Woodrow Barfield, Marc Jonathan Blitz

Real Rules:

The Theory of Rules Karl N. Llewellyn, 2011-04 Karl N Llewellyn was one of the founders and major figures of legal realism and his many keen insights have a central place in American law and legal understanding Key to Llewellyn's thinking was his conception of rules put forward in his numerous writings and most famously in his often mischaracterized declaration that they are pretty playthings Previously unpublished *The Theory of Rules* is the most cogent presentation of his profound and insightful thinking about the life of rules This book frames the development of Llewellyn's thinking and describes the difference between what rules literally prescribe and what is actually done with the gap explained by a complex array of practices conventions professional skills and idiosyncrasies most of which are devoted to achieving a law's larger purpose rather than merely following the letter of a particular rule Edited annotated and with an extensive analytic introduction by leading contemporary legal scholar Frederick Schauer this rediscovered work contains material not found elsewhere in Llewellyn's writings and will prove a valuable contribution to the existing literature on legal realism *Advances in Rule Interchange and Applications* Adrian Paschke, Yevgen Biletskiy, 2007-11-15 This book constitutes the refereed proceedings of the International RuleML Symposium on Rule Interchange and Applications RuleML 2007 held in Orlando Florida October 2007 The papers are organized in topical sections on Business Process Policy and IT Service Management and Modeling Rule Languages and Interchange Standards Business Rules Rule Engines and Applications RuleML 2007 Challenge Rules Reasoning and Ontologies and Reaction Rules and Rule Applications **Educating Oneself in Public** Michael S. Moore, 2000 The eleven essays in *Educating Oneself in Public* Critical Essays in Jurisprudence constitute an education in the Anglo American jurisprudence of the second half of the twentieth century The book examines both the thought of major figures such as H L A Hart Joseph Raz Ronald Dworkin Lon Fuller and Richard Rorty and the general themes of major movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart's conception of a general jurisprudence that describes law in general Dworkin's conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller's ideal of a functional jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz's idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis's conception of the common good as the function law uniquely serves in what sense law practice and legal theory are interpretive activities whether all knowledge or some discrete realm of knowledge is peculiarly interpretive in character Michael Moore's views on each of these topics are detailed and original even if the springboards for each discussion are the writings of those who introduced such topics into modern discussions The introductory chapter includes

responses by many of the figures examined in the other essays together with the author's rejoinders

implementation A complete set of standard templates for rule statements and their component syntactic elements A rigorous approach to rule statement construction to avoid ambiguity and ensure consistency A clear explanation of the way in which a fact model provides and constrains the rule statement vocabulary A practical reader friendly user guide to the those parts of the SBVR specification that are relevant to rule authoring Flexible Software Design Bruce Johnson,Walter W.

Woolfolk,Robert Miller,Cindy Johnson,2005-06-17 A developer s knowledge of a computing system s requirements is necessarily imperfect because organizations change Many requirements lie in the future and are unknowable at the time the system is designed and built To avoid burdensome maintenance costs developers must therefore rely on a system s ability to change gracefully its flexibility Flex *Mechanical Choices* Michael S. Moore,2020-05-08 Mechanical Choices details the intimate connection that exists between morality and law the morality we use to blame others for their misdeeds and the criminal law that punishes them for these misdeeds This book shows how both law and morality presuppose the accuracy of common sense a centuries old psychology that defines people as rational agents who make honorable choices and act for just reasons It then shows how neuroscience is commonly taken to challenge these fundamental psychological assumptions Such challenges four in number are distinguished from each other by the different neuroscientific facts from which they arise the fact that human choices are caused by brain events the fact that those choices don t cause the actions that are their objects but are only epiphenomenal to those choices the fact that those choices are identical to certain physical events in the brain and the fact that human subjects are quite fallible in their knowledge of what they are doing and why The body of this book shows how such challenges are either based on faulty facts or misconceived as to the relevance of such facts to responsibility The book ends with a detailed examination of the neuroscience of addiction an examination which illustrates how neuroscience can help rather than challenge both law and morality in their quest to accurately define excuses from responsibility Personal Property Law of the State of New York Robert Ludlow Fowler,1909
