Model Drawing and Shading from Casts T. C. Barfield, 2017-11-24 Excerpt from Model Drawing and Shading From Casts A Complete Guide to the Elementary and Advanced Examinations in These Subjects

Model drawing is generally admitted to be the most difficult of the art subjects in which instruction has to be given in elementary schools. Most teachers will agree that it is the foundation of all sound art education. Whether you are commencing this subject in order to qualify as a teacher or whether you wish to study art in earnest, the two things are not necessarily distinct. The importance of Model Drawing is evident. The explanations and directions here given are the result of many years' experience in teaching this subject. Over and over again I have proved their usefulness in my own classes. If you wish to thoroughly master the subject, it will not be safe to skip any part of the book for nothing is inserted which is not necessary to this end. Figure Drawing Methods for Artists Peter Boerboom, Tim Proetel, 2017-07. Simple methods teach how to draw figures. When we try to draw a person, we are quickly confronted with various challenges. The proportions need to be correct, the attitude must be clear and vivid, the face should show resemblance and also be expressive. Such a task takes courage. Yet a little practice and training quickly lead to the ability to draw figures in a wide variety of styles. A figure in a particular posture can be assembled with a few key characteristic strokes. At the center of this collection is not the perfect figure, but the joy of drawing and how, with simple methods, drawing people is possible by reducing and reducing to a few lines, using clear contours and simple surfaces. The human figure emerges, constructed and elaborated.
