Janicke, 2012-10-01 This is a casebook designed for a three credit course in advanced patent law It addresses subjects that are not commonly taught in a basic patent law course due to time constraints but which commonly arise in patent litigation The focus is doctrinal rather than strategic or tactical Each case is preceded by a brief one or two sentence statement of why the case is in the book The cases are for the most part very recent in order to illustrate the current state of the law although a few historically famous cases are also included By design there is virtually no overlap between the subject matter presented here and the content of a typical basic course in patent law For example there is no discussion of eligible subject matter novelty or nonobviousness There is a strong emphasis on remedies estoppels and affirmative defenses
