Modern And Primitive Art:

Modern and Primitive Art Charles Wentinck, 1979 *Primitivism in Modern Art* Robert Goldwater, 1986 This now classic study maps the profound effect of primitive art on modern as well as the primitivizing strain in modern art itself Robert Goldwater describes how and why works by primitive artists attracted modern painters and sculptors and he delineates the differences between what is truly primitive or archaic and what intentionally embodies such elements His analysis distinguishes the romanticism of Gauguin an emotional primitivism exemplified by the Brücke and Blaue Reiter groups in Germany the intellectual primitivism of Picasso and Modigliani and a primitivism of the subconscious in Mir Klee and Dali Two of Goldwater's related essays *Judgments of Primitive Art* 1905-1965 and *Art History and Anthropology* have been added for this new paperback edition World Of Art Series Primitivism And Modern Art Colin Rhodes, 1995-01-03 A fascination with the primitive lies at the heart of some of the most influential developments in Western art produced between 1890 and 1950 a time that witnessed both the heroic period of modern art and the apogee and decline of the West's colonial power Many groups have at times been labeled as primitive including the so called tribal peoples from Africa Oceania and North America but also prehistoric cultures European peasants the insane and children Through the lens of their own society many modern artists looked both to the art and to the world view of the primitive as a means of challenging established beliefs but the primitive to which they turned was as varied as the movements in modern art of which they were a part Colin Rhodes breaks new ground drawing on a wide and diverse range of material from high art to popular entertainment from Darwin to Freud the critical overview he presents supersedes all previous studies on the subject 179 illus 28 in color **Primitivism and Twentieth-century Art** Jack D. Flam, Miriam Deutch, 2003 This is a much needed important collection a goldmine of sources for scholars and students The texts articulate the key Primitivist aesthetic discourses of the period offering crucial insight into the complex and always changing nexus between culture politics and representation Because of the breadth of the materials covered and the controversies they raise this anthology is one of the all too rare volumes that not only will provide reference materials for years to come but also will feature centrally in classroom discussions Suzanne Preston Blier author of *African Vodun Art Psychology and Power* For almost a century art historians have fretted about the notion of primitivism in the arts This comprehensive in both senses of the word anthology is a peerless source of the history of responses to works categorized as primitive In its range the book touches upon all the troubling questions formal anthropological political historical that have bedeviled the study of the arts of Oceania Africa and North and South America and provides the grounds at last for intelligent pursuit of keener distinctions I regard this book as a superb contribution to the study of Modern art in fact indispensable Dore Ashton author of *Noguchi East and West* An extraordinarily useful and complete collection of primary documents many translated for the first time into English and almost all unlikely to be encountered elsewhere without serious effort Its five sections each with a lively and scholarly introduction reveal the diverse

views of artists and writers on primitive art from Matisse Picasso and Fry to many far less known and sometimes surprising figures The book also uncovers the politics and aesthetics of the major museum exhibitions that gained acceptance for art that had been both reviled and mythologized Recent texts included are all germane This book will be invaluable for any college course on the topic Shelly Errington author of *The Death of Authentic Primitive Art and Other Tales of Progress* An exceptionally valuable anthology of seventy documents most heretofore unavailable in English on the ongoing controversies surrounding Primitivism and Modern art Insightfully chosen and annotated the collection is brilliantly introduced by Jack Flam s essay on the historical progression contexts and cultural complexities of more than one hundred years ideas about Primitivism Rich timely illuminating Herbert M Cole author of *Icons Ideals and Power in the Art of Africa* *Primitive Art in Civilized Places* Sally Price,2001 What is so primitive about primitive art And how do we dare to use our standards to judge Drawing on a mixture of sources this text explores the cultural arrogance implicit in Westerners appropriation of non Western art

African Roots/American Cultures Sheila S. Modern Art & the Remaking of Human Disposition Emmelyn Butterfield-Rosen, 2021-11-09 How artists at the turn of the twentieth century broke with traditional ways of posing the bodies of human figures to reflect modern understandings of human consciousness With this book Emmelyn Butterfield-Rosen brings a new formal and conceptual rubric to the study of turn of the century modernism transforming our understanding of the era's canonical works Butterfield-Rosen analyzes a hitherto unexamined formal phenomenon in European art how artists departed from conventions for posing the human figure that had long been standard In the decades around 1900 artists working in different countries and across different media began to present human figures in strictly frontal lateral and dorsal postures The effect both archaic and modern broke with the centuries old tradition of rendering bodies in torsion with poses designed to simulate the human being's physical volume and capacity for autonomous thought and movement This formal departure destabilized prevailing visual codes for signifying the existence of the inner life

of the human subject Exploring major works by Georges Seurat Gustav Klimt and the dancer and choreographer Vaslav Nijinsky replete with new archival discoveries *Modern Art and the Remaking of Human Disposition* combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology In doing so it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses

Latin American Art at The Museum of Modern Art Miriam M. Basilio Gaztambide, 2025-06-13 This book sheds light on an as yet unstudied aspect of The Museum of Modern Art's MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum's collections as a whole during the 1940s and 1950s This book is the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA's holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist canon developed MoMA's collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today's increasingly global museums MoMA's approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies
