Reality Of Aid 199697:

ACFOA Development Dossier, 1996 **The East Timor Question** Stephen McCloskey, Paul Hainsworth, 2000-08-11
Originally colonized by the Portuguese East Timor was brutally invaded and occupied by Indonesian military forces in 1975 According to the UN this resulted in the death of about a third of the population through massacres starvation and disease Subsequent events in Indonesia however have given rise to expectations of a fundamental change in its position on East Timor Considering the potential for change against a backdrop of growing popular and political support for the Timorese cause this book addresses its emergence as an issue of global importance The authors set out to show how local grassroots individual organizational and campaign initiatives have contributed to this state of affairs in the context of an increased international relations emphasis on ethics international morality and human rights The Reality of Aid, 1996-97 Tony German, Judith Randel, 1996 This work provides an evaluation of the aid policies of the major donors and their effectiveness in fulfilling their official purpose of relieving poverty and assisting development It concentrates on small scale community based projects analyzing the performance of 24 major donors Will to Live João Biehl, 2021-10-12 Will to Live tells how Brazil against all odds became the first developing country to universalize access to life saving AIDS therapies a breakthrough made possible by an unexpected alliance of activists government reformers development agencies and the pharmaceutical industry But anthropologist João Biehl also tells why this policy hailed as a model worldwide has been so difficult to implement among poor Brazilians with HIV AIDS who are often stigmatized as noncompliant or untreatable becoming invisible to the public More broadly Biehl examines the political economy of pharmaceuticals that lies behind large scale treatment rollouts revealing the possibilities and inequalities that come with a magic bullet approach to health care By moving back and forth between the institutions shaping the Brazilian response to AIDS and the people affected by the disease Biehl has created a book of unusual vividness scope and detail At the core of Will to Live is a group of AIDS patients unemployed homeless involved with prostitution and drugs that established a makeshift health service Biehl chronicled the personal lives of these people for over ten years and Torben Eskerod represents them here in more than one hundred stark photographs Ethnography social medicine and art merge in this unique book illuminating the care and agency needed to extend life amid perennial violence Full of lessons for the future Will to Live promises to have a lasting influence in the social sciences and in the theory and practice of global public health *EU development cooperation* Karin Arts, Anna Dickson, Anna K. Dickson, 2018-07-30 It is increasingly recognised that EU development cooperation policy has failed to meet its stated aims In this book Arts and Dickson ask the obvious and important question if the policy doesn't work why bother with it The authors assess why EU development policy has become largely ineffective citing among the external causal factors the liberalisation of trade and the growing influence of US and international actors such as the World Bank and the International Monetary Fund upon EU policy It also considers contributing factors within the EU such as the enlargement of

its membership and the resulting shifts in priorities It is this analysis of internal and external factors affecting the decline of EU development policy that makes this study both innovative and unique It brings together an impressive range of contributors from different disciplines resulting in a thorough and intelligent assessment of the debate This study will appeal to advanced level undergraduates and academics of European politics in general EU integration development studies and International Relations An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence

Access to Justice in Africa and Beyond, 2007 Regional and Global Regulation of International Trade Francis Snyder, 2002-07-05 The processes of legal and economic integration at a regional and global scale have created powerful legal and economic dilemmas They challenge the paradigms of constitutionalism including the State's monopoly of constitutionalism the autonomy of national political communities and the traditional forms of participation and representation The phenomena of globalisation and regional forms of governance have promoted the inter dependence of national political communities and destroyed the artificial boundaries upon which national constitutional democracies are found and from which they derive their legitimacy Furthermore it is inevitable that the development of international trade and economic integration will raise claims for some form of global distributive justice to complement the wealth maximisation arising from free trade This will come from the gradual development of global forms of political discourse and law making challenging State constitutionalism and requiring some of the instruments and theories of constitutionalism The essays in this collection written by leading scholars in international trade law argue the pros and cons of greater regional and global regulation They conclude that whatever the final framework for international trade the critical decisions about institutional form and content will be decided in an emerging global political arena They help to identify this political arena who governs it and according to which rules and identify the different institutional alternatives in that global political arena *Japan's Official Development Assistance* Japón. Ministerio de Relaciones Exteriores, 2001 **HIV/AIDS Resources** Marion L. Peterson, 1995 New Labour, New Hope? Paul Whittingham, 1998 **Stakeholders** Ian Smillie, 2013-11-05 This unique study from the OECD Development Centre presents a comprehensive review by independent experts of the relationships and division of responsibility between the 22 member governments of the OECD Development Assistance Committee DAC and NGOs from these donor countries working in international development Additional chapters cover the roles of the European Union and the World Bank Among other themes the book looks at two very significant issues First at the way in which an overemphasis on evaluation may be leading NGOs to focus purely on measuring their output thus choosing activities which are easily accountable Second it examines the important impacts of the evolution in the funding relationship between governments and NGOs from matching grants to contracts where NGOs must increasingly compete for contracts *Global Institutions and the HIV/AIDS Epidemic* Franklyn Lisk, 2009-09-10 Lisk examines the different perspectives of the global response to HIV AIDS and the role of the different global institutions multilateral public and private involved including their impact on

outcomes **The Business of Higher Education** John C. Knapp Ph.D., David J. Siegel, 2009-10-22 At a time of great economic uncertainty The Business of Higher Education looks at the pros and cons of colleges and universities taking a more business like approach to fulfilling their missions How can colleges and universities navigate their way between shrinking commitments and the increasing expectations of their students Does the answer lie in taking a more business like approach This extraordinary resource considers the costs and benefits to both public and private institutions and to society when academe embraces business models for improving cost efficiency marketing hiring practices and customer service Bringing together a diverse team of contributors from the academic and business worlds The Business of Higher Education offers 35 essays in three volumes The first volume explores issues of leadership and culture the second focuses on management and fiscal strategies and the third volume takes up issues of marketing and consumer interests Throughout the work balances the contrasting perspectives of those within the academy and those outside of it as it considers whether higher education and the public interest are ultimately helped or harmed by the application of business methods to essential academic functions

Nation Today , 1992 Africa Research Bulletin , 1996 The National Indigenous Australians' Sexual Health Strategy 1996-97 to 1998-99 Australia, 1997 **AIDS Sexuality and Gender in Africa** Carolyn Baylies, Janet Bujra, 2002-09-11 While there is a growing list of publications devoted to the AIDS epidemic Africa with two thirds of the world s cases still receives scant attention This book may change the way we think about AIDS and how it is being addressed in Africa and the rest of the world The book draws on first hand research and in depth investigations carried out by a team of researchers from Britain Zambia and Tanzania and focuses on the gendered aspect of the struggle against AIDS The authors study the severity of the epidemic and the threat it poses to the population and society in Tanzania and Zambia They argue that the success of strategies against the spread of AIDS in Africa rests on their recognition of existing gendered power relations and that this success might be enhanced if the strategies are built on existing organisational skills and practices especially among women Their conclusions have repercussions for all countries around the world and especially the rest of Africa *Canadian Development Report, 1996-97* North-South Institute (Ottawa, Ont.), 1996
