Examples, Conclusions, and Maxims of Modern Naval Tactics United States Intelligence, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1884 edition Excerpt ers There are other vessels that must be used with the fleet which may not be considered of the fleet and which are only furnished when required to fulfill some special duty Captain Noel for warlike purposes would have his navy divided as follows 1st A fleet of heavy ships of the line These vessels by reducing their top hamper and having only topsails courses and fore and aft sails bent would save enough weight to permit stowage of extra coal They should be provided with heavy towing hawsers 2d A squadron of cruisers attached to this fleet all of great speed and fully rigged Their duty is to reconnoiter make prizes of hostile cruisers and to obtain information from shipping 3d Dispatch vessels 4th Torpedo boats of a size large enough to keep the sea on their own account In cruising they should keep with the ships whose tenders they are Captain Harris says As the speed of the slowest ship is the speed of the fleet no vessel should be assigned to the line of battle of less speed than 12 knots With the swiftest fleet lies the option of giving or declining battle and also whether or not the battle will be limited to artillery alone Lieutenant Besson M F asks the following question concerning a reserve squadron Should the fleet be divided and fight with a certain number of ships letting the others keep out of the battle until the formations are broken up or ought the fleet to be kept together and should there be no reserve This query he answers by saying that every fighting formation presents two feeble points These are the ships furthest off that is the outside or flank vessels Divide your fleet into detached squadrons and you increase these feeble positions and therefore diminish its power If **Fighting the Fleet** Jeffrey R Cares, Anthony Cowden, 2020-12-15 Fighting the Fleet recognizes that fleets conduct four distinct but interlocking tasks at the operational level of war striking screening scouting and basing and that successful operational art is achieved when they are brought to bear in a cohesive competitive scheme In explaining these elements and how they are conjoined for advantage a central theme emerges despite the utility

and importance of jointness among the armed forces the effective employment of naval power requires a specialized language and understanding of naval concepts that is often diluted or completely lost when too much jointness is introduced Woven into the fabric of the book are the fundamental principles of three of the most important naval theorists of the twentieth century Rear Admiral Bradley Fiske Rear Admiral J C Wylie and Captain Wayne Hughes While Cares and Cowden advocate the reinvigoration of combat theory and the appropriate use of operations research they avoid over theorizing and have produced a practical guide that empowers fleet planners to wield naval power appropriately and effectively in meeting today s operational and tactical challenges

Joint Operational Warfare Milan N. Vego, 2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security But in addition by sustaining animals on natural vegetation and as part of local ecosystems these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes This publication provides a glimpse into the

often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with
