places intimately linked to the lives and deaths of different fascist para fascist and communist dictators in a truly transnational and comparative way During the second decade of the twenty first century a number of parallel debates arose in Italy Spain Portugal Albania Austria and other European countries regarding the public management by democratic regimes of those sites of memory that were directly linked to the personal biographies of their former dictators The ways in which each democracy deals with the dead bodies mausoleums and birthplaces of the dictators vary considerably although common questions occur such as whether oblivion or re signification is better the risk of a posthumous cult of personality being established and the extent to which the shadow of the authoritarian past endures in these sites of memory Using the concept of sites of the dictators the author explains why it is so difficult to deal with some sites of memory linked to dead autocrats as those places contribute directly or indirectly to humanizing them making their remembrance more acceptable for the present and future generations and discusses the potential of the Europeanization of these dark memories of the past Exploring the imperatives of memory politics and how these are reconciled with local actors interested in exploiting the dictator s remembrance this book will be useful reading for students and scholars of history politics and memory studies
