Defence Management ,2003 Generational Tensions and Solidarity Within Advanced Welfare States Asgeir

Falch-Eriksen, Marianne Takle, Britt Slagsvold, 2021-09-12 This book explores generation as both a reference to family or kinship structures and a reference to cohorts or age sets. The principal objective is branching out this two part concept through studies of tensions and solidarity within and between generations of advanced and robust welfare states. Answering key questions using multiple disciplinary approaches the book considers how generations challenge advanced and robust welfare states how new and young generations are affected by living in an advanced welfare state with older generations how tensions or solidarity are understood when facing challenges and what the key characteristics are of certain generation types. It contributes to the development of a more comprehensive generation approach within social sciences by developing the concept of generation by exploring different challenges to the welfare state such as migration digitalization environmental damages demands for sustainability and marginalization. Highlighting the escalating tensions and altered versions of solidarity between generations this book shows how a comprehensive concept of a generation can create new insights into how we collectively coordinate and resolve challenges through the welfare state. It will be of interest to all scholars and students of social policy sociology political science and social anthropology CORPORATE CONFLICT

MANAGEMENT EIRENE LEELA ROUT, NELSON OMIKO, 2007-08-07 The classic view on conflict has always been that conflict in any form is harmful and should be avoided at all cost. However modern scholars and the corporate world at large are fast realizing that conflict is not as lethal as considered to be and if maintained within certain parameters it can actually boost a company's growth. This text tells exactly how and when a conflict can be translated into a successful process and when it should be checked before it spells trouble for the company. The book covers cases from all the essential areas of conflict and analytically discusses every aspect while striking a clear balance between theory concept and application. This book is an attempt to expose readers to varied perspectives to challenge their individual positions and ideologies and to inspire inform and train them in the field. The volume is designed for the postgraduate students of management as well as those pursuing similar professional courses. Besides professionals and anyone keen on learning the various aspects of conflict and its management will find this book immensely useful. **KEY FEATURES** Cartoons and illustrations throughout the text to make it an interesting read. Focus on both skill development and practical usage. The impact and effectiveness of ministerial reshuffles Great Britain: Parliament: House of Commons: Political and Constitutional Reform Committee, 2013-06-14 Reshuffles are damaging to the effectiveness of individual Ministers and of Government as a whole They also hinder Parliament's ability to hold Government to account Every time there is a reshuffle it is preceded by months of speculation about who will move where which in itself causes a kind of paralysis within Government The Committee calls for Secretaries of State to be left in post for the length of a Parliament Taken together with the advent of fixed term Parliaments this should enable them to make a real difference Some reshuffling of ministers is inevitable because of resignations and illness but reshuffles have become a habit in the UK The majority of the Committee concluded that there should be a specific Minister in the Cabinet Office who is responsible for ministerial development He or she should oversee ministerial training and appraisal There should also be compulsory training for all new Ministers continuous professional development for experienced Ministers and basic ministerial training for shadow Ministers in the 12 months before the expected date of a general election Outgoing Ministers should handover directly to their successors rather than relying exclusively on the civil service to conduct handovers

Bloom, Brian Farragher, 2010-10-28 For the last thirty years the nation's mental health and social service systems have been under relentless assault with dramatically rising costs and the fragmentation of service delivery rendering them incapable of ensuring the safety security and recovery of their clients The resulting organizational trauma both mirrors and magnifies the trauma related problems their clients seek relief from Just as the lives of people exposed to chronic trauma and abuse become organized around the traumatic experience so too have our social service systems become organized around the recurrent stress of trying to do more under greater pressure they become crisis oriented authoritarian disempowered and demoralized often living in the present moment haunted by the past and unable to plan for the future Complex interactions among traumatized clients stressed staff pressured organizations and a social and economic climate that is often hostile to recovery efforts recreate the very experiences that have proven so toxic to clients in the first place Healing is possible for these clients if they enter helping protective environments yet toxic stress has destroyed the sanctuary that our systems are designed to provide This thoughtful impassioned critique of business as usual begins to outline a vision for transforming our mental health and social service systems Linking trauma theory to organizational function *Destroying Sanctuary* provides a framework for creating truly trauma informed services The organizational change method that has become known as the Sanctuary Model lays the groundwork for establishing safe havens for individual and organizational recovery The goals are practical improve clinical outcomes increase staff satisfaction and health increase leadership competence and develop a technology for creating and sustaining healthier systems Only in this way can our mental health and social service systems
