The Rainforest Legacy: Flora and fauna of the rainforests ,1987 Australian Rainforests D. M. J. S. Bowman,2000-02-17 A critical evaluation of the ecological hypotheses proposed to explain the distribution of Australian rainforests The Rainforest Legacy ,1987 Australian Rainforests Paul Adam,1992 Once the dominant vegetation type of the entire continent the Australian rainforests have shrunk over many millions of years to their present limited size However the forests and their history continue to hold valuable lessons for biogeographers and environmentalists This book gives a general account of the Australian rainforests their composition and location and how their present distribution has evolved The author s aim is to provide a broad biogeographical framework that will enable new information to be considered in a global perspective The book concludes with a historical account of human interaction with the rainforest from late Pleistocene times to the 1980s Biogeographers botanists and ecologists at all levels will find this to be a rich source of information and an inspiration for continuing efforts to conserve existing rainforests around the world Tropical Rainforest Research in Australia Nicola Goudberg,Michael Bonell,Dominique Benzaken,1991 **Australian Rainforest Seeds** Michelle Chapman,Paul Nelson,Hugh Nicholson,Mark Dunphy,Steve McAlpin,2020-02-03 Have you ever wondered how to grow your own rainforest trees Is there a beautiful tree that you have always wanted to collect and propagate the seed from Are you in the business of ecological restoration rainforest propagation or environmental education This long awaited guide to rainforest seed propagation unlocks the secrets to growing 300 rainforest species Providing specific information on how to sustainably collect process and germinate seeds this user friendly book aims to support a growing movement of rainforest restoration With invaluable information based on 30 years of research in northern New South Wales users will find even difficult rainforest species delightfully easy to grow Seeing a seed germinate caring for the seedling and eventually planting the tree is deeply satisfying And in this time of widespread deforestation millions of trees are needed for restoration and every tree counts Whether you are growing one or one hundred thousand why not start today The Flowering of Australia's Rainforests Geoff Williams,2021-05-03 The Flowering of Australia s Rainforests provides a comprehensive introduction to the pollination ecology evolution and conservation of Australian rainforest plants with particular emphasis on subtropical rainforests and their associated pollinators This significantly expanded second edition includes new information on the impact of climate change fire fragmentation and invasive species Rainforests continue to be a focus of global conservation concern not only from threats to biodiversity in general but to pollinators specifically Within Australia this has been emphasised by recent cataclysmic fire impacts ongoing extreme drought events and the wider consideration of climate change This second edition strengthens coverage of these issues beyond that of the first edition The Flowering of Australia s Rainforests makes timely contributions to our understanding of the nature and function of the world s pollinator fauna plant reproduction dependencies and the evolutionary pathway that has brought them to their current state and function

Proceedings of the conference held in Bandar Seri Begawan April 1993 *Peopled Landscapes* Simon Haberle,Bruno David,2012-01-01 This volume brings together a collection of papers from a diverse field of international scholars exploring the multiple ways that East Timorese communities are making and remaking their connections to land and places of ancestral significance The work is explicitly comparative and highlights the different ways Timorese language communities negotiate access and transactions in land disputes and inheritance especially in areas subject to historical displacement and resettlement Consideration is extended to the role of ritual performance and social alliance for inscribing connection and entitlement Emerging through analysis is an appreciation of how relations to land articulated in origin discourses are implicated in the construction of national culture and differential contributions to the struggle for independence Publisher s description

Phytochemistry of Australia's Tropical Rainforest Cheryll J. Williams,2021-12-01 Rare unique and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem Australia s ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine *Phytochemistry of Australia s Tropical Rainforest* is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics analgesics steroids antimalarials and more It provides an insight into the habitat ecology and family associations of hundreds of species and explores their future therapeutic potential alongside phytochemical studies of the ancient plant lineages Toxicological evaluations of important poisonous plants are also included Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth many of which are illustrated in this book This comprehensive work is an essential reference for phytochemists ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential **Journal of the Royal Society of New Zealand** ,1993-12 **The Invertebrate**

World of Australia's Subtropical Rainforests Geoff Williams,2020-09-01 *The Invertebrate World of Australia s Subtropical Rainforests* is a comprehensive review of Australia s Gondwanan rainforest invertebrate fauna covering its taxonomy distribution biogeography fossil history plant community and insect plant relationships This is the first work to document the invertebrate diversity of this biologically important region as well as explain the uniqueness and importance of the organisms This book examines invertebrates within the context of the plant world that they are dependent on and offers an understanding of Australia s outstanding but still largely unknown subtropical rainforests All major and many minor invertebrate taxa are described and the book includes a section of colour photos of distinctive species There is also a strong emphasis on plant and habitat associations and fragmentation impacts as well as a focus on the regionally inclusive

Bradstock, Jann E. Williams, Malcolm A. Gill, 2002 Fire is pivotal to the functioning of ecosystems in Australia affecting the distribution and abundance of the continent s unique and highly diverse range of plants and animals Conservation of this natural biodiversity therefore requires a good understanding of scientific processes involved in the action of fire on the landscape This book provides an up to date synthesis of current knowledge in this area and its application in contemporary land management Central to the discussion is an exploration of the concept of the fire regime and its interactions with biodiversity **Australian Palms** John L. Dowe, 2010 An updated and thorough systematic and taxonomic treatment of the Australian palm flora covering 60 species in 21 genera Author from James Cook University Australia **Tropical Forest Conservation and Development** Jean Albrecht, 1993 **Flying Foxes** Leslie S. Hall, Gregory Richards, 2000 Sometimes kept as family pets flying foxes are much beloved in Australia This work covers issues such as descriptions of Australia s 13 species of flying foxes and blossom bats their physiology of flight ecology diet and behaviour and management of populations Patterns and Processes in Forest Landscapes Raffaele Laforzezza, Jiquan Chen, Giovanni Sanesi, Thomas R. Crow, 2008-08-30 Increasing evidence suggests that the composition and spatial configuration the pattern of forest landscapes affect many ecological processes including the movement and persistence of particular species the susceptibility and spread of disturbances such as fires or pest outbreaks and the redistribution of

matter and nutrients Understanding these issues is key to the successful management of complex multifunctional forest landscapes and landscape ecology based on a foundation of island biogeography and meta population dynamic theories provides the rationale to deal with this pattern to process interaction at different spatial and temporal scales This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management It provides key insights into some of the applicable landscape ecological theories that underlie forest management with a specific focus on how forest management can benefit from landscape ecology and how landscape ecology can be advanced by tackling challenging problems in forest landscape management It also presents a series of case studies from Europe Asia North America Africa and Australia exploring the issues of disturbance diversity management and scale and with a specific focus on how human intervention affects forest landscapes and in turn how landscapes influence humans and their culture An important reference for advanced students and researchers in landscape ecology conservation biology forest ecology natural resource management and ecology across multiple scales the book will also appeal to researchers and practitioners in reserve design ecological restoration forest management landscape planning and landscape architecture
