Unsteady Aerodynamics, Aeroacoustics, and Aeroelasticity of Turbomachines and Propellers H.M. Atassi, 2012-12-06 The first International Symposium on Unsteady Aerodynamics and Aeroelasticity of Turbomachines was held in Paris in 1976 and was followed by symposia at Lausanne in 1980 Cambridge in 1984 Aachen in 1987 Beijing in 1989 and Notre Dame in 1991 The proceedings published following these symposia have become recognized both as basic reference texts in the subject area and as useful guides to progress in the field It is hoped that this volume which represents the proceedings of the Sixth International Symposium on Unsteady Aerodynamics of Turbomachines will continue that tradition Interest in the unsteady aerodynamics aeroacoustics and aeroelasticity of turbomachines has been growing rapidly since the Paris symposium This expanded interest is reflected by a significant increase in the numbers of contributed papers

and symposium participants The timeliness of the topics has always been an essential objective of these symposia Another important objective is to promote an international exchange between scientists and engineers from universities government agencies and industry on the fascinating phenomena of unsteady turbomachine flows and how they affect the aeroelastic stability of the blading system and cause the radiation of unwanted noise This exchange acts as a catalyst for the development of new analytical and numerical models along with carefully designed experiments to help understand the behavior of such systems and to develop predictive tools for engineering applications
