Military Origins Of Industrialization And International Trade Rivalry:

The Military Origins of Industrialisation and International Trade Rivalry Gautam Sen, 1984 *American Hegemony and World Oil* Simon Bromley, 1991 This volume provides a new theoretical framework for understanding both the development of the international oil industry and the role played by oil in the emergence of US postwar hegemony As such it directly addresses contemporary developments in international relations theory and the recent debates over the character and longevity of United States hegemony While providing a narrative account of the oil industry from its origins in the nineteenth century through to the present the main focus of *American Hegemony and World Oil* is an analytic treatment of the postwar period Drawing widely on political economy international relations and the recent literature on the state the book offers a comprehensive study of the connections between United States hegemony and the international oil industry The book begins with a critical discussion of theoretical approaches in political economy international relations and state theory which have informed discussions of the oil industry Bromley goes on to survey the early emergence of the industry and its interwar consolidation the ordering of the postwar industry under United States leadership and the crisis of the 1970s The book ends with an examination of the post OPEC restructuring and the current strategies of the US Japan Europe OPEC and the USSR This book will be of interest to students of political economy international relations and political sociology

Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making Raimo Väyrynen, 2023-01-03 This book provides a broad overview of Professor Raimo Väyrynen's academic work his role in international research organizations and his contributions to policy debates It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces Väyrynen has dealt with the changing agenda of peace and international relations security and the arms race and the world economy This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations It argues that while states even smaller ones still matter transnational issues are increasingly important Taking a historical perspective the articles suggest that large scale violence and arms races have been recurrent and cyclical phenomena in international relations These events reflect the deep seated inequalities in the political and economic systems which moreover vary considerably between regions The publication is important reading for any researcher as well as students policy makers and the science oriented public at large Traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces Provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare Argues that large scale violence and the arms race have been recurrent and cyclical phenomena in international relations Reviews important political issues from peace and conflict in Europe to the changing power relationship in the world Exceptionalism and Industrialisation Leandro

Prados de la Escosura,2004-06-17 This 2004 book explores the question of British exceptionalism in the period from the Glorious Revolution to the Congress of Vienna Leading historians examine why Great Britain emerged from years of sustained competition with its European rivals in a discernible position of hegemony in the domains of naval power empire global commerce agricultural efficiency industrial production fiscal capacity and advanced technology They deal with Britain s unique path to industrial revolution and distinguish four themes on the interactions between its emergence as a great power and as the first industrial nation First they highlight growth and industrial change the interconnections between agriculture foreign trade and industrialisation Second they examine technological change and especially Britain s unusual inventiveness Third they study her institutions and their role in facilitating economic growth Fourth and finally they explore British military and naval supremacy showing how this was achieved and how it contributed to Britain s economic supremacy

The End of the "Asian Model"? Holger Henke,Ian Boxill,2000-03-15 With the economic crisis in Asia which unfolded in recent years the development model on which the phenomenal earlier success of several countries in the region was built requires increasing scrutiny This anthology questions the validity of the notion promoted by some observers and international financial organizations that there is a universally applicable model of industrialization common to Asian countries A number of senior and highly regarded Asia specialists are taking a critical look at the various development experiences of several and some often neglected Asian countries and evaluate their experiences in a comparative perspective Comparing the analyses of countries such as Mongolia the Pacific Islands or Sri Lanka with Singapore South Korea and other countries of the region leads the editors of this volume to the conclusion that the fashionable talk about a model is not justified and that the picture is much more complex

A Radical Green Political Theory Alan Carter,2013-12-16 This volume is the first systematic comprehensive and cogent environmental political philosophy It exposes the relationships between the ever worsening environmental crises the nature of prevailing economic structures and the role of the modern state and concludes that the combination of these factors is driving humanity towards destruction Innovative provocative and cutting edge *A Radical Green Political Theory* will be of enormous value to all those with an interest in the environment political theory and moral and political philosophy

Reluctant Cold Warriors Vladimir Kontorovich,2019-09-02 Scholars attribute the collapse of the Soviet Union in part to the militarization of its economy But during the Cold War economic studies of the USSR largely neglected the military sector of the Soviet economy its dominant and most successful part This is all the more puzzling in that academic study of the Soviet economy in the US was specifically created to help fight the Cold War If the rival superpower maintained the peacetime war economy why did experts fail to tell us when it mattered Vladimir Kontorovich shows how Western economists came up with strained non military interpretations of several important aspects of the Soviet economy which the Soviets themselves acknowledged to have military significance Such civilianization suggests that the neglect of the military sector was not forced on scholars of the Soviet economy by secrecy it was their choice The

explanation of this choice in *Reluctant Cold Warriors* raises many questions about the internal workings of economic Sovietology and its intellectual and political background Are peripheral academic fields mimicking the agenda of the discipline s mainstream more likely to produce faulty scholarship Did the search for the essence of socialism distract researchers from the actual Soviet economy Were economic Sovietologists under political pressure and if so in what direction This book answers these questions in a way that has broad relevance for national security uses of social science today

States and Markets Susan Strange,1998-04-30 An Introduction to International Political Economy Susan Strange formerly University of Warwick Professor Strange was well known for her unorthodox and stimulating views on the international political economy Here she provides the student and scholar with a new model synthesising politics and economics by means of a four faceted structural analysis of the effects of any kind of political authority including states on markets and conversely of market forces on states This refreshingly new framework of analysis is an ideal introductory text

Development in Nigeria Edlyne Eze Anugwom,2020-04-13 This book unravels the trajectories and dilemmas of development in Nigeria since its independence in 1960 Despite enormous human and material resources development progress in Nigeria has not met expectations By delving into the various factors that have influenced development efforts and initiatives Development in Nigeria Promise on Hold aims to draw out lessons to help the country to achieve its potential In many ways Nigeria typifies the African puzzle of near misses a never ending drive towards development with enormous promise but no real practical output As in many states within Africa these failures can be traced to structural inadequacies and the perennial weakness of public institutions Problems which collectively undermine sustainable development and growth include political corruption ethnicity failure of public institutions distributional injustice fiscal centralism in a purported federal state faulty democratic traditions malevolent elite class religious and social conflicts among others By taking a comprehensive panoramic overview of the country s historical experience as both a military dictatorship and democracy Edlyne Eze Anugwom presents a nuanced comprehensive and contemporary interrogation of the ever dynamic forces and factors in Nigeria s development project This book s incisive examination of Nigeria s development aspirations over time will be of interest to students of Development and African Studies as well as to practitioners and multilateral agencies involved in development planning and intervention in Nigeria who are looking for strategies for overcoming the challenges facing the country

Caribbean Political Economy at the Crossroads D. Marshall,1998-09-23 There are a variety of crisis symptoms confronting the Commonwealth Caribbean as the 21st century dawns Global changes are quickly rendering the region s traditional economic platform obsolete This book suggests however that the expanding NAFTA or the hemispheric turn towards bloc formation can offer a way out for the Caribbean Politics must be brought back into the regionalisation process for each island government is witnessing the narrowing of the range of its state power by powerful TNCs international financial institutions Washington interests and corporate backed WTO commissions *Industrialisation*

in the Non-Western World Tom Kemp, 2014-01-14 This new edition is fully updated and revised incorporating the massive changes in the USSR and China in the 1980 s It offers a series of case studies charting the progress and assessing the achievement of six industrializing countries outside the Western World It covers the whole range of economic approaches from those depending wholly on market forces to those that are completely planned *State, Society and International Relations in Asia* Mehdi Parvizi Amineh, 2010 In this timely volume M Parvizi Amineh brings together a multitude of studies of modern Asian postcolonial states and societies This part of the world has undergone major transitions over the past decade and is quickly becoming a major player in international policy and the global economy Grounded in the most recent scholarship *State Society and International Relations in Asia* covers several large scale global concerns including nationalism democratization corruption religious tension globalization and regionalization *Nutrition and Economic Development in the Eighteenth-Century Habsburg Monarchy* John Komlos, 2014-07-14 John Komlos examines the industrial expansion of Austria from a fresh viewpoint and develops a new model for the industrial revolution By integrating recent advances in the study of human biology and nutrition as they relate to physical stature population growth and levels of economic development he reveals an intense Malthusian crisis in the Habsburg lands during the second half of the eighteenth century At that time food shortages brought about by the accelerated population growth of the 1730s forced the government to adopt a reform program that opened the way for the beginning of the industrial revolution in Austria and in the Czech Crownlands Comparing this Austrian model of economic growth to the industrial revolution in Britain Komlos argues that the model is general enough to explain demographic and economic growth elsewhere in Europe despite obvious regional differences The main feature of the model is the interplay between a persistent even if small tendency to accumulate capital and a population with an underlying tendency to grow in numbers while remaining subject to Malthusian checks particularly a limited availability of food According to Komlos modern economic growth in Europe began when the food constraint was finally lifted Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Emergence of the Global Political Economy** William Thompson, 2002-11-01 The Emergence of the Global Political Economy challenges the assumption that the international political economy is a recent phenomenon Instead this volume asserts that the current global political economy began to take shape around 1500 and that some of today s key processes were already perceivable several hundred years ago The book explains the interdependence between long term economic growth global political leadership and global war and how this interdependence has evolved over the last 500 years and includes discussion of the ascendance of Western Europe

and the significance of the 1490s the military superiority thesis sequences of leadership and of challenge to the global political economy the importance of commodities from sugar and cloth to slaves and bullion the Anglo American rivalry until the First World War Transformations of Capitalism Harry F. Dahms, 2000-08 A diverse complex and stable yet volatile system capitalism has undergone fundamental transformations over the past century Entrepreneurial capitalism has become increasingly managerial and corporate in nature No longer dominated by industrial production capitalist economies are now geared toward supplying services and toward integrating the working class into capitalist society Individual companies have given rise to complex relationships between state economy and multinational corporations Focusing on the structural shifts in advanced political economies this volume brings to light trends that occur below the surface of economic activity The essays identify the basic patterns of those transformations and their implications social political and economic for contemporary and future capitalisms Contributors Walter Adams Raymond Aron Joseph Bensman Adolph A Berle Jr Fred L Block Barry Bluestone Alfred D Chandler Jr Neil Fligstein John Kenneth Galbraith Robert Gilpin Bennett Harrison Gerald K Helleiner Bill Jordon John Maynard Keynes Charles P Kindleberger Joyce Kolko Gardiner C Means Claus Offe Karl Polanyi Joseph Schumpeter Barbara Stallings Wolfgang Streeck Thorstein Veblen Arthur J Vidich John Zysman *The Political Economy of Imperialism* Ronald M. Chilcote, 2012-12-06 This book brings together important essays by distinguished scholars who have devoted past attention to the study of imperialism and development It complements an anthology of previously published essays that brings together important theoretical perspectives around the issues and debates on these themes this volume will be published by Humanity Press forthcoming Both projects relate to a lengthy chapter Theories of Imperialism which will be published in my book Theories of Comparative Political Economy Forthcoming These projects represent a culmination of many years of teaching in both economics and political science During that time I taught two political science courses on development and under development but I was unable to convince my colleagues of the usefulness of a course on imperialism that linked historical issues and debates with the more recent developmental literature When in 1990 I was welcomed into economics my colleagues endorsed a graduate seminar on the political economy of imperialism Thus this volume evolved out of that experience in an effort to encourage new analysis that reflects retrospectively on past contributions as well as the prospects for imperialism and development in the contemporary world Geopolitical Economy of Energy and Environment , 2017-07-10 This book is the product of a joint research program between the Institute of West Asia African Studies of the Chinese Academy of Social Sciences Beijing and the Energy Program Asia of the International Institute for Asian Studies Leiden University China's transition to an urban industrial society relies on its abundant domestic coal supplies and on an increase in oil and gas imports However authorities are confronted with trade offs between investments in expanding supplies of fossils environmental sustainability energy efficiency and in clean energy Resources spent on expanding imported energy have to be weighed against clean energy investments and improving efficiency of the

fossil fuel sector The same is no less true for the European Union and its member states Import dependency on piped gas is again growing Security of supply of natural gas depends on political cooperation with energy rich countries At the same the EU has to meet its clean energy commitments by compromises between member states and Brussels Chinese National Oil Companies bridge the worlds of government in China and the extractive sector in hydrocarbon exporting countries At the global level Chinese Trans National Oil Companies maintain competitive and cooperative relations with privately owned International Oil companies This book focuses among others on these networks with the objective to contribute to the study of the geopolitical economy of the energy sectors in the global system Contributors are M P Amineh Eric K Chu Wina H J Crijns Graus Robert Cutler Li Xiaohua Liu Dong Chen Mo Nana de Graaff Joyeeta Gupta Sara Hardus Barbara Hogenboom Sun Hongbo and Yang Guang

Analyzing Strategic Rivalries in World Politics William R. Thompson, Kentaro Sakuwa, Prashant Hosur Suhas, 2021-11-20 Strategic rivalries are contests between states that view one another as threatening competitors and treat each other as enemies A disproportionate amount of interstate conflict is generated by a relatively small number of these pairs of states engaged in rivalries that can persist for years Thus to understand interstate peace and conflict it is useful to know how rivalries work in general and more specifically In the past two decades a strenuous effort has been mounted to introduce the concept of rivalry and demonstrate its utility in unraveling conflict situations Yet all rivalries are not exactly alike We need to move to a more rewarding differentiation of how they differ in general Principal rivalries are those antagonisms that are most significant to the decision makers in a state The main distinction on issues about which rivals dispute are positional and spatial concerns Positional rivalries contend over regional and global influence Spatial rivals contend over which state deserves to control disputed territory Interventionary rivalries predominate in sub Saharan Africa Their primary focus involves neighboring states attempting to influence who rules and how co ethnics are treated This book updates the inventory of strategic rivalries from 1816 to 2020 Principal rivalries are identified for the first time and cover the same period A theory stressing the two main types of rivalry positional and spatial is elaborated and tested Regional variations on the origins and terminations of spatial rivalry are explored and interpreted In addition attention is paid to fluctuations in the intensity of positional rivalries by examining the working of the contemporary major power triangle United States Soviet Union Russia and China and more generally the dynamics of regional power that are rising in terms of their relative capability and status in the system Variations in cooperation and termination dynamics both in general and according

to rivalry type are also examined Overall the emphases of the book are split between demonstrating the utility of distinguishing among rivalry types and examining selected rivalry dynamics
