Reason and Conduct Henry David Aiken, 1962      **Morality Truly Christian, Truly African** Paulinus Ikechukwu Odozor C.S.Sp., 2014-11-15 Given the largely Eurocentric nature of moral theology in the history of the Roman Catholic Church what will it take to invest the theological community in the history and moral challenges of the Church in other parts of the world especially Africa What is to be gained for the whole Church when this happens in a deep and lasting way In this timely and important study Paulinus Ikechukwu Odozor brings greater theological clarity to the issue of the relationship between Christianity and African tradition in the area of ethical foundations He also provides a constructive example of what fundamental moral theology done from an African and Christian especially Catholic moral theological point of view could look like Following a brief history of the development of African Christian theology Odozor examines responses of African theologians to African tradition and Christian responses to the reality of non Christian religions In a context where the African religious experience and heritage are powerful sources of meaning and identity Christian evangelization raises questions both about the African primal religions and about Christianity itself and its claims Odozor takes up the subject of moral reasoning in an African Christian theological ethics and concludes with case studies that show how the African Church has tried to inculturate moral discourse on a religiously pluralistic continent and relate the healing gospel message to African situations Students and scholars of moral theology and ethics and church leaders will profit from the issues raised in *Morality Truly Christian Truly African*      *Interpretations of Conflict* Richard B. Miller, 1991-11-15 Miller brings together the opposed traditions of pacifism and just war theory and puts them into a much needed dialogue on the ethics of war Publisher

Jonsen, 2003-08-28 Bioethics represents a dramatic revision of the centuries old professional ethics that governed the behavior of physicians and their relationships with patients This venerable ethics code was challenged in the years after World War II by the remarkable advances in the biomedical sciences and medicine that raised questions about the definition of death the use of life support systems organ transplantation and reproductive interventions In response philosophers and theologians lawyers and social scientists joined together with physicians and scientists to rethink and revise the old standards Governments established commissions to recommend policies Courts heard arguments and legislatures passed laws This book is the first broad history of the growing field of bioethics Covering the period 1947 1987 it examines the origin and evolution of the debates over human experimentation genetic engineering organ transplantation termination of life sustaining treatment and new reproductive technologies It assesses the contributions of philosophy theology law and the social sciences to the expanding discourse of bioethics Written by one of the field s founders The Birth of Bioethics is based on extensive archival research into sources that are difficult to obtain and on interviews with many of the leading figures in the moral debates in medicine A very readable and comprehensive account of the evolution of bioethics this book stresses the history of ideas but does not neglect the social and cultural context and the people involved It will serve the information needs of philosophers ethicists social historians and everyone interested in the origins of some of today s most hotly debated issues      *A Modern Introduction to Philosophy* Paul Edwards, Arthur Pap, 1965      **Reconstructing Public Philosophy** William M.
