Radiocarbon And Archaeology:

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book *Radiocarbon Dating: An Archaeological Perspective*. It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates. In addition to reviewing the basic principles of the method, it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology. This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record.

[The Bible and Radiocarbon Dating](#) Thomas Levy, Thomas Higham, 2014-12-05 Over the past several years a number of Levantine archaeologists working on the Iron Age ca 1200-586 BCE have begun to employ high precision radiocarbon dating to solve a wide range of chronological, historical and social issues. The incorporation of high precision radiocarbon dating methods and statistical modelling into the archaeological tool box of the Biblical archaeologist is revolutionizing the field. In fact, Biblical archaeology is leading the field of world archaeology in how archaeologists must deal with history, historical texts and material culture. A great deal of debate has been generated by this new research direction in southern Levantine Israel, Jordan, Palestinian territories, southern Lebanon, Syria, the Sinai. This book takes the pulse of how archaeology, science based research methods and the Bible interface at the beginning of the 21st century and brings together a leading team of archaeologists, Egyptologists, Biblical scholars, radiocarbon dating specialists and other researchers who have embraced radiocarbon dating as a significant tool to test hypotheses concerning the historicity of aspects of the Old Testament or Hebrew Bible. As this book raises the bar in how archaeologists tackle historical issues as manifest in the interplay between the archaeological record and text, its interest will go well beyond the Holy Land.

Radiocarbon Dating R. Taylor, 2012-12-02 *Radiocarbon Dating: An Archaeological Perspective* provides a review of some of the major advances and accomplishments of the ^{14}C method from an archaeological perspective. The text also provides an introduction to some of the problems and issues involved in the use of ^{14}C data in archaeological studies. The book covers topics in radiocarbon dating including the elements of the radiocarbon method, definition of major anomalies and the different effects of the ^{14}C method and sample pretreatment and measurement techniques. The evaluation of radiocarbon data and the historical development of radiocarbon dating as a method that aids in archaeological studies are also discussed. The text is recommended for archaeologists who want to know more about the theories and principles behind radiocarbon dating.

techniques and its application in their field The book will also be good for physicists who want to work with archaeologists and apply their knowledge in radiocarbon dating **Radiocarbon Dating and the Archaeologist** Elaine Paintin,1977

veteran researchers Vladimir V Pitulko and Elena Yu Pavlova have gathered and analyzed the available data to provide comprehensive documentation of human occupation of continental territories far above the Arctic Circle in the late Neopleistocene also known as the Late Pleistocene era By using uncalibrated radiocarbon dating Pitulko and Pavlova have been able to establish reliable correlations between the artifacts and phenomena being studied The increased number of radiocarbon age determinations for these Arctic sites is the most important data to come from the latest studies of Northeast Asia offering a significant opportunity for re evaluation of older materials in light of these new findings The authors include reporting on recent work performed at two of the most important sites in the region the mammoth cemetery site at Berelekh and the Yana Rhinoceros Horn Site Radiocarbon Dating as a Tool in Archaeology Henry Anthony Polach, 1965
