Hume and the Problem of Miracles: A Solution Michael Levine, Michael P. Levine, 1989 This book developed from sections of my doctoral dissertation The Possibility of Religious Knowledge Causation Coherentism and Foundationalism Brown University 1982 However it actually had its beginnings much earlier when as an undergraduate at the University of Virginia I first read Hume s Of

Miracles and became interested in it Fascinated would be too strong My teacher put the following marginal comment in a paper I wrote about it Suppose someone told you that they had been impregnated by an angel whispering into their ear Wouldn t you think they had gone dotty She had spent time in England I thought about it I agreed that I would not have believed such testimony but did not think this had much to do with Hume s argument against belief in miracles What surprised me even more was the secondary literature I became convinced that Hume s argument was misunderstood My main thesis is established in Part I This explains Hume s argument against justified belief in miracles and shows how it follows from and is intrinsically connected with his more general metaphysics Part II Part I It should give the reader a more complete understanding builds on of both the structure of Hume s argument and of his crucial and questionable premises Chapters 5 and 11 are perhaps the most technical in the book but they are also the least necessary They can be skipped by the reader who is only interested in Hume on miracles

Values and Intentions J. N. Findlay,2014-11-20 Professor Findlay in this book originally published in 1961 set out to justify and to some extent carry out a material value ethic ie A systematic setting forth of the ends of rational action The book is in the tradition of Moore Rashdall Ross Scheler and Hartmann though it avoids altogether dogmatic intuitive methods It argues that an organised framework of ends of action follows from the attitude underlying our moral pronouncements and that this framework while allowing personal elaboration is not a matter for individual decision The relations connecting our fundamental value judgements with one another and the frames of mind behind them are not rigorously deductive but are sufficiently compelling to be called logical Something of a transcendental deduction of a well ordered family for our basic heads of valuation is both possible and necessary The work is further critical of the notion of obligation which has been extended far beyond legal contracts and understandings The book also contains a chapter on religion
