Realism Rationalism And Scientific Method:

Realism, Rationalism and Scientific Method: Volume 1 Paul K. Feyerabend, 1981-10-29 Over the past thirty years Paul Feyerabend has developed an extremely distinctive and influential approach to problems in the philosophy of science. The most important and seminal of his published essays are collected here in two volumes with new introductions to provide an overview and historical perspective on the discussions of each part. Volume 1 presents papers on the interpretation of scientific theories together with papers applying the views developed to particular problems in philosophy and physics. The essays in volume 2 examine the origin and history of an abstract rationalism as well as its consequences for the philosophy of science and methods of scientific research. Professor Feyerabend argues with great force and imagination for a comprehensive and opportunistic pluralism. In doing so he draws on extensive knowledge of scientific history and practice and he is alert always to the wider philosophical practical and political implications of conflicting views. These two volumes fully display the variety of his ideas and confirm the originality and significance of his work. *Realism, Rationalism and Scientific Method* Paul Feyerabend, 1986

Schuster, R.R. Yeo, 2012-12-06 The institutionalization of History and Philosophy of Science as a distinct field of scholarly endeavour began comparatively early though not always under that name in the Australasian region. An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 1960s similar to that which took place in other parts of the world. Today there are major Departments at the University of Melbourne, the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand. Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history philosophy and social studies of science Each volume comprises a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area Papers address general issues however rather than local ones parochial topics are avoided Further more though in each volume a majority of the contributors is from Australia or New Zealand contributions from elsewhere are by no means ruled out Quite the reverse in fact they are actively encouraged wherever appropriate to the balance of the volume in question

Kindi, Theodore Arabatzis, 2013-05-20 The year 2012 marks the 50th anniversary of the publication of Thomas S Kuhn's The Structure of Scientific Revolutions Up until recently the book's philosophical reception has been shaped for the most part by the debates and the climate in philosophy of science in the 1960s and 1970s this new collection of essays takes a renewed look at this work This volume concentrates on particular issues addressed or raised in light of recent scholarship and without the pressure of the immediate concerns scholars had at the time of the Structure's publication There has been extensive research on all of the major issues concerning the development of science which are discussed in Structure work in which the scholars contributing to this volume have all been actively involved In recent years they have pursued novel research on a number of topics relevant to Structure's concerns such as the nature and function of concepts the complexity of logical positivism and its legacy the relation of history to philosophy of science the character of scientific progress and rationality and scientific realism all of which are brought together and given new light in this text In this way our book makes new connections and undertakes new approaches in an effort to understand the Structure's significance in the canon of philosophy of science
