Public School Monopoly:

The Public School Monopoly Robert B. Everhart, 1982 **THE PUBLIC SCHOOL MONOPOLY : A CRIT. ANALYSIS OF EDUCATION AND THE STATE IN AMERICAN SOCIETY**, 1984 **School Choices** John Merrifield, 2002-09-01 The school choice movement has gained political momentum in recent years with programs having been established in Milwaukee Florida Texas and elsewhere But today s programs are nothing like the free market in education proposed four decades ago by the early proponents of school choice Economist John Merrifield shows that the school choice movement has become mired in false alternatives petty distinctions and diminished vision Yet he argues that programs providing real educational choices must not be allowed to fail like so many government programs a freely competitive market for education must remain the ultimate goal School Choices True and False charts a course for the achievement of this goal **Quality of education, 1983** United States. Congress. Senate. Committee on Labor and Human Resources, 1983 **Equality of Educational Opportunity and Knowledgeable Human Capital** Erwin V. Johanningmeier, 2009-10-01 This work explores how the generally accepted definition or measure of equality of educational opportunity at the beginning of the twenty first century differs from what it was in the immediate postwar era While there have been differing definitions or measures of equality of educational opportunity there has been a continual call from education critics and education reformers for more and better mathematics science and foreign language in the nation s schools This work maintains that public education acquired significance as a vital part of a national agenda in conjunction with three developments First the prosperity of the United States after World War II contributed to a consumer dominated culture and the phenomenon of the citizenconsumer The nation had to expand educational opportunities in response to the increased birth rate in the postwar years and in response to the increased qualifications that the workplace required for entry and employment Significantly the nation had the resources to send its children and youth to school for longer and longer periods of time Better educated citizens soon took better jobs and they spent paychecks buying everything from new technologies to new and bigger houses and new and bigger cars Increased household income allowed young members of the family to attend and even complete high school and increased the chance of affording the cost of attending college Second by the end of World War II the globalization of the international community was underway and the United States position and role in the international community were clearly challenged by the Soviet Union As the United States found itself in the Cold War its national security required an ideological a military and a technological strategy Each of these strategies ultimately depended on higher or post secondary education and that had lasting implications for the nation s elementary and secondary schools The nation s engagement in the Cold War required well educated professionals to secure intelligence and to develop effective propaganda That engagement also required scientists mathematicians engineers to develop and to maintain the technology the nation required for its defense and subsequently for the space race with the Soviet Union Third and perhaps

most importantly it was becoming increasingly clear in the Cold War Era that the nation would have to address its long history of denying civil rights to some of its citizens especially but not exclusively African Americans As the Supreme Court s 1954 Brown decision signified public education was the initial venue where the struggle for racial equality took place

Palonsky,Mary Rose McCarthy,2020-08-12 Critical Issues in Education examines three questions that are at the core of the education debate in the United States What interests should schools serve What knowledge should schools teach How do we develop the human environment of schools When answering these queries the authors advocate the use of critical thinking which includes dialogue and dialectic reasoning Dynamic and interactive dialogue requires listening and assessment while dialectic stimulates the development of a creative response that encompasses both sides of an issue When applied these approaches engender an informative and stimulating discussion In order to explore the depth of current educational issues the Ninth Edition considers 15 topics providing supporting evidence and reasoning for two divergent views These issues include violence in schools the role of technology gender equity multiculturalism inclusion and disability and school choice Both civic and professional discussions regarding improvements will have consequences for students teachers and society As a result educational views and the social landscape in which they reside deserve critical study *The Political Economy of Education* Martin Carnoy,2024-02-15 A textbook providing academically rigorous yet clear explanations of the economics and politics driving today s educational systems and how economists analyze them This essential text for upper level undergraduate and graduate students in economics public policy and education covers all major topics and is packed with international examples
