The Culture and Development Manifesto Robert Klitgaard, 2021 With fascinating examples from around the world this inspiring manifesto shows how to account for cultural diversity in reshaping economic and political development Around the world the realities of underdevelopment are harsh and galling and current strategies are not working well enough or quickly enough One reason Robert Klitgaard argues in this pathbreaking book is that the strategies don't take cultural diversity into account Gently but firmly he shows how and why anthropology and cultural studies have not been effectively applied But it need not be so The Culture and Development Manifesto shows how to mobilize knowledge from and for the disadvantaged the indigenous and the voiceless Looking beyond interactions between cultural contexts and particular projects Klitgaard seeks new ways to think about goals new kinds of alternatives new and perhaps hybrid ways to implement or resist and as a result new kinds of politics In short this remarkable book fundamentally re-envisions what development policy can be

good or bad by themselves because of the way they influence human life The book advances the thesis that technical artefacts conceived of as physical constructions with a technical function have a dual nature they are hybrid objects combining physical and intentional features It proposes a theory of technical functions and technical artefact kinds that does justice to this dual nature analyses engineering design from the dual nature point of view and argues that technical artefacts because of their dual nature have inherent moral significance
