Colour in Art, Design & Nature C. A. Brebbia, C. Greated, M. W. Collins, 2011 This book is ambitiously inter disciplinary and may be divided into four main sections defined in terms of the authors themselves Firstly there are two contributions by biologists Secondly the largest section is by practising artists Thirdly there are two engineering based contributions Finally two contributions address some of the historical proponents of colour theory and art These eleven works in full colour form a striking contribution to the commonwealth of colour studies and to a possible unification of Snow s two cultures Colour and inter disciplinarity go hand in hand This so often involves the authors leaving the comfort zone of their original speciality and striving for excellence in another The personal story of Franziska Schenk is but one good example It seems that our perceptions of aesthetics and beauty must be very flexible indeed as to find absolute opposites equally fascinating If so it goes to show how wonderful are the construction and operation of the human brain Does psychology win in the end Does colour lead to a single culture
