## **Radiant Past Ideology And Reality In Hungary's Road To Capitalism:**

The Radiant Past Michael Burawoy, János Lukács, 1992-03-15 Communism once heralded as the radiant future of all humanity has now become part of Eastern Europe's past. What does the record say about the legacy of communism as an organizational system? Michael Burawoy and János Lukács consider this question from the standpoint of the Hungarian working class. Between 1983 and 1990 the authors carried out intensive studies in two core Hungarian industries: machine building and steel production to produce the first extended participant observation study of work and politics in state socialism. A fascinating and engagingly written eyewitness report on proletarian life in the waning years of goulash communism. A richly rewarding book, one that should interest political scientists in a variety of subfields from area specialists and comparativists to political economists as well as those interested in Marxist and post-Marxist theory. Elizabeth Kiss, *American Political Science Review*. A very rich book. It does not merely offer another theory of transition but also presents a clear interpretive scheme combined with sociological theory and vivid ethnographic description. Ireneusz Bialecki, *Contemporary Sociology*. Its informed skepticism of post-Communist liberal euphoria, its concern for workers and its fine ethnographic details make this work valuable. Kos R. Na Tas, *American Journal of Sociology*. *Reflections on 1989 in Eastern Europe* Terry Cox, 2013-09-13 This book presents a selection of recent research on the events and developments of 1989 in Eastern Europe. It offers a mix of detailed examinations of the events of 1989 in Eastern Europe, thoughtful and considered appraisals of developments, and middle-range theoretical discussions of patterns of cause and effect. The authors range in their approaches from detailed examinations of government and ruling party papers from the archives (some of it originally labelled top secret) to personal observations and oral history based on interviews with participants to analysis of survey data and official statistics. In their chosen focus, the essays range from explorations of the emerging crisis in the communist regimes that led to the events of 1989, reflections and insights into the events and changing mood during 1989 itself, and examinations of some of the consequences and legacies of 1989. This book was published as a special issue of *Europe Asia Studies*. **Privatizing Poland** Elizabeth Cullen Dunn, 2015-09-25 The transition from socialism in Eastern Europe is not an isolated event but part of a larger shift in world capitalism: the transition from Fordism to flexible or neoliberal capitalism. Using a blend of ethnography and economic geography, Elizabeth C. Dunn shows how management technologies like niche marketing, accounting, audit, and standardization make up flexible capitalism's unique form of labor discipline. This new form of management constitutes some workers as self-auditing, self-regulating actors who are disembedded from a social context while defining others as too entwined in social relations and unable to self-manage. *Privatizing Poland* examines the effects privatization has on workers' self-concepts, how changes in personhood relate to economic and political transitions, and how globalization and foreign capital investment affect Eastern Europe's integration into the world economy. Dunn investigates these topics through a study of workers and changing management techniques at the Alima Gerber factory in Rzeszów, Poland.

formerly a state owned enterprise which was privatized by the Gerber Products Company of Fremont Michigan Alima Gerber instituted rigid quality control job evaluation and training methods and developed sophisticated distribution techniques The core principle underlying these goals and strategies the author finds is the belief that in order to produce goods for a capitalist market workers for a capitalist enterprise must also be produced Working side by side with Alima Gerber employees Dunn saw firsthand how the new techniques attempted to change not only the organization of production but also the workers identities Her seamless engaging narrative shows how the employees resisted redefined and negotiated work processes for themselves

**Critical Study Of Work** Rick Baldoz, 2009 Essays that challenge the benefits of globalization and new technologies

**Theorizing Transition** John Pickles, Adrian Smith, 2005-08-31 Examining transformations using a variety of perspectives Theorizing Transition provides both a rich empirical map of the dimensions of post Communism and raises important theoretical issues about how we interpret these changes

**The Revolutions of 1989** Vladimir Tismaneanu, 2005-07-28 The Revolutions of 1989 is a collection of both classic and recent articles examining the causes and consequences of the collapse of communism in East and Central Europe the most important event in recent world history It includes discussion of the economic political and social nature of revolutions the role of dissidents and civil society in encouraging the breakdown of eastern European communist regimes comparisons with other revolutions the extent of the collapse of Leninist regimes in East Central Europe European historians scholars and students will want to make this an integral part of their studies

*From Self-fulfilment to Survival of the Fittest* Ewa Mazierska, 2015-01-01 Contrary to the assumption that Western and Eastern European economies and cinemas were very different from each other they actually had much in common After the Second World War both the East and the West adopted a mixed system containing elements of both socialism and capitalism and from the 1980s on the whole of Europe albeit at an uneven speed followed the neoliberal agenda This book examines how the economic systems of the East and West impacted labor by focusing on the representation of work in European cinema Using a Marxist perspective it compares the situation of workers in Western and Eastern Europe as represented in both auteurist and popular films including those of Tony Richardson Lindsay Anderson Jean Luc Godard Andrzej Wajda Du an Makavejev Jerzy Skolimowski the Dardenne Brothers Ulrich Seidl and many others

The Socialist Good Life Cristofer Scarboro, Diana Mincyte, Zsuzsa Gille, 2020-06-02 What does the good life mean in a backward place As communist regimes denigrated widespread unemployment and consumer excess in Western countries socialist Eastern European states simultaneously legitimized their power through their apparent ability to satisfy consumers needs Moving beyond binaries of production and consumption the essays collected here examine the lessons consumption studies can offer about ethnic and national identity and the role of economic expertise in shaping consumer behavior From Polish VCRs to Ukrainian fashion boutiques tropical

*Hot Coal, Cold Steel* Stephen Crowley, 2010-06-04 Well after the disintegration of the Communist Party and the Soviet state and through several years of economic collapse industrial workers in almost every sector of the former Soviet Union have remained quiescent and the same ineffective and unpopular trade unions still hold a virtual monopoly on worker s representation Why While many argue that labor is a central variable in the development of economic and political systems little is known about workers in the states of the former Soviet Union since the fall of Communism In a comparative study of two groups of industrial workers the coal miners and steelworkers at the end of the Soviet era Stephen Crowley sheds light on where these workers have been and where they are going Coal miners in the final years of the Soviet Union effectively organized and led strikes which supported the end of Communism even though their heavy subsidies would be threatened by capitalism Steel workers in contrast did not effectively organize and strike This pattern has continued under the new governments with the coal miners effectively organized and seeking protection from the worst consequences of marketization while the steel workers remain weakly organized despite deteriorating economic

conditions Based on extensive on site research including interviews with miners and steelworkers labor leaders and plant managers Crowley develops a detailed picture of the conditions under which workers organize His findings have application beyond the conditions of post Communist Russia and Ukraine to other societies undergoing fundamental change This book will be of interest to sociologists and political scientists interested in the role of labor in transitional societies the patterns of organization of labor as well as area specialists Stephen Crowley is Associate Professor of Political Science Oberlin College

**Development and Financial Reform in Emerging Economies** Kobil Ruziev,2015-10-06 Modern development strategy relies heavily on uncompromising orthodox economic theory and a dogmatic faith in market efficiency In contrast the essays in this volume aim to emphasize the importance of historic experiences to evolve a more realistic and dynamic view of how such development could be formalized

Popular Culture and Subcultures of Czech Post-Socialism Ondřej Daniel,Tomáš Kavka,Jakub Machek,2017-01-06 This book draws on wide range of inspirations to provide a well balanced picture of the popular culture and subcultures of Czech post socialism What were the continuities and discontinuities of the post socialist popular culture mentalities and society during the period of late state socialism What were the different mechanisms of creating the Other in popular culture and subcultures This volume shows the diverse trajectories of the late socialist and older national cultural practices and the related set of values and beliefs in new transitory circumstances Whereas many scholars emphasize the tendency to sustain in a more or less adapted form under the new circumstances the chapters and case studies of this book demonstrate a slightly different more nuanced development

*Laboring Along* Adrian Grama,2018-11-05 Products of war rather than revolution the socialist regimes of Eastern Europe emerged in a global conjuncture defined by the aftermath of the Second World War How did these regimes manage to overcome the domestic impact of the war and build socialism at the same time This book shows how a commitment to productivity structured the transition from the period of postwar reconstruction to the take off of industrial development during the late 1950s Conceived as 1 pacification of labor relations 2 the recovery of managerial authority 3 monetarization of everyday life 4 rationalization and 5 austerity the politics of productivity provides a comprehensive conceptual framework for grasping together the end of the postwar period and the building of state socialism in Eastern Europe By revealing how the social consequences of the Second World War were absorbed in the transition to authoritarian state socialism in the age of the rolling steel mill this book carries implications for the way in which we may think about the

Kelemen,M. Kostera,2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU
