Public Scrutiny:

Public Enterprise Revisited Chrisafis H. Iordanoglou, 2001-01-01 The book compares the 1954-79 labour productivity record of five expanding public sector industries to that of 24 expanding capital intensive mass production industries in the British private sector. The author shows that the public sector industries labour productivity growth was significantly faster than that of the private sector industries. Strikingly he also finds that the state owned industries were narrowing their productivity gap with their US counterparts at a significantly faster rate than the private sector industries. Dr Iordanoglou concludes that it is possible that public ownership had in the historical period investigated a long term positive effect on these industries. BOOK JACKET

Private Data and Public Value Holly Jarman, Luis F. Luna-Reyes, 2016-02-26 This book investigates the ways in which these systems can promote public value by encouraging the disclosure and reuse of privately held data in ways that support collective values such as environmental sustainability. Supported by funding from the National Science Foundation, the authors' research team has been working on one such system designed to enhance consumers' ability to access information about the sustainability of the products that they buy and the supply chains that produce them. Pulled by rapidly developing technology and pushed by budget cuts, politicians and public managers are attempting to find ways to increase the public value of their actions. Policymakers are increasingly acknowledging the potential that lies in publicly disclosing more of the data that they hold as well as incentivizing individuals and organizations to access, use and combine it in new ways. Due to technological advances which include smarter phones, better ways to track objects and people as they travel and more efficient data processing, it is now possible to build systems which use shared transparent data in creative ways. The book adds to the current conversation among academics and practitioners about how to promote public value through data disclosure, focusing particularly on the roles that governments, businesses and non-profit actors can play in this process, making it of interest to both scholars and policy makers.

Sustainable Development Law in the UK Andrea Ross,2013-03-01 Sustainable development is now widely accepted as a political objective in the UK and elsewhere but to what extent has the UK's rhetoric on sustainable development become a reality The aim of this book is to critically examine the UK's approach to promoting and delivering sustainable development It begins by providing a detailed account of UK law on sustainable development by reviewing the various policy institutional and legal mechanisms used by the UK since the 1980s and by devolved administrations since devolution took effect in 1999 Progress has been slow too slow and according to the scientists time is running out To deal with this lack of progress the book advocates increasing the status of ecological sustainability and sustainable development through the introduction of a wide range of legal mechanisms which would compel the change needed The book calls for ecological sustainability or respecting the Earth's environmental limits to be afforded the status of legal principle and argues that with ecological sustainability at its normative core sustainable development could provide an effective framework for decision making and governance It argues that to support this approach and ensure consistency the time has come for sustainable development to receive explicit legal backing Over and above its symbolic and educational value legislation can impose mandatory rules on policymakers and decision makers often with meaningful consequences both inside and outside the courtroom To this end the book contributes to the theory on sustainable development governance by suggesting three possible legislative approaches for such intervention The volume concludes that while a lack of leadership on sustainable development may hinder the introduction of these innovations once introduced these innovations would equally provide much needed support for effective leadership towards a sustainable future Andrea Ross is a Reader in the School of Law at the University of Dundee and has taught and researched in the areas of public and environmental law for over 18 years Before becoming an academic she qualified as a Barrister and Solicitor in Ontario Canada An Earthscan from Routledge book

Urban Public Transport Today Dr Barry John Simpson, B. Simpson, 2003-09-02 It is widely recognised that there are many people for whom public transport is essential particularly amongst the elderly children and teenagers Less obvious is the dependence of our cities for their existence on high capacity public transport Although there is still a prevalent view that local public transport is only for those who do not have a car we are slowly beginning to realise that we need to find ways of restricting use of the private car more severely and that will involve some transfer to public transport There is a widening gap between what we expect of public transport and what can be delivered Our expectations for travel are increasing both in quantity and in the standards of speed reliability and comfort Out of town shopping leisure parks and business parks all involve more travel than did their predecessors Cars are becoming more like mobile sitting rooms with all the home comforts such as CD player and telephone To give all this up for a bus or train is asking a lot Urban Public Transport Today gives an honest appraisal of the pros and cons of new public transport technologies It shows how public transport can be made a less unacceptable alternative to the private car than it is now Public transport needs to be co ordinated and planned together with land uses under the Town and Country Planning legislation too often public transport solutions overlook the significance of town planning policies generating demand for travel The author draws on a thorough study of many continental European countries and includes the latest Euro legislation and recent case histories to give a comprehensive coverage of everything from policy problems including land use decisions to practical considerations including road building Urban Public Transport Today will be invaluable for all those involved in the land use local transport conundrum including planning officers policy makers and transport consultants as well as students in transport studies town planning and geography Barry Simpson acts as an advisor to a number of public authorities and private firms in the field of public transport including the Department of Transport He has served for 15 years as an examiner to the Royal Town Planning Institute and teaches transport studies at Aston University
