Otto Rank and the Creation of Modern Psychotherapy Robert Kramer, 2025-07-04

Once considered Sigmund Freud's designated heir, Otto Rank was an interdisciplinary thinker and prodigious author of twenty-two books. After being expelled from Freud's inner circle in 1926 due to Freud's opposition to the pre-Oedipal thesis of *The Trauma of Birth*, 1924, Rank had a highly productive life as a teacher, psychotherapist, and writer. In this book, noted Rank scholar Robert Kramer argues that Rank, not Freud, created modern psychotherapy, which focuses on the therapist-client relationship. Rank's will therapy and his teaching on relationship and the creative will impacted not only modern psychotherapy but also social work and existential psychology. His influence can particularly be seen in the work of Carl Rogers, Psychotherapy, Jessie Taft, and Virginia Robinson, Social Work, and Rollo May and Irvin Yalom, Existential Psychology. A dazzling thinker, Rank influenced many artists and writers, including Samuel Beckett, Salvador Dalí, Anaïs Nin, Henry Miller, Betty Friedan, D.W. Winnicott, and most significantly, Ernest Becker, Pulitzer prize-winning author of *The Denial of Death*, 1973. Kramer argues that if the 20th century was the century of Freud, the 21st century is shaping up to be the century of Rank, as no other psychoanalyst's theories have ever been tested with as much empirical rigor and across so many different cultures as those of Rank. This book translates Rank's complex thought into language any reader can grasp easily.

Religious Systems and Psychotherapy Richard H. Cox, 2010-11-01

Man's search for answers to the problem of human existence has led him from soothsayers to psychotherapists. He has sought guidance on an individual and group basis. This guidance has often resulted in organized institutions of a religious, political, or philosophical nature. The major world religions presented in this book are discussed from the psychotherapeutic and mental health point of view. Many other religious systems are included, as well as selected specific topics of special concern. There are three major sections in this volume. Section one includes fourteen major world religious systems. Section two includes indigenous and emergent systems such as magic, exorcism, and witchcraft, and section three deals with multiple systems and includes areas of special concern to both the student of religion and human behavior. Of particular interest is the section of discussions on the role of the religious man as psychotherapist and the psychotherapist as a religious man. Other concerns deal with ethics, values, morals, and psychoanalysis. This book will serve as a resource volume for students, teachers, and practicing professionals in the helping professions, particularly the fields of religion and mental health.
