Islam and Modernity Abdessalem, Rafik,2019-07-18 In this compelling book Rafik Abdessalem unpacks two major lines of thought Firstly he examines why many Westerners dismiss Islam s vast intellectual social theological and cultural heritage as flawed violent rigid and fanatical despite knowing virtually nothing about it He usefully traces the genesis of this attitude focusing on how scholars such as Weber Habermas and others have helped to consolidate the West s view of itself as civilised superior developed and progressive and how the demonisation of Islam acts as a necessary foil for these notions Secondly he explains that Islam is subject to a variety of interpretive choices and schools of thought ranging from legalistic fundamentalism through rigid rationalism to spiritual Sufism By treating Islam secularity and modernity as distinct and separate rather than as interconnected and overlapping Abdessalem makes no attempt to reconcile Islam with modernity or secularity nor does he place one in opposition to the other Instead he looks at the interconnections between these broad and complex subjects Abdessalem s analysis is useful in encouraging us to rethink both modernity and Islam and their relationship with each other In this rethinking lies the potential for a better

understanding of the geopolitics of what is often called the Muslim world including the MENA region      **Institutions, Behaviour and Economic Theory** Heinrich Bortis, 1997 This book is about the conceptual foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i e sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences and the problem of linking theory with historical reality are also covered

Ryder, 2016-09-14 Machiavelli almost succeeded in removing morality from European politics and indeed since his day it has sometimes been assumed that morality and politics are separate Ryder argues that the time has come for public policies to be seen to be based upon moral objectives Politicians should be expected routinely to justify their policies with open moral argument In Part I Ryder sketches an overview of contemporary political philosophy as it relates to the moral basis for politics and Part 2 suggests a way of putting morality back into politics along with a clearer emphasis upon scientific evidence
