Bessant, 2018-04-10 Theoretical and philosophical work on community has yielded multifold definitions and analytical frameworks Kenneth C Bessant reflects on the inherent complexity and diversity of this deeply intersubjective aspect of lived social experience He explores the relational underpinnings of early and more contemporary approaches to the study of community with a particular emphasis on their core assumptions concepts and tenets Each of these perspectives offers a relatively distinct interpretation of community while also revealing the intrinsically relational fabric of its perpetual emergence dynamism and transformation The being with of relational social existence is the fundamental basis upon which all conceptions of community are built and this is the epicenter around which the book revolves Community is born of exists within and brings forth social relations It is a living expression of relational willing thinking and acting *Voluntas Militum: Community, Collective Action, and Popular Power in the Armies of the Middle*

Republic (300-100 BCE) Dominic M. Machado, 2023-06-20 Scholars military men and casual observers alike have devoted significant energy to understanding how the armies of the Roman Middle Republic 300 100 BCE were able to function so effectively examining their organization hierarchy recruitment tactics and ideology in close detail But what about the concerns interests and goals of the soldiers who powered it The present study argues that the military forces of the Middle Republic were not simply cogs in the Roman military machine but rather dynamic and diverse social units that played a key role in shaping an ever changing Mediterranean world Indeed the soldiers in the armies of this period not only developed connections with one another but also formed bonds with non military personnel who traveled with as well as inhabitants of the places where they campaigned The connections soldiers developed while on campaign gave them significant power and agency as a group Throughout the third and second centuries BCE soldiers took collective actions ranging from mutiny to defection to looting to ensure that their economic social and political interests were advanced and protected Recognizing the communities that Roman soldiers formed and the power that they exerted not only reframes our understanding of the Middle Republic and its armies but fundamentally alters how we conceptualize the turbulent years of the Late Republic and the massive social political and military changes that followed

Community Identity and Archaeology Naoise Mac Sweeney, 2011-10-25 Community Identity and Archaeology explores the concept of community identity and its application in archaeology using the modern Turkish sites of Aphrodisias and Beycesultan as case studies to illustrate the formation and dissolution of communities over time The concept of the community is vital to the way we understand human societies both past and present and the last decade has seen widespread interest in communities from both the popular and academic spheres The concept is also central to archaeology where the relationship between sites and communities remains controversial Naoise Mac Sweeney aims to take the debate one step further setting out a comprehensive framework for the archaeological investigation of community identity encompassing theoretical approaches for its conceptualization practical methodologies for its investigation and detailed case studies in Anatolia to test and illustrate its arguments This book contributes to discussions in archaeological theory and material culture studies and is particularly relevant to archaeologists working on different types of cultural identity Community Identity and Archaeology's readership will include undergraduate and graduate students as well as academic specialists In addition the book contains material of direct historical interest for Classics and Near Eastern departments It includes valuable new research relevant for those working on Aegean Mycenaean or Early Greek antiquity as well as specialists in Anatolia including scholars working on the Hittite Phrygian and Lydian empires

Music Making Community Tony Perman, Stefan Fiol, 2024-05-21 Making music offers enormous possibilities and faces significant limitations in its power to generate belonging and advance social justice Tony Perman and Stefan Fiol edit essays focused on the forms of interplay between music making and community making as mutually creative processes Contributors in the first section look at cases where music arrived in settings with little or no sense of community and formed

social bonds that lasted beyond its departure In the sections that follow the essayists turn to stable communities that used musical forms to address social needs and both forged new social groups and in some cases splintered established communities By centering the value of difference in productive feedback dynamics of music and community while asserting the need for mutual moral indebtedness they foreground music s potential to transform community for the better
