Modellers Guide Peter Swinger, 2002 Although overshadowed in operational terms by the London North Eastern Railway's prestigious Pacific locomotives and outnumbered numerically by the 4 6 0s designs of both the LMS and GWR the various classes of 4 6 0 operated by the LNER were arguably among the most successful of the wheel arrangement to be constructed in Britain While a number were inherited from the pre Grouping companies most notably the North Eastern and Great Eastern the design can be said to have come of age with two of the all time classic types Gresley's Class B17 and Thompson's Class B1 The former with their evocative names linked to country houses in East Anglia and football teams in the area served by the LNER and the latter many named after African antelopes were hugely successful In

the first of the new Modeller's Guide series Peter Swinger whose earlier books for OPC on the various types of LNER 4 6 0s helped establish him as one of the leading experts on the subject provides a detailed reference work to the many designs of 4 6 0 both inherited by and designed for the LNER. Comprehensively illustrated throughout in both colour and mono the book describes in depth each of the individual classes providing readers with information useful in converting many of the proprietary models now available of the types. Along the excellent illustrative selection the author's well researched text is an excellent introduction to the history and operation of the various types.
