SHAW,2018 **American Vernacular Architecture 1870 To 1960** Herbert Gottfried,Jan Jennings,2009-07-07 A comprehensive examination of American vernacular buildings *From Craft to Profession* Mary N. Woods,2023-04-28 This is the first in depth study of how the architectural profession emerged in early American history Mary Woods dispels the prevailing notion that the profession

developed under the leadership of men formally schooled in architecture as an art during the late nineteenth century. Instead, she cites several instances in the early 1800s of craftsmen builders who shifted their identity to that of professional architects. While struggling to survive as designers and supervisors of construction projects, these men organized professional societies and worked for architectural education, appropriate compensation, and accreditation. In such leading architectural practitioners as B. Henry Latrobe, Alexander J. Davis, H. H. Richardson, Louis Sullivan, and Stanford White, Woods sees collaborators, partners, merchandisers, educators, and lobbyists rather than inspired creators. She documents their contributions as well as those far less familiar of women architects and people of color in the profession's early days. Woods's extensive research yields a remarkable range of archival materials: correspondence among carpenters, 200-year-old lawsuits, architect-client spats, the organization of craft guilds, apprenticeships, university programs, and correspondence schools, and the structure of architectural practices, labor unions, and the building industry. In presenting a more accurate composite of the architectural profession's history, Woods lays a foundation for reclaiming the profession's past and recasting its future. Her study will appeal not only to architects but also to historians, sociologists, and readers with an interest in architecture's place in America today. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1999. This is the first in-depth study of how the architectural profession emerged in early American history. Mary Woods dispels the prevailing notion that the profession developed under the leadership of men formally schooled in architecture as an art during the late nineteenth century. *Cheap and Tasteful Dwellings* Jan Jennings, 2005. In 1879, *Carpentry and Building* magazine launched its first house design competition. For a cheap house, forty-two competitions, eighty-six winning designs, and a slew of near-winners and losers resulted in a body of work that offers an entire history of an architectural culture. The competitions represented a vital period of transition in delineating roles and responsibilities of architectural services and building trades. The contests helped to define the training, education, and values of practical architects and to solidify house planning ideals. The lives and work of ordinary architects who competed in *Carpentry and Building* contests offer a reinterpretation of architectural professionalization in this time period. *Cheap and Tasteful Dwellings* thoroughly explores the results of these competitions conducted over a thirty-year period from 1879 to 1909. The book outlines the philosophy behind and procedures developed for running the competitions, looks at characteristics of the eighty-six winners of the competitions, examines the nature of architectural practices during the period, analyzes the winning competition designs, and provides biographical details of competition winners and losers. A landmark book in architectural history, *Cheap and Tasteful Dwellings* makes a compelling case for the theory of convenient arrangement, its history, its role, its principles, its relationship to contemporary interior design, education, and its meaning to American architecture. More

importantly the book explains the impact of Carpentry and Building s contests in furthering the tenets of convenient arrangement for house design By using extensive material from the magazine Jennings leaves little doubt as to how important this overlooked story is to the history of American architecture as a whole *The American Architect from the Colonial Era to the Present* Cecil D. Elliott,2002-11-27 The later Colonial era saw a need to replace the buildings hurriedly assembled by earlier colonists but competent builders were difficult to find Capable housewrights were usually well paid and many became respected and prosperous members of their communities but craft apprenticeships and a gentlemanly taste were two of the primary requirements for becoming an architect As the profession developed architects in the Northeast initiated efforts to distinguish between their work and that of housewrights and builders This work is a history of the development of architecture as a profession in the United States It is divided into four chronological sections Section One covers the beginnings in Colonial times before 1800 when there were no identifiable professionals Section Two examines architecture from 1800 to the Civil War a period during which the first architects appeared Section Three considers the profession from the time of the Civil War to World War I and the strengthening of the profession s status Section Four covers architecture since World War I up to the present Each section discusses the training of architects standards of practice general management methods information sources minority participation and other aspects of professional operation with special attention given to the relationship between the profession s development and the social history of the periods

Architecture in the United States, 1800-1850 William Barksdale Maynard,2002-01-01 This study traces the development of American architecture from the age of Jefferson to the antebellum era providing a survey of this important period W Barksdale Maynard overturns the long accepted notions that the chief theme of early 19th century American architecture was a patriotic desire to escape from European influence and that competing styles chiefly reflected the American struggle for cultural uniqueness Instead deep and consistent aesthetic ties especially with England shaped American architecture and house designs Maynard shows that the Greek Revival in particular was an international phenomenon with American achievements inspired by British example and with taste taking precedence over patriotism **Edward Shaw of Boston** James F. O'Gorman,2016-01-01 This is the first in depth study of the career of an important antebellum American architect and author It is a contribution to the history of architecture and the history of the book In the quarter century after 1830 Edward Shaw designed dozens of town houses in Boston including the landmark Adam Wallace Thaxter Jr house on Beacon Hill 1836 Shaw also published five influential books on architecture and structural materials one of them reprinted in several editions to 1900 Research in Boston archives has unearthed building records and drawings for unbuilt Shaw designs Also describes the design and contents of Shaw s published works and traces their distribution across the country from Maine to Oregon Illus *The Modern Architect* Edward Shaw,1995 Rare influential volume surveys architecture various styles arrangement and construction of dwelling houses and buildings in general Over 200 plans elevations etc New Introduction
