Rief,2011-04-27 This book explores contemporary club and dance cultures as a manifestation of aesthetic and prosthetic forms of life Rief addresses the questions of how practices of clubbing help cultivate particular forms of reflexivity and modes of experience and how these shape new devices for reconfiguring the boundaries around youth cultural and other social identities She contributes empirical analyses of how such forms of experience are mediated by the particular structures of night clubbing economies the organizational regulation and the local organization of experience in club spaces the media discourses and imageries the technologies intervening into the sense system of the body e g music visuals drugs and the academic discourses on dance culture Although the book draws from local club scenes in London and elsewhere in the UK it also reflects on similarities and differences between nightclubbing cultures across geographical contexts *Scared to Death* Christopher Booker,Richard North,2020-08-06 Newly revised and updated in the light of COVID 19 For most of the latter part of the last century and the early part of this Britain has been assailed by a succession of scares from salmonella and eggs to BSE from the Millennium Bug to bird flu from DDT to passive smoking from asbestos to global warming These scares have become one of the most conspicuous and damaging features of our modern world so much so that as we entered the third decade of the new century our senses had become so blunted that we scarcely recognised the real thing for what it was until it arrived COVID 19 for which we were almost completely unprepared The authors analyse the crucial roles of the different factions who perpetrated the scares from the scientists who misread or manipulated the evidence to the media and lobbyists who eagerly promoted scares without regard to the consequences and the politicians and officials who came up with absurdly disproportionate responses leaving us to pay a colossal price In this updated edition *Scared to Death* not only presents a detailed account of the scares that have dominated our society for the past 50 years through all of which the authors lived but also examines the background to the COVID 19 pandemic tracing our lack of preparedness to its roots and then assessing by way of contrast why this is the real thing as opposed to the succession of scares that we have experienced

**Britain and World War One** Alan G. V. Simmonds, 2013-03 The First World War appears as a fault line in Britain's twentieth century history. Between August 1914 and November 1918 the titanic struggle against Imperial Germany and her allies consumed more people, more money and more resources than any other conflict Britain had hitherto experienced. For the first time it opened up a Home Front that stretched into all parts of the British polity, society and culture, touching the lives of every citizen regardless of age, gender and class. Even vegetables were grown in the gardens of Buckingham Palace. Britain and World War One throws attention on these civilians who fought the war on the Home Front. Harnessing recent scholarship and drawing on original documents, oral testimony and historical texts, this book casts a fresh look over different aspects of British society during the four long years of war. It revisits the early war enthusiasm and the making of Kitchener's new armies, the emotive debates over conscription, the relationships between politics, government and popular opinion, women working in wartime industries, the popular experience of war and the question of social change. The book also explores areas of wartime Britain overlooked by recent histories, including the impact of the war on rural society, the mobilization of industry and the importance of technology as well as exploring responses to air raids, food and housing shortages, the challenges to traditional social and sexual mores and wartime culture. Britain and World War One is an essential book for all students and interested lay readers of the First World War.
