[We Do Not Want the Gates Closed between Us](#) Justin Gage,2020-10-08 In the 1860s and 1870s the United States government forced most western Native Americans to settle on reservations These ever shrinking pieces of

land were meant to relocate contain and separate these Native peoples isolating them from one another and from the white populations coursing through the plains We Do Not Want the Gates Closed Between Us tells the story of how Native Americans resisted this effort by building vast intertribal networks of communication threaded together by letter writing and off reservation visiting Faced with the consequences of U S colonialism the constraints population loss and destitution Native Americans far from passively accepting their fate mobilized to control their own sources of information spread and reinforce ideas and collectively discuss and mount resistance against onerous government policies Justin Gage traces these efforts drawing on extensive new evidence including more than one hundred letters written by nineteenth century Native Americans His work shows how Lakotas Cheyennes Utes Shoshones Kiowas and dozens of other western tribal nations shrewdly used the U S government s repressive education system and mechanisms of American settler colonialism notably the railroads and the Postal Service to achieve their own ends Thus Natives used literacy a primary tool of assimilation for U S policymakers to decolonize their lives much earlier than historians have noted Whereas previous histories have assumed that the Ghost Dance itself was responsible for the creation of brand new networks among western tribes this book suggests that the intertribal networks formed in the 1870s and 1880s actually facilitated the rapid dissemination of the Ghost Dance in 1889 and 1890 Documenting the evolution and operation of intertribal networking Gage demonstrates its effectiveness and recognizes for the first time how through Native activism long distance intercultural communication persisted in the colonized American West

Francaviglia, 1997-09 Working with the premise that there are much meaning and value in the repelling beauty of mining landscapes Richard Francaviglia identifies the visual clues that indicate an area has been mined and tells us how to read them showing the interconnections among all of America s major mining districts With a style as bold as the landscape he reads and with photographs to match he interprets the major forces that have shaped the architecture design and topography of mining areas Covering many different types of mining and mining locations he concludes that mining landscapes have come to symbolize the turmoil between what our society elects to view as two
