Bodio, 2012-10-16 An Eternity of Eagles The Human History of the Most Fascinating Bird in the World A compulsively readable natural and social history An Eternity of Eagles is a profusely illustrated celebration of all things eagle by a

naturalist who has kept eagles himself and ridden with the eagle tribes of Central Asia His vivid description of an eagle if it could imagine itself is of a carnivorous Buddhist Through Bodio s insights we get a strange glimpse of these other minds that share the earth with us Annie Proulx author of The Shipping News and Brokeback Mountain From one of the foremost author naturalists in the country Stephen J Bodio comes a compulsively readable natural and social history of the most beautiful bird in the world the eagle with a lengthy and admiring introduction by Annie Proulx The Eagle s Shadow traces our love hate relationship to these living dinosaurs from Neolithic rock art and Native American religion through the practices of Kazakh falconers who use them to hunt wolves and to contemporary art and popular culture Proulx sums up best the heart of this book Those of us who are interested in bird behavior beyond the feeder or the identification guide book find meager pickings when it comes to information I am fortunate that my house faces a cliff with a river at the base where I can watch raptors water fowl and a hundred other species The nests of a pair of bald eagles and another upriver inhabited by golden eagles are in sight from the breakfast table I have plenty of books on birds but the information on why the big eagles do what they do is hard to dig out Eagle behavior is usually lumped together with the general behavior of the Accipitrids but a single book focused on the rich lore and sweep of eagledom did not seem to exist Bodio s beautifully written and authoritative book Eagles is a primary source of information as well as an omnium gatherum from literature film and mythology concerning these large striking birds Stephen Bodio was born and educated in Boston and has lived in a rural New Mexico village for over thirty years He has traveled extensively in Europe Africa and Asia and has written five books

In the Company of Crows and Ravens John M. Marzluff,Tony Angell,2008-10-01 Crows and people share similar traits and social strategies To a surprising extent to know the crow is to know ourselves from the Preface From the cave walls at Lascaux to the last painting by Van Gogh from the works of Shakespeare to those of Mark Twain there is clear evidence that crows and ravens influence human culture Yet this influence is not unidirectional say the authors of this fascinating book people profoundly influence crow culture ecology and evolution as well John Marzluff and Tony Angell examine the often surprising ways that crows and humans interact The authors contend that those interactions reflect a process of cultural coevolution They offer a challenging new view of the human crow dynamic a view that may change our thinking not only about crows but also about ourselves Featuring more than 100 original drawings the book takes a close look at the influences people have had on the lives of crows throughout history and at the significant ways crows have altered human lives In the Company of Crows and Ravens illuminates the entwined histories of crows and people and concludes with an intriguing discussion of the crow human relationship and how our attitudes toward crows may affect our cultural trajectory

Like Sex with Gods Bayla Singer,2003-05-08 Human flight is not a simple matter of science and technology It is a continuing epic of dreams and obsession of yearning and striving to harness the intellect in the service of the emotions In Like Sex with Gods An Unorthodox History of Flight Bayla Singer offers a unique approach to humanity s fascination with flying Rather than merely

tracing the factual prehistory of flight up to the success of the Wright Brothers Bayla Singer considers the interaction and influence of our dreams fantasies culture and technology on the age old quest to fly This enlightening study begins with the deities and other denizens of the heavens that humanity has created in its religion literature and art At first a monopoly of the gods flight came to interest humanity as a way to free itself from the physical and intellectual bonds of the earth The myth of flight eventually gives way to the pursuit of actual flight Singer shows in compelling detail the many flying machines that have been created including balloons gliders and kites The accomplishment of the Wright Brothers and our successful trips into space are merely stops on a continuing journey as our ancient dream of flight continues to push us to new and loftier places Filled with compelling stories and detailed illustrations this book provides absorbing reading for aviation experts those fascinated with the intimate relationship between technology and culture and all of us who have even a passing interest in flying

Wings in the Desert, 2007 There is a common but often unspoken arrogance on the part of outside observers that folk science and traditional knowledge the type developed by Native communities and tribal groups is inferior to the formal science practiced by Westerners In this lucidly written and humanistic account of the O odham tribes of Arizona and Northwest Mexico ethnobiologist Amadeo M Rea exposes the limitations of this assumption by exploring the rich ornithology that these tribes have generated about the birds that are native to their region He shows how these peoples observational knowledge provides insights into the behaviors mating habits migratory patterns and distribution of local bird species and he uncovers the various ways that this knowledge is incorporated into the communities traditions and esoteric belief systems Drawing on more than four decades of field and textual research along with hundreds of interviews with tribe members Rea identifies how birds are incorporated both symbolically and practically into Piman legends songs art religion and ceremonies Through highly detailed descriptions and accounts loaded with Native voice this book is the definitive study of folk ornithology It also provides valuable data for scholars of linguistics and North American Native studies and it makes a significant contribution to our understanding of how humans make sense of their world It will be of interest to historians of science anthropologists and scholars of indigenous cultures and folk taxonomy

Navajo and the Animal People Steve Pavlik, William B Tsosie, 2014-07-01 This text examines the traditional Navajo relationship to the natural world Specifically how the tribe once related to the Animal People and particularly a category of animals which they collectively referred to as the naatl eetsoh the ones who hunt These animals like Native Americans were once viewed as impediments to progress requiring extermination

Hunting the Wren Elizabeth Atwood Lawrence, 1997 A unique interdisciplinary study this book examines the British and European tradition of the wren hunt in which a bird ordinarily revered and protected for most of the year was killed around the time of the annual solstice In focusing on this ancient ritual Elizabeth Atwood Lawrence draws on her training in cultural anthropology and biology to cast a fresh light on the complexities of human animal relationships Following an introductory chapter on animal symbolism Lawrence proceeds in subsequent chapters to describe the wren

both as a biological entity and as the subject of numerous tales and legends to delineate the details of the wren hunt ceremony and the various meanings ascribed to it and finally to relate the ceremony to important contemporary issues in human animal interactions and current attitudes toward the living environment Whereas most other studies tend to concentrate solely on human perceptions of animals and fail to include the animal's role in the relationship Lawrence's approach shows how the participation of both animal and human determines the symbolic status of the animal which in turn influences the treatment of that animal within a particular society At a time when human destructiveness toward nature has reached tragic proportions Lawrence contends it is critical that we understand the processes by which certain cultural beliefs in combination with observations about the natural history of a particular animal result in emotional and mental responses that may ultimately determine the fate of that species The author argues persuasively that the wren hunt with its ancient roots associated beliefs and complex meanings in the preindustrialized world still has much to teach us **Meinrad Craighead** Meinrad Craighead, 2003 This extensively illustrated volume collects the varied powerful work of Meinrad Craighead an artist whose images find their beginnings in her Catholic roots she was a nun for fourteen years as well as in the traditions of Southwest Native American Culture in which she has immersed herself since moving to New Mexico twenty years ago Craighead has devoted her life to contemplation prayer and art Her images are both figurative and abstract she works in both black and white and color Animals figure prominently in her work as do dream figures and the artist herself in various manifestations Oftentimes her images relate journeys she has taken either on this earth or in waking or sleeping dreams Many times her paintings are accompanied by her own telling of these stories and as a writer Craighead has the ability to move us as deeply as her images do This retrospective conveys Craighead's enormous body of work over the past forty years It is a tribute to an important visionary a fine artist and an inspiring life Essays by Rosemary Davies a writer who first met Craighead at Stanbrook Abbey Virginia Beane Rutter a Jungian analyst and the author of *Embracing Persephone* and *Celebrating Girls* and Eugenia Parry an art historian and the author of numerous books and essays about art and photography discuss Meinrad Craighead's work with subtlety and insight *Traveling the Rainbow* Derrel B.
