## Radical Protest And Social Structure:

**Radical Protest and Social Structure** Michael Schwartz, 1988-07-25 Michael Schwartz's book is really three books in one: an analysis of the structural changes that produced one of the most oppressive social systems the world has known, the one-crop cotton tenancy economy and the system of institutionalized racism and authoritarian one-party politics that was required to preserve the fragile economic arrangement; a theoretical analysis of the origins, mobilization, and outcome of insurgent challenges; and a meticulous application of that theory to the rise and collapse of the Populist movement. Craig Jenkins, *Theory and Society*

**Farmers in Rebellion** Donna A. Barnes, 2014-06-23 The years after the Civil War brought struggle to the Southern farmer as the economic mainstay of the South, cotton, steadily dropped in price. Prompted by hard times, farmers in Lampasas County, Texas, gathered in 1877 to discuss what could be done. From these modest origins emerged the National Farmers Alliance and Industrial Union, later known as the Southern Farmers Alliance, a powerful protest movement that played an important role in the formation in 1892 of a new political force, the People's Party. In the solid South, particularly in Texas, large numbers of voters abandoned the Democratic Party for the new party. Yet despite this support, the decline of the People's Party after 1894 was swift. *Farmers in Rebellion* recounts the compelling story of these two crucial and closely related movements. Donna A. Barnes examines their developmental histories, asking such important questions as: Under what conditions do protest movements remain weak? Under what conditions do they prosper, amassing large numbers of supporters? And under what conditions do successful protest movements lose their momentum and die? The author explores these complex questions with deft use of archival data that allows her to reflect on the adequacy of the past sociological answers to these questions. *Farmers in Rebellion* is a book rich in detail and scope in its look at a critical juncture in the growth of national populist movements. Of interest to sociologists, historians, and political scientists, it stands as an important contribution to our understanding of a pivotal time in Texas and national history.

[The Louisiana Populist Movement, 1881-1900](#) Donna A. Barnes, 2011-05-18 The Populist movement of the late nineteenth century represents one of the largest third-party challenges in American history. Throughout the South, widespread drops in crop prices led to agrarian revolt, which contributed to the movement's popularity. Yet in the largely rural state of Louisiana, despite the political group's focus on empowering distressed farmers, this challenge proved far less successful. In Donna A. Barnes's *The Louisiana Populist Movement*, the question of ineffectuality makes an intriguing political case study of the Pelican State and Populism. Emerging in the 1890s as the political wing of the Southern Farmers Alliance, the Populists or People's Party garnered the support of millions of rural southerners. But the affiliated Louisiana party struggled to spread beyond a limited number of parishes in the northern and central part of the state. According to Barnes, the movement's relatively poor mobilization record provides an excellent opportunity to explore factors that impede social growth. Most scholars, she contends, often focus on the emergence and rise of successful political organizations and overlook the valuable observations to be found within less successful

movements such as Louisiana Populism In her evaluation Barnes points to racial division as the factor that undermined the Populist cause in Louisiana The Democratic Party saw the agenda of the Populist movement as a threat to white supremacy and thus when paired with the 1898 state constitution that disfranchised poor rural whites and most blacks predestined the People s Party to poor public reception Based on an array of archival research Barnes s study offers the definitive source for the history of the Louisiana Populist Movement as well as a multidimensional theoretical analysis of the factors behind the movement s failure

**Fields of Fire** Louis Edgar Esparza, 2023-10-10 *Fields of Fire* Emancipation and Resistance in Colombia identifies the concept of the emancipatory network as a coordination of loose discrete and differentiated actors to explain how activists successfully practice high risk activism Illustrating that previous studies on high risk activism come to contradictory conclusions Louis Edgar Esparza argues that networks rather than individual characteristics are associated with mobilization The book features unique ethnographic material of a Colombian

sugarcane worker strike and includes interviews with workers and human rights activists in Valle del Cauca and Bogot that reveal different forms of knowledge that activists bring to a social movement It argues that the combination of these different forms of knowledge bolsters the movement's resiliency in the face of repression The book provides a counterfactual chapter illustrating a lack of mobilization where the emancipatory network is absent Ultimately it integrates English and Spanish language social movement literatures revealing important theoretical insights and is detailed with data from various sources to outline the state context of social movement action *The Rise of the Ku Klux Klan* Rory McVeigh, 2009 In *The Rise of the Ku Klux Klan* Rory McVeigh provides a revealing analysis of the broad social agenda of 1920s era KKK showing that although the organization continued to promote white supremacy it also addressed a surprisingly wide range of social and economic issues targeting immigrants and particularly Catholics as well as African Americans as dangers to American society

Luders, 2010-01-25 This book examines the success and failure of social movements to bring about change in American society focusing on the targets of protests to explain diverse outcomes **Levers of Power** Michael Schwartz, Tarun Banerjee, Kevin A. Young, 2020-07-07 It's no secret that the 1% the business elite that commands the largest corporations and

the connected network of public and private institutions exercise enormous control over U S government While this control is usually attributed to campaign donations and lobbying Disruptive Power argues that corporate power derives from control over the economic resources on which daily life depends Government officials must constantly strive to keep capitalists happy lest they go on capital strike that is refuse to invest in particular industries or locations or move their holdings to other countries and therefore impose material hardship on specific groups or the economy as a whole For this reason even politicians who are not dependent on corporations for their electoral success must fend off the interruption of corporate investment Disruptive Power documents the pervasive power of corporations and other institutions with decision making control over large pools of capital particularly the Pentagon It also shows that the most successful reform movements in recent U S history for workers rights for civil rights and against imperialist wars succeeded by directly targeting the corporations and other institutional adversaries that initiated and benefitted from oppressive policies Though most of today s social movements focus on elections and politicians movements of the 99% are most effective when they inflict direct costs on corporations and their allied institutions This strategy is also more conducive to building a revolutionary mass movement that can replace current institutions with democratic alternatives

*Class and Community in Frontier Colorado* Richard Hogan, 2021-10-08 Spurred by the Gold Rush of 1859 settlers of diverse backgrounds and nationalities trekked to Colorado and began building towns Existing accounts of their struggles and those of townbuilders throughout the American West focus on boom or bust economics rampant boosterism and bitter social conflicts This according to sociologist Richard Hogan is not the whole story In *Class and Community in Frontier Colorado* Hogan offers a fresh perspective on the frontier townbuilding experience He argues that townbuilding in Colorado was not as some have suggested monopolized by local boosters or national business interests It was instead a complex dynamic process that reflected competition cooperation and conflict among various socioeconomic classes and between local and national business interests as well Hogan shows how farmers ranchers miners tradesmen merchants bankers entrepreneurs land speculators and eastern investors all vied for control in six of Colorado s emerging urban centers Denver Central City Greeley Golden Pueblo and Canon City Meticulously he traces the conflicts and coalitions that arose in and among these groups By combining historical sociology with local history Hogan s study challenges current thinking about economic development class structure and conflict political partisanship collective action and social change in the American West

*Anarchy in Athens* Nicholas Apoifis, 2016-11-11 The battles between Athenian anarchists and the Greek state have received a high degree of media attention recently But away from the intensity of street protests militants implement anarchist practices whose outcomes are far less visible They feed the hungry and poor protect migrants from fascist beatings and try to carve out an autonomous political social and cultural space Activists within the movement share politics centred on hostility to the capitalist state and all forms of domination hierarchy and discrimination Based on extensive ethnographic fieldwork among Athenian anarchists and anti authoritarians *Anarchy in*

Athens unravels the internal complexities within this milieu and provides a better understanding of the forces that give the space its shape
