarra contends allows us to see more clearly the contributions of liberation theology to the cause of progressive social change Ultimately the book stands between public religion and public reason offering something of a blueprint for theological innovation and for how to remain committed to one's faith while respecting and defending the core values of democracy      *Religion in the 21st Century* Margit Warburg,Dr Lisbet Christoffersen,Professor Hanne Petersen,Professor Hans Raun Iversen,2013-06-28 In spite of the debate about secularization or de secularization the existential bodily need for religion is basically the same as always What have been changed are the horizons within which religions are interpreted and the relationships within which religions are integrated This book explores how religions continue to challenge secular democracy and science and how religions are themselves being challenged by secular values and practices All traditions whether religious or secular experience a struggle over authority and this struggle seems to intensify with globalization as it has brought people around the world in closer contact with each other In this book internationally leading scholars from sociology law political science religious studies theology and the religion and science debate take stock of the current interdisciplinary research on religion and open new perspectives at the cutting edge of the debate on religion in the 21st century      **Public Theology in Korea?** Minseok Kim,2021-01-01 Public Theology is one of the most important topics in the field of theology across the world but not in Korea There are several historical and theological reasons for this indifference of Korean Reformed Christianity as the

mainstream in Korea In order to dispel doubts of Korean Reformed Christianity to the public theological approaches it is necessary to demonstrate a coherence between some characteristics of public theology and Reformed theology This study analyses and utilises the six characteristics of public theology presented by Heinrich Bedford Stroh as a lens to engage aspects of John Calvin's theology and the period of the Reformation in Geneva Based on this work the author re-examines the history of Korean Christianity with a public theological point of view and asserts the justification for Korean Reformed Christianity to actively embrace public theological approaches Minseok Kim is a Research Fellow at the Department of Systematic Theology and Ecclesiology and Researcher at the Beyers Naud Centre for Public Theology at University of Stellenbosch South Africa *Religion and Public Discourse in an Age of Transition* Geoffrey Cameron, Benjamin Schewel, 2018-01-03 Technology, tourism, politics and law have connected human beings around the world more closely than ever before but this closeness has paradoxically given rise to fear, distrust and misunderstanding between nation states and religions In light of the tensions and conflicts that arise from these complex relationships many search for ways to find peace and understanding through a global public sphere There citizens can deliberate on issues of worldwide concern Their voices can be heard by institutions able to translate public opinion into public policy that embraces more than simply the interests and ideas of the wealthy and the empowered Contributors to this volume address various aspects of this challenge within the context of Bahá'í thought and practice whose goal is to lay the foundations for a new world civilization that harmonizes the spiritual and material aspects of human existence Bahá'í teachings view religion as a source of enduring insight that can enable humanity to repair and transcend patterns of disunity to foster justice within the structures of society and to advance the cause of peace Accordingly religion can and ought to play a role in the broader project of creating a pattern of public discourse capable of supporting humanity's transition to the next stage in its collective development The essays in this book make novel contributions to the growing literature on post-secularism and on religion and the public sphere The authors additionally present new areas of inquiry for future research on the Bahá'í faith "Public Religion" and the Pancasila-based State of Indonesia Benyamin Fleming Intan, 2006 Public Religion and the Pancasila Based State of Indonesia An Ethical and Sociological Analysis analyzes the public role of religion in Indonesian society from the pre-independence period to the end of Suharto's New Order government It offers constructive suggestions regarding how Indonesian religion can play a significant role within the framework of Pancasila Indonesia's national ideology Based on a Christian-Muslim dialogue it is only within the realm of civil society that Indonesian religion will be able to promote the ideas of democracy, tolerance and human rights in Indonesian public affairs In short far from being anti-pluralist Indonesian religion evolves as a liberating force in the life of society, nation and state **Religious Diversity and Public Religion in China** Zhibin Xie, 2017-03-02 This book addresses the issue of public religion and its implications in Chinese society Zhibin Xie explores various normative considerations concerning the appropriate role of religion in public political life in a democratic culture Besides drawing on the theoretical

discourse on religion in the public sphere from Western academics it holds that the issue of religion in Chinese politics should be addressed by paying attention to characteristics of religious diversity and its political context in China This leads to a position of liberal constrained public religion in China which encourages religious contribution to the public sphere as a substantial component of religious liberty in China on the one hand and proposes some constraints both upon government and religions for regulating religious political discourse on the other

**Modern Religion, Modern Race** Theodore M. Vial, 2016 Religion is a racialized category even when race is not explicitly mentioned In Modern Religion Modern Race Theodore Vial argues that because the categories of religion and race are rooted in the post Enlightenment project of reimagining what it means to be human we cannot simply will ourselves to stop using them Only by acknowledging that religion is already racialized can we begin to understand how the two concepts are intertwined and how they operate in our modern world It has become common to argue that the category religion is not universal or even very old but is a product of Europe s Enlightenment modernization Equally common is the argument that religion is not an innocent category of analysis but is implicated in colonial regimes of control and as such plays a role in Europe s process of identity construction of itself and of non European others Current debates about race follow an eerily similar trajectory race is not an ancient but a modern construction It is part of the project of colonialism and race discourse forms one of the cornerstones of modern European identity making Why can t we stop using them or re construct them in less toxic ways By examining the theories of Kant Herder and Schleiermacher among others Vial uncovers co constitutive nature of race and religion describes how they became building blocks of the modern world and shows how the two concepts continue to be used today to form identity and to make sense of the world He shows that while we disdain the racist language of some of the founders of religious studies the continued influence of the modern worldview they helped create leads us often unwittingly to reiterate many of the same distinctions and hierarchies Although it may not be time to abandon the very category of religion with all its attendant baggage Modern Religion Modern Race calls for us to examine that baggage critically and to be fully conscious of the ways in which religion always carries with it dangerous ideas of race

**Religion Returns to the Public Square** Hugh Heclo, Wilfred M. McClay, 2003-02-28 Despite talk of a naked public square religion has never really lost its place in American public life As the twenty first century opened it was re emerging in unexpected and paradoxical ways Religious institutions were considered for expanded roles in welfare and education at the same time that the limits of religious pluralism as for example in the relation of Islam to American values became a question of urgent public concern Religion Returns to the Public Square Faith and Policy in America explores how and why religion has to be mixed up with American politics Uncovering philosophical historical legal and social roots of this relationship these essays go beyond hot button issues to reflect on the current interactions and future possibilities of religion and politics in America

**Religion and the Public Order of the European Union** Ronan McCrea, 2010-10-07 Ronan McCrea offers the first comprehensive account of the role

of religion within the public order of the European Union He examines the facilitation and protection of individual and institutional religious freedom in EU law and the means through which the Union facilitates religious input and influence over law In addition the book draws attention to the limitations on religious influence over law and politics that are required by the Union It shows the extent to which such limitations are identified as fundamental elements of the EU's public order and as prerequisites for membership The Union seeks to balance its predominantly Christian religious heritage with an equally strong secular and humanist tradition by facilitating religion as a form of cultural identity while simultaneously limiting its political influence Such balancing takes place in the context of the Union's limited legitimacy and its commitment to respect for Member State cultural autonomy Deference towards the cultural role of religion at Member State level enables culturally entrenched religions to exercise a greater degree of influence within the Union's public order than outsider faiths that lack a comparable cultural role Placing the Union's approach to religion in the context of broader historical and sociological trends around religion in Europe and of contemporary debates around secularism equal treatment and the role of Islam in Europe McCrea sheds light on the interaction between religion and EU law in the face of a shifting religious demographic

**Beyond Shariati** Siavash Saffari, 2017-02-16 A new reading of Ali Shariati's intellectual legacy on Iranian political discourse and concepts of Islam and modernity

**Religion, Law and Society** Russell Sandberg, 2014-05-08 Issues concerning religion in the public sphere are rarely far from the headlines As a result scholars have paid increasing attention to religion These scholars however have generally stayed within the confines of their own respective disciplines To date there has been little contact between lawyers and sociologists Religion Law and Society explores whether how and why law and religion should interact with the sociology of religion It examines sociological and legal materials concerning religion in order to find out what lawyers and sociologists can learn from each other A groundbreaking provocative and thought provoking book it is essential reading for lawyers sociologists and all who are interested in the relationship between religion law and society in the twenty first century

**Hermeneutics, Social Criticism and Everyday Education Practice** Wiktor Żłobicki, Monika Humeniuk, Grażyna Lubowicka, Iwona Paszenda, Beata Pietkiewicz-Pareek, 2020-06-03 The individual chapters written by scholars of the Department of General Pedagogy at the University of Wrocław included in the volume offered to the Readers showcase selected variants and problems of the hermeneutical and critical approaches to educational practice and research The general pedagogy we practice in this way reveals its interdisciplinary character drawing on the resources and achievements of philosophy sociology psychology cultural anthropology religious studies and political sciences By deliberately adopting such an approach general pedagogy becomes the basic science of pedagogy one of its major tasks is the integration and criticism of knowledge about education and the study of education and its broadly understood contexts a knowledge which is produced not only in numerous disciplines of humanities and social sciences This ambitious task undertaken by many theoreticians and researchers of education all over the world calls for a continuous effort to review the

resources of dynamically changing and transforming scientific knowledge and to draw on contemporary and historically significant philosophy Translating these experiences into the resources of general pedagogy requires from us the effort of understanding the languages of contemporary humanities social sciences and multicultural societies as well as the effort of critical thinking which can recognize and take into account the entanglement of scientific knowledge in social ideas and practices its conflicts inequalities and asymmetric discourses Hence the general pedagogy we practice exploring the area of ideology religion and utopias present in everyday educational practice implements the vision of bringing closer these two approaches hermeneutical and critical We believe that such a general pedagogy engaged practiced with passion aware of its present social context and its past and of the urgent needs theoretical and practical difficulties a pedagogy that explores the possible shapes of the future is both necessary and inspiring It addresses new topics and offers novel approaches revises well established and newly proposed findings is aware of opportunities and threats Nevertheless the chapters written by us are integral self contained wholes just as their authors retain their intellectual and research autonomy which can be seen in the issues we choose the mode of their presentation and addressing

*Mission Implausible* Duncan MacLaren, 2012-07-18 It is commonly agreed that the churches of Europe are in crisis but why How can we explain their dramatic decline over the past four decades In particular why do contemporary people struggle to believe And how might the churches address this crisis of credibility Are there already signs of hope And what can tenacious forms of religion teach the churches as they go about their task of mission *Mission Implausible* tackles these questions using the tools of sociological analysis It argues that much of the blame for church decline is misplaced and that a broader explanation is required which sets the current crisis within a historical and sociological perspective Written for church leaders theologians students of theology and sociology and all those concerned with Christian mission *Mission Implausible* explores a range of strategies aimed at rebuilding a social climate favorable to Christian belief
