A VIRTUAL EVENT

Pulmonary And Critical Care Medicine Update 5

Jean-Louis Vincent

Pulmonary And Critical Care Medicine Update 5:

Recent Updates in Intensive Care Medicine Nissar Shaikh, 2024-11-27 Recent Updates in Intensive Care Medicine consists of six chapters each addressing key topics in the daily practice of critical care It covers the management of aneurysmal subarachnoid hemorrhage and peripartum hemorrhage as well as the role of intensivists in managing patients through outreach team coverage beyond the intensive care unit Written by experts in their respective fields this book is designed to support critical care physicians surgeons general practitioners and paramedical and technical staff in critical intensive and acute care settings

Pulmonary and Critical Care Medicine Roger C. Bone, David R. Dantzker, Ronald B. George, Herbert Y. Reynolds, Richard A. Matthay, 1997-12 The fifth update of an annually updated two volume looseleaf reference work this text covers current thinking on important topics in the fields of pulmonary and critical care medicine

Pulmonary Emphysema - Recent Updates Kian Chung Ong, 2024-06-19 Pulmonary emphysema long subsumed under the umbrella term chronic obstructive pulmonary disease or its acronym COPD has a long and elaborate history originating from its description at the dawn of modern medicine This textbook combines the old with the new the historical developments in pulmonary emphysema are retraced from its earliest depiction to the contemporary revisions of the definition nomenclature and taxonomy classification of COPD as advocated by the Global Initiative for Obstructive Lung Disease GOLD Strategy for Prevention Diagnosis and Management of COPD Additionally the following topics of interest are included to ensure that this textbook remains au courant the role of macrophages in pulmonary emphysema respiratory electromyography bronchoscopy evaluation of lung deposition of air pollution and drug delivery and lung transplantation for advanced lung disease The reader with a keen interest in pursuing hot topics in respiratory medicine will benefit from this concise and disparate anthology on pulmonary emphysema

Textbook of Pulmonary and Critical Care Medicine Vols 1 and 2 SK Jindal, PS Shankar, Suhail Raoof, Dheeraj Gupta, 2011-03-20 Book includes the basic principles of Pulmonology as well as the recent advances in allied clinical sciences relevant to pulmonology Includes valuable inputs on tuberculosis other pulmonary infections environmental and occupational medicine sleep disorders and general systemic diseases affecting the respiratory system Although critical care is relevant for most of the medical and surgical specialties the pulmonologist have a more vested interest than other specialists Assisted respiration which forms the core of most critical care lies in the primary domain of pulmonologists

Annual Update in Intensive Care and Emergency Medicine 2022 Jean-Louis Vincent, 2022-03-30 The Annual Update compiles reviews of the most recent developments in clinical intensive care and emergency medicine research and practice in one comprehensive book The chapters are written by well recognized experts in these fields The book is addressed to everyone involved in intensive care and emergency medicine anesthesia surgery internal medicine and pediatrics

Textbook of Pulmonary and Critical Care Medicine Vols 1 and 2 SK Jindal, PS Shankar, Suhail Raoof, Dheeraj Gupta, 2011-01-31 This book published in two volumes Both volume divided in twenty three sections all

sections and chapters are most important The Textbook of Pulmonary and Critical Care Medicine also offers a unique exposure to the problems in many parts of the world Tuberculosis the number one treatable condition has been extensively covered and special topics such as multi drug resistance directly observed therapy TB prevention nonpharmacologic approaches and extrapulmonary tuberculosis are particularly relevant Many countries are facing a growing burden of noncommunicable respiratory diseases They have become the second leading cause of death after injuries and their impact on indirect costs such as loss of work and home productivity is enormous These problems are addressed and measures of prevention such as smoking cessation are included Other special challenges including topics such as indoor and outdoor air pollution climate change poisoning with pesticides snakebite toxicity pulmonary manifestations of tropical infections and industrial accidents such as the tragedy seen in Bhopal Madhya Pradesh with methyl isocyanate have been well covered However as globalization flattens the playing field and countries leap to industrialization cultural beliefs natural resources climate and geography have slowed the pace of development in many parts of the world Poverty leads to malnutrition homelessness lack of education and poor access to health care Overcrowded cities and rural underdevelopment are other challenges that impact health in the various parts of the world Moreover epidemics of HIV drug abuse and smoking addiction take a greater toll on the population Yes the world is flat but the terrain is filled with mountains and valleys and local problems demand local solutions And these local problems need to be explored and presented with a scholarly perspective The Textbook of Pulmonary and Critical Care Medicine has successfully incorporated these sociodemographic factors into the subject matter The text is well written and the chapters are carefully referenced with subjects found in all traditional pulmonary and critical care textbooks e g airway diseases interstitial lung disease pleural disease pulmonary neoplasia pulmonary infection sleep and critical care There are several nontraditional sections as well that are practical and especially helpful to the practicing physician These include a section on the symptom approach to lung disease an overview of the pharmacologic agents used to treat lung disease and a comprehensive review of methods in lung diagnosis from the simple history and physical examination to the latest complex tools of interventional pulmonology The textbook is especially unique because of the abundance of illustrations flow charts and tables There are many radiographic and pathologic reproductions that are especially helpful

Human Respiration Vladimir Kulish, 2006 This title discusses the anatomy and physiology of human respiration some of the newest macro and microscopic models of the respiratory system numerical simulation and computer visualization of gas transport phenomena and applications of these models to medical diagnostics treatment and safety
