Railroad Atlas of the United States in 1946 Richard C. Jowett's Railway Atlas of Great Britain and Ireland Alan Jowett, 1989-01-01 **A Comprehensive Guide to Railway Request Stops** Anthony Hart, 2022-03-10 Rail By Request is an enthusiast's personal story and tells how the author visited photographed and spent time at every request stop on mainland Britain It also explains where his love of railways is rooted why he began this odyssey and how it became a very different and important experience to him Journeying across the whole railway map to capture these often ignored stops not just for posterity but for the journey The lure of request stops and the practicalities of completing the journey to discover them is the core of the story Researching every request stop in Britain and planning how to get there and overcoming any difficulties became a source of great satisfaction Every stop is described and has at least one illustration Some historical context to the stops is included with current statistics The story also shows how he ticked off each stop but unexpectedly found himself passing the time engaged in a form of railwayana mindfulness allowing the world to rush past whilst being alive in the moment It shows a calmer slower world does exist

The Atlas of Atlases Philip Parker, 2022-09-20 This beautiful book is a lavishly illustrated look at the most important atlases in history and the cartographers who made them. Atlases are books that changed the course of history. Pored over by rulers, explorers and adventurers, these books were used to build empires, wage wars, encourage diplomacy and nurture trade. Written by Philip Parker, an authority on the history of maps, this book brings these fascinating artefacts to life, offering a unique, lavishly illustrated guide to the history of these incredible books and the cartographers behind them. The 17th century *Klencke*, one of the world's largest books that requires 6 people to carry it. The *Rand McNally Atlas* of 1881, still in print today, and a book that turned its makers, William H. Rand and Andrew McNally, into cartographic royalty. Rails From Shrewsbury Peter J. Green, 2023-11-09 Shrewsbury station, located at the junction of the lines from Chester, Crewe, Wolverhampton, Hereford and Aberystwyth, is a busy and interesting railway center for the enthusiast. Many train movements are still controlled by semaphore signals operated from a number of signal boxes, including the largest remaining operational mechanical signal box in the world at Severn Bridge Junction. Nevertheless, modernization has been gradually sweeping away much of the railway infrastructure both at Shrewsbury and in the surrounding area, as it has been everywhere else. This book looks at Shrewsbury itself, the lines that radiate from there, and the trains that ran on them in the late twentieth and the early part of the twenty-first century. During this time period, much more general railway infrastructure and mechanical signaling was still in use, and locomotive hauled trains were abundant, using a variety of motive power, including Classes 25, 31, 33, 37 and 47. The various freight lines that saw traffic are also visited. The railway from Newport through Hereford and Shrewsbury to Chester, in particular, saw regular steam hauled special trains, a few of which are illustrated here. Preserved railways in the area are not forgotten, including the Severn Valley Railway, which once ran from Sutton Bridge Junction at Shrewsbury to Hartlebury, between Kidderminster and Droitwich Spa.

Railways in Devon and Cornwall in the Late 20th Century Peter J. Green, 2025-11-30 Devon and Cornwall have long been attractive destinations, not only for holidaymakers but also for railway enthusiasts, and it was in Devon, during a family holiday in 1959, that the author's passion for railways began. Peter started photographing railways at an early age, mainly concentrating on steam, but he made some visits to Devon in the 1970s to see the Western Class diesel hydraulics running along the coast. They were being replaced by Class 50 diesel electrics at the time. More time was spent in Devon in the 1970s and early 1980s, photographing preserved railways as well as the modern scene, and an Easter visit to Goodrington became a regular event for several years. The 1986 West of England resignalling scheme provided a good reason for a further series of visits to Devon to record the mechanical signal boxes, semaphore signalling and associated equipment before it all disappeared. The first of the author's many trips to

Cornwall was in the summer of 1984 when he spent ten days attempting to photograph the entire Cornish railway system. Although an impossible task, the Class 37s on the china clay operations as well as all the Peaks Class 47s and 50s on the main lines ensured an enjoyable time. Here, with the help of other contributors, the author has attempted to assemble a comprehensive photographic record of the railways in the two counties in the late 20th Century. **Railways in South Wales and the Central Wales Line in the Late 20th Century** Peter J. Green, 2022-12-01. In the early 1980s I began to visit South Wales on a regular basis to photograph the railway scene. At that time the collieries and steelworks were generating a lot of rail traffic with Class 37 diesels being the usual motive power. Passenger trains were in the hands of Class 47s and 37s while Peaks and Class 50s would also appear on occasion. HSTs, DMUs, Sprinters and Pacers were of course also common. As time went on, collieries closed and the coal traffic reduced, but there was always something new and interesting. Rugby Internationals at Cardiff regularly produced a number of special trains which arrived from various parts of the country, often bringing interesting motive power to the Welsh capital. The Class 37s were slowly replaced by Class 56s and later Class 60s on many duties in South Wales, but the Rhymney Valley saw Class 37 diesels working passenger trains into the twenty-first century, and on Rugby International days privately owned Class 50s were also used on occasion. I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced. This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century, covering the railways of South Wales and the Welsh section of the Central Wales line. A few photographs of the principal heritage railways in more recent times are also included. *The World's First Railway System* Mark Casson, 2009-09-10. This is the first history of the British railway system written from a modern economic perspective. It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time. The first time this has been done. *Rail Atlas; Great Britain and Ireland*. Rev. ed. S. K. Baker, 1996. [Branch Line Britain](#) Paul D. Shannon, 2023-12-30. This book examines in words and pictures the network of British branch lines and other secondary routes that survived the mass closures of the 1960s. While nearly 4 000 route miles were lost between 1963 and 1970, the cuts were less severe than they might have been. Some lines were reprieved because of their social importance, even though they would never pay their way in purely commercial terms. They included some lengthy rural routes such as those serving the Far North of Scotland, Central Wales and the Cumbrian Coast, as well as some urban backwaters such as Romford to Upminster and the St Albans Abbey branch. As the 1970s progressed, closures became scarce, but cost-cutting measures included the singling of some lines, as well as scaled-down stations and simplified signalling. Yet even today, some pockets of traditional operation survive. Mechanical signal boxes still control many hundreds of miles across the network in areas as diverse as West Cornwall, East Lincolnshire and South West Scotland. This book also celebrates several reopened and new lines, ranging from the major Borders Railway project in

Scotland to the Stansted Airport and Barking Riverside branches in South East England making the point that the branch line concept is far from dead *The Great Central Railway* John Palmer, 2021-01-30 Sets out to address what really happened through its LNER days and into British Railways custodianship A well researched and presented tome Key Model World For generations of railway enthusiasts and more lately for social historians the life and times of the former Great Central Railway and in particular its extension towards London in the 1890s and closure seventy years later have generated considerable interest and controversy Although many books have been written about the Railway the majority in recent times have concentrated upon providing a photographic record and a nostalgic look in retrospect to what was generally perceived as happier times for the route None of the books have presented the outcome from thorough research into the business aspects of the Railway and its successive private LNER and public BR ownerships through war and peace and times of industrial social and political change that influenced and shaped the demand for a railway service While retaining a strong railway theme throughout the book identifies the role played by successive governments the electricity and coal industries and the effect of social change that together resulted in a case for closure The content of the book replaces much supposition with fact and places on record what really happened The final part of the book acknowledges the fine work over half a century of volunteers dedicated to saving a section of the line in Leicestershire A valuable addition to the social and political history of railways The Railway Correspondence and Travel Society
