Radical Islam's Rules The Worldwide Spread Of Extreme Sharia Law:

Radical Islam's Rules Paul Marshall, 2005-02-25 A major feature of the rise of Islamism in the Middle East Asia Africa and parts of the West is the rapid growth of a starkly repressive version of Islamic shari a law often fueled by funds and support from Saudi Arabia The central purpose of Islamists including terrorists is to impose such law in all Muslim lands and then throughout the world in a new Caliphate Despite its importance this worldwide growth of extreme shari a is under documented and little understood By a comparative study over the last twenty five years of Saudi Arabia Iran Pakistan Sudan Nigeria Malaysia and Indonesia this book shows its terrible effects on human rights especially the status of women and religious freedom of Muslims as well as religious minorities and on democracy itself It also shows that such laws are a direct threat to the American interest of advancing democracy and human rights that the United States lacks a policy for dealing with the spread of extreme shari a and concludes with policy recommendations for the United States regarding specific countries confronting extreme shari a

Islamic Law and Human Rights Moataz El Feghery, 2016-08-17 This book explores the development of the Muslim Brotherhood's thinking on Islamic law and human rights and argues that the Muslim Brotherhood has exacerbated rather than solved tensions between the two in Egypt. The organisation and its scholars have drawn on hard line juristic opinions and reinvented certain concepts from Islamic traditions in ways that limit the scope of various human rights and advocate for Islamic alternatives to international human rights. The Muslim Brotherhood's practices in opposition and in power have been consistent with its literature. As an opposition party it embraced human rights language in its struggle against an authoritarian regime but advocated for broad restrictions on certain rights. However its recent and short lived experience in power provides evidence of its inclination to reinforce restrictions on religious freedom, freedom of expression and association and the rights of religious minorities and to reverse previous reforms related to women's rights. The book concludes that the peaceful management of political and religious diversity in society cannot be realised under the Muslim Brotherhood's model of a Shari'a state. The study advocates for the drastic reformation of traditional Islamic law and state impartiality towards religion as an alternative to the development of a Shari'a state or exclusionary secularism. This transformation is however contingent upon significant long term political and socio cultural change and it is clear that successfully expanding human rights protection in Egypt requires not the exclusion of Islamists but their transformation. Islamists still have a large constituency and they are not the only actors who are ambivalent about human rights. Meanwhile Islamic law also appears to continue to influence Egypt's law. The book explores the prospects for certain constitutional and institutional measures to facilitate an evolutionary interpretation of Islamic law provide a baseline of human rights and gradually integrate international human rights into Egyptian law.

The Limits of Constitutional Democracy Jeffrey K. Tulis, Stephen Macedo, 2010-10-18 Constitutional democracy is at once a flourishing idea filled with optimism and promise and an enterprise fraught with limitations. Uncovering the reasons for this ambivalence this book looks at the difficulties of constitutional democracy and reexamines fundamental questions. What is constitutional democracy? When does it succeed or fail? Can constitutional democracies conduct war? Can they preserve their values and institutions while addressing new forms of global interdependence? The authors gathered here interrogate constitutional democracy's meaning in order to illuminate its future. The book examines key themes: the issues of constitutional failure the problem of emergency power and whether constitutions should be suspended when emergencies arise the dilemmas faced when constitutions provide and restrict executive power during wartime and whether constitutions can adapt to such globalization challenges as immigration religious resurgence and nuclear arms proliferation. In addition to the editors the contributors are Sotirios Barber Joseph Bessette Mark Brandon Daniel Deudney Christopher Eisgruber James Fleming William Harris II Ran Hirschl Gary Jacobsohn Benjamin Kleinerman Jan Werner Müller Kim Scheppele Rogers Smith Adrian Vermeule and Mariah Zeisberg.
