Excerpt from *The Metaphysical Foundations of Modern Physical Science* A Historical and Critical Essay How curious after all is the way in which we moderns think about our world And it is all so novel too The cosmology underlying our mental processes is but three centuries old a mere infant in the history of thought and yet we cling to it with the same embarrassed zeal with which a young father fondles his new born baby Like him we are ignorant enough of its precise nature like him we nevertheless take it piously to be ours and allow it a subtly pervasive and unhindered control over our thinking About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
