In the background, other figures are visible, including a man in a red tunic and a woman in a blue dress. There are also various objects and structures, such as a large wooden barrel, a small table, and a building with a thatched roof. The overall color palette is muted, with earthy tones and some brighter colors for the clothing.

fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region The Oxford Handbook of Early Modern European History, 1350-1750 Hamish

Scott,2015-07-23 This Handbook re examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam **The Long Road to the Industrial Revolution** Jan Luiten van Zanden,2009-06-17 Why

did the Industrial Revolution happen in Western Europe Was it a sudden acceleration of the European economy or should we look at specific institutions arising in Western Europe since the Middle Ages This book puts these big questions of European economic history in a global perspective deals with the institutions that developed in Europe and measures their relative efficiency over time and compared with other parts of Eurasia It traces the growth of human capital in the centuries between 1000 and 1800 in comparison with China Japan and India It also demonstrates how important the European Marriage Pattern was for understanding Europe s past The result is a new synthesis of the origins of the Industrial Revolution *Social Mobility in Medieval Italy (1100-1500)* Sandro Carocci,Isabella Lazzarini,Autori Vari,2021-07-27T12:14:00+02:00 This volume aims to investigate the complex theme of social mobility in medieval Italy both by comparing Italian research to contemporary international studies in various European contexts and by analysing a broad range of themes and specific case studies Medieval social mobility as a European phenomenon in fact still awaits a systematic analysis and has seldom been investigated iuxta propria principia in social political and economic history The essays in the book deal with a number of crucial problems how is social mobility investigated in European and Mediterranean contexts How did classic mobility channels such as the Church officialdom trade the law the lordship or diplomacy contribute to shaping the many variables at

play in late medieval societies and to changing and challenging inequality How did movements and changes in social spaces become visible and what were their markers What were the dynamics at the heart of the processes of social mobility in the many territorial contexts of the Italian peninsula
