Radical Ecology in the Face of the Anthropocene Extinction John A. Smith, Anna Wilson, 2024-06-14 This book has two interlocking ambitions The first is to steer what we purposefully call the idioms of critical philosophy towards a more ecologically informed paradigm The second is to recognise that what has rightly come to be called The Anthropocene extinction is not and cannot be treated as simply a scientific fact but rather a socio political and ecological dispute of immense complexity We start with an exploration of the consequences of a critical tradition which under the name Enlightenment has placed humanity at its centre and chance as its most general and problematic characteristic We argue that this leads to a schizophrenic relationship between radical critique and science which can be avoided if we take the implications of biosemiotics seriously and develop a new ecologically informed social science We argue that in practice this means that for science to be practical in addressing the Anthropocene extinction we have to recognise that it operates in a historically emergent highly differentiated technopolitical ecology Science as it is currently commonly understood and used is not ecological enough This book will interest social scientists interested in not only describing and critiquing but also understanding and responding to the complex problems facing humanity scientists wanting to make sense of social phenomena those educating the next generation of social scientists and climate activists and policy makers

is rich in innovative approaches to the questions they raise that are reasonably well thought out The fact that the essays in each section really do resonate with one another directly is also intellectually exciting and very helpful in working out the full dimensions of each question raised in the volume Innovation and the Arts Piero Formica, John Edmondson, 2020-02-19 By dwelling on the need for the convergence of business innovation and the arts this book highlights the value of lowering the psychological organizational and institutional barriers that keep them apart For educators and practitioners this is an in depth discussion designed to stimulate awareness of the issues facing business education Radical Environmentalism Peter C. Ecology and Utility Lincoln Allison,1991 This book examines environmentalist thought through its connections to ancient philosophies and religions and a lineage which runs through romantic art and nineteenth century science The examination is conducted from a broad and skeptical utilitarian point of view Environmental Skepticism Peter J. Jacques,2016-05-06 Environmental skepticism describes the viewpoint that major environmental problems are either unreal or unimportant In other words environmental skepticism holds that environmental problems especially global ones are inauthentic Peter Jacques describes both empirically and historically how environmental skepticism has been organized by mostly US based conservative think tanks as an anti environmental counter movement This is the first book to analyze the importance of the US conservative counter movement in world politics and its meaning for democratic and accountable deliberation as well as its importance as a mal adaptive project that hinders the world s people to rise to the challenges of sustainability Specific consideration is given to the threat of the counter movement to marginalized people of the world and its philosophical implications through its commitment to a deep anthropocentrism

Hailwood,2014-12-18 It is often claimed by environmental philosophers and green political theorists that liberalism the dominant tradition of western political philosophy is too focused on the interests of human individuals to

give due weight to the environment for its own sake In *How to be a Green Liberal* Simon Hailwood challenges this view and argues that liberalism can embrace a genuinely green non instrumental view of nature The book s central claim is that nature s otherness its being constituted of independent entities and processes that do not reflect our purposes is a basis for value and can be incorporated within liberal political philosophy as a fundamental commitment alongside human freedom and equality Hailwood argues that the conceptual resources already exist within mainstream liberalism for a thoroughly non instrumental perspective Adopting a rigorous philosophical approach Hailwood tackles a wide range of themes across environmental ethics including holistic theories deep ecology eco feminism and eco anarchism as well as issues in value theory and political philosophy more generally In making the case for liberalism s green credentials *How to be a Green Liberal* is a formidable challenge to recent green political theory and will be required reading not only for students of political philosophy but for all those interested in the natural world and man s relationship to it

Environmental Education in the 21st Century Joy Palmer,2002-09-11 Environmental education is a field characterised by a paradox Few would doubt the urgency and importance of learning to live in sustainable ways but environmental education holds nowhere near the priority position in formal schooling around the world that this would suggest This text sets out to find out why this is so It is divided into six parts Part 1 is a concise history of the development of environmental education from an international perspective Part 2 is an overview of the global agenda or subject knowledge of environmental education Part 3 introduces perspectives on theory and research in environmental education Part 4 moves on to practice and presents an integrated model for planning environmental education programmes Part 5 brings together invited contributors who talk about environmental education in their own countries from 15 countries including China South Africa Sri Lanka and the USA Part 6 returns to the core questions of how progress can be made and how we can maximise the potential of environmental education for the twenty first century
