perspective encompasses WWII's enduring influences on the American way of life. A unique and valuable look at the war.

General James Doolittle [Aircraft of the 8th AAF 1942-1945](#) Kev Darling, **Journey to the Horizon** Hans Onderwater, Brian Lissette, 2021-07-01 This is the epic story of Escape and Evasion during World War Two. Main character is Donald Kenyon Willis, an American pilot who fought with the Finns against the Russians in 1940, then joined the Norwegian Naval Air Arm against the Germans, escaped to the Shetlands, joined the RAF as one of the first Eagle Squadron pilots until he joined the USAAF. After the war and a spell as a base commander in Austria and Germany, he became a test pilot in JATO Jet Assisted Take Off experiments from Wright Patterson Air Base in Ohio, USA. He was one of the last five airmen to evade capture via the Pyrenees the night before D Day with American Lieutenant Colonel Thomas H. Hubbard and 2nd Lieutenant Jack Cornett and Britons Pilot Officer Len Barnes and Sergeant Ron Emeny. **JOURNEY TO THE HORIZON** tells the story of three fighter pilots and two Lancaster crews who were shot down by the Germans. It follows them on the run, hiding in captivity and in some cases in death. They were Britons, Canadians, New Zealanders, and Americans. Five of them met in Paris while being guided by members of the Comete Escape line; others evaded in different ways. Some endured the harsh life in a POW camp while in one case an airman even ended up in Buchenwald concentration camp. Those who died now rest at various cemeteries in France. In the book, Onderwater and Lissette also tell about the sometimes dreadful experiences of the fellow crew members of Barnes and Emeny after their two Lancasters crashed in France. In the course of the research, Hans Onderwater followed the same evasion route, meeting the helpers who risked their lives, crossed the Pyrenees on foot with the Basque guide of 1944 until he too reached Gibraltar. He visited Stalag Luft 1 Barth on the Baltic coast and Stalag Luft 3 Sagan in Poland, Buchenwald near Weimar, and Ravensbrück near Berlin. He spoke with the five airmen or their families and corresponded with the others. During the last forty years, he interviewed over 100 people who were in some major or minor way connected to the airmen and their experiences. *Aerospace Historian*, 1978 **The American Eagle Squadrons of the Royal Air Force** Timothy S. Good, 2020-04-16 While the United States sought to remain neutral in the early years of World War II, some Americans did not. This book is the first to provide the operational records and combat reports of the three American Eagle Royal Air Force squadrons, units comprised of volunteer American pilots who served with the British prior to the U.S. entering the war. The records tell the story of the more than 200 pilots who, against federal law, flew with the British in their fight against Nazi Germany. While some Americans served individually in other RAF units, these three squadrons—the 71st, 121st, and 133rd—were the only ones organized exclusively for Americans. They were the first of dozens of American fighter squadrons that would soar over Europe. *The British Library General Catalogue of Printed Books 1976 to 1982* British Library, 1983 **Library of Congress Catalogs** Library of Congress, 1980 **A History of the Mediterranean Air War, 1940-1945** Christopher Shores, Russell Guest, 2025-09-30 In 1943, Allied bombers from Italy launched strategic attacks on Axis oil fields, factories, and Danube supply routes. Following the inter-Allied Casablanca Conference in January 1943, the

outline for the Combined Bomber Offensive was agreed and resulted in early February with the Casablanca Directive. This required the progressive destruction and dislocation of the German military industrial and economic systems and the undermining of the morale of the German people to a point where their capacity for armed resistance is fatally weakened. This directive was clarified in June when the Combined Chiefs of Staff issued the Pointblank Directive that stated that the highest priority targets were the fighter aircraft factories to ensure that in the coming invasion of France the enemy would not have air superiority. When these directives were issued it was envisaged that as well as attacks by RAF Bomber Command and the US 8th Air Force based in England the strategic bomber forces in Italy would begin operations once suitable bases were available. After the Allied landings in Italy and resulting collapse of the Italian fascist regime a network of bomber bases was hastily developed. Thus on 1 November 1943 the US 15th Air Force was formed to conduct the daylight bombing offensive against strategic targets in southern Germany and across southeastern Europe. Key among these were the Rumanian oilfields and traffic along the River Danube. This new formation was joined by the smaller but highly effective 205 Group RAF that was trained and equipped for night bombing so mirroring their equivalent British based formations. The damaging attacks on the Reich's oil supplies and the highly effective Danube mining campaign conducted at night by 205 Group delivered huge strategic effect. The latter reduced vital oil and goods traffic into the Reich to a trickle but also dislocated the supply and logistics train into the southern part of the Eastern Front so giving manifest support to the Soviets. In this volume the early months of this hugely significant air campaign are described in minute and original detail and are accompanied by hundreds of hitherto unpublished photographs. In combating these attacks Germany's Axis allies such as Hungary, Rumania, Bulgaria and Slovakia were encountered for the first time by the Western Allies.

Operation Oyster

World War II's Forgotten Raid Kees Rijken, Paul Schepers, Arthur G. Thorning, 2014-08-15. Operation Oyster was carried out on the 6th December 1942 by 2 Group RAF. Considered to be a notable success for the allies it cost the Germans an estimated six months of lost production time at a critical point in the conflict. It is arguable according to the authors that the operation was in fact rather more significant than Operation Chastise, the Dambuster raid, while accepting that was a remarkable feat of arms. Operation Oyster struck at the very heart of what Churchill termed the wizard war against German radio navigational technology by attacking a central hub of activity, the Philips Radio Works in Eindhoven, The Netherlands. The development of electronics in WWII was the most significant technical aspect of weaponry over the course of the conflict. On both sides there were great advances in radar and communications which at that time depended on the wide scale use of high frequency radio valves. Few companies had the technology to produce these but the leading one in Europe was Philips in Eindhoven. Thus it was determined that Philips was the most important target. Ninety-three allied aircraft took part and a total of fourteen were lost. But the result in terms of damages to the enemy was considerable, hindering the German war effort significantly and consequently aiding the allies. Despite these facts however the story of the raid has been

underreported and the efforts of the aircrew who took part have been little recognized By comparison the Dambuster raid which came six months later has entered into folklore Here for the first time the overlooked Oyster raid is afforded the attention it deserves *Air Force Combat Units of World War II* Maurer Maurer,1961 En omfattende oversigt over amerikanske flyvev benenheder flytyper m m under 2 verdenskrig og op til 1956 En opf lgning findes i World War II Combat Squadrons of the United States Air Force **National Archives and Records Service Inventory Series** United States.
