Technology in Modern German History Karsten Uhl, 2022-01-27 People often associate postwar Germany with technology and with its products of mass consumption such as luxury cars Even pop music most notably Kraftwerk literally power station with songs such as Autobahn Radioactivity or We are the Robots disseminates the stereotype of a close link between German culture and technology Technology in Modern German History explores various forms of technology in 200 years of German history and explains how technology has been fundamental to the shaping of modern Germany The book investigates the role technology played in transforming Germany's culture society and politics during the 19th and 20th centuries Key topics covered include the different stages of industrialization the growth of networked cities and the triumph of a teleological narrative of technology as progress Moreover it provides a critical revision of the history of high technology which reveals how high tech euphoria determined certain paths in history regardless of whether the respective technology proved to be successful In its second part the volume introduces new avenues in scholarship Karsten Uhl examines neglected areas such as rural technologies or the often overlooked importance of everyday technologies How did consumers or workers use new technologies How did they appropriate and modify them Lastly the book considers the final decades of the 20th century and asks if they provided a significant new quality of technological change To what degree and effects did computerization transform professional and private life in Germany In culture and politics reinforced by the German variety of environmentalism the idea of progress was challenged as the once prevailing vision of progress gave way to new apprehensions of uncertainty evident to this day Technology in Modern German History brings fascinating insight into a much neglected area of German history for students and scholars alike

The Origins of Modern Germany Geoffrey Barraclough, 1984 No one is likely to underrate the importance for the rest of Europe and indeed for world history of the German reaction beginning in the days of Bismarck to the crisis of modern industrial capitalism writes Professor Barraclough but the peculiar character of that reaction is only comprehensible in the light of Germany's past Factors deeply rooted in German history constituted an iron framework a mold within which were cast all German efforts from 1870 to 1939 to cope with the problems of modern capitalist society
