Concepts of ideology

Ideology is a basic starting point for almost all contemporary cultural theory. **Ideology** refers to the basic ideas and assumptions that help shape a given culture, the preconceived notions and beliefs that structure a given society (as well as its individual members). Ideological beliefs are usually taken as naturally and inherently true by the people, groups, and institutions that hold them. As such, ideology is inherent in all **cultural artifacts**, or **texts**, but it is also something of a free-floating structure that pervades all aspects of culture. If **culture** can be said to consist of the material goods, products, and behaviors of any group of people, ideology is the invisible glue that binds those various objects and behaviors into a coherent and meaningful system of shared relatable experiences. Cultural artifacts always convey ideologies, whether they are consciously encoded into them by their producers or not, and whether their consumers are aware of them or not. Thus, one of the main goals of ideological analysis is to learn to recognize and be able to identify the various ideologies that cultural artifacts convey. And as complex amalgamations of sound and vision, film and television texts can and do convey ideologies in complex and multiple ways. Ideologies are expressed in the ways that stories are told (narrative design), how sets are constructed and lit, how roles are embodied by actors, and how lighting, sound, music, and camera work are deployed. The ideological analysis of a film or TV show therefore often begins with its formal properties, even as it might also encompass a consideration of its means of production (i.e. who made it, for what reasons, and within what socio-historical and industrial contexts).

Ideological analysis immediately asserts that art and culture—indeed all cultural artifacts—have a political dimension. As such, film and television contribute to our understandings of the world around us and the issues we face: film and television texts are part of larger cultural struggles for meaning and understanding. To give one basic historical example, if film and television texts only depict African Americans as butlers and maids (as they mostly did for many decades), those images are going to contribute to a very limited and limiting understanding of African Americans. White viewers might think (either consciously or unconsciously) that those images represent the totality of African American experience, while African American viewers may internalize such messages (consciously or unconsciously) and limit their own lives accordingly. As this one example postulates, the cumulative effects of media images can and do shape how the "real world" understands itself. And those understandings have "real world" consequences in the way that laws are written and passed, and in the basic ways that human beings treat the world around them, including other human beings.

In the mainstream press, ideology is sometimes used to refer to one's political

Models and Concepts of Ideology Jürgen Ritsert,2023-03-13 Theories and Models in Scientific Processes William E. Hinich,Michael C. Munger,2010-08-27 There is no unified theory that can explain both voter choice and where choices come from Hinich and Munger fill that gap with their model of political communication based on ideology Rather than beginning with voters and diffuse atomistic preferences Hinich and Munger explore why large groups of voters share preference profiles why they consider themselves liberals or conservatives The reasons they argue lie in the twin problems of communication and commitment that politicians face Voters overloaded with information ignore specific platform positions Parties and candidates therefore communicate through simple statements of goals analogies and by invoking political symbols But politicians must also commit to pursuing the actions implied by these analogies and symbols Commitment requires that ideologies be used consistently particularly when it is not in the party s short run interest The model Hinich and Munger develop accounts for the choices of voters the goals of politicians and the interests of contributors It is an important addition to political science and essential reading for all in that discipline Hinich and Munger s study of ideology and the theory of political choice is a pioneering effort to integrate ideology into formal political theory It is a major step in directing attention toward the way in which ideology influences the nature of political choices Douglass C North represents a significant contribution to the literature on elections voting behavior and social choice Policy Currents Melvin Hinich is Professor of Government University of Texas Michael C Munger is Associate Professor of Political Science University of North Carolina
