Modern Architectural Theory A Historical Survey 1673 1968

Modern Architectural Theory A Historical Survey 1673 1968:

Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 *Modern Architectural Theory* is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development. In this synthetic overview, Harry Mallgrave examines architectural discourse within its social and political context. He explores the philosophical and conceptual evolution of its ideas, discusses the relation of theory to the practice of building, and most importantly, considers the words of the architects themselves as they contentiously shaped Western architecture. He also examines the compelling currents of French rationalist and British empiricist thought, radical reformation of the theory during the Enlightenment, the intellectual ambitions and historicist debates of the nineteenth century, and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s. *Modern Architectural Theory* challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism.

Modern Architecture Adam Sharr, 2018-11-15 Somewhere between 1910 and 1970, architecture changed. Now that modern architecture has become familiar, sometimes celebrated, sometimes vilified, it's hard to imagine how novel it once seemed. Expensive buildings were transformed from ornamental fancies which referred to the classical and medieval pasts into strikingly plain reflections of novel materials, functions, and technologies. Modern architecture promised the transformation of cities from overcrowded conurbations characterised by packed slums and dirty industries to spacious realms of generous housing and clean mechanised production set in parkland. At certain times and in certain cultures, it stood for the liberation of the future from the past. This *Very Short Introduction* explores the technical innovations that opened up the cultural and intellectual opportunities for modern architecture to happen. Adam Sharr shows how the invention of steel and reinforced concrete radically altered possibilities for shaping buildings, transforming what architects were able to imagine, as did new systems for air conditioning and lighting. While architects weren't responsible for these innovations, they were among the first to appreciate how they could make the world look and feel different in connection with imagery from other spheres like modern art and industrial design. Focusing on a selection of modern buildings that also symbolize bigger cultural ideas, Sharr discusses what modern architecture was like, why it was like that, and how it was imagined. Considering the work of some of the historians and critics who helped to shape modern architecture, he demonstrates how the field owes as much to its storytellers as to its buildings.

ABOUT THE SERIES The *Very Short Introductions* series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Architects of Ottoman Constantinople Alyson Wharton-Durgaryan, 2015-02-26 The Balyan family were a dynasty of architects, builders, and property owners who acted as the official architects to the Ottoman

Sultans throughout the 18th and 19th centuries Originally Armenian the family is responsible for some of the most famous Ottoman buildings in existence many of which are regarded as masterpieces of their period including the Dolmabah e Palace built between 1843 and 1856 parts of the Topkap Palace the ra an Palace and the Ortak y Mosque Forging a unique style based around European contemporary architecture but with distinctive Ottoman flourishes the family is an integral part of Ottoman history As Alyson Wharton s beautifully illustrated book reveals the Balyan s own history of falling in and out of favour with increasingly autocratic Sultans serves as a record of courtly power in the Ottoman era and is uniquely intertwined with the history of Istanbul itself

Subnature David Gissen, 2012-03-20 We are conditioned over time to regard environmental forces such as dust mud gas smoke debris weeds and insects as inimical to architecture Much of today s discussion about sustainable and green design revolves around efforts to clean or filter out these primitive elements While mostly the direct result of human habitation these subnatural forces are nothing new In fact our ability to manage these forces has long defined the limits of civilized life From its origins architecture has been engaged in both fighting and embracing these so called destructive forces In Subnature David Gissen author of our critically acclaimed Big and Green examines experimental work by today s leading designers scholars philosophers and biologists that rejects the idea that humans can somehow recreate a purely natural world free of the untidy elements that actually constitute nature Each chapter provides an examination of a particular form of subnature and its actualization in contemporary design practice The exhilarating and at times unsettling work featured in Subnature suggests an alternative view of natural processes and ecosystems and their relationships to human society and architecture R Sie n s Mosquito Bottleneck house in Trinidad uses a skin that actually attracts mosquitoes and moves them through the building while keeping them separate from the occupants In his building designs the architect Philippe Rahm draws the dank air from the earth and the gasses and moisture from our breath to define new forms of spatial experience In his Underground House Mollier House and Omnisport Hall Rahm forces us to consider the odor of soil and the emissions from our body as the natural context of a future architecture Cero 9 s design for the Magic Mountain captures excess heat emitted from a power generator in Ames Iowa to fuel a rose garden that embellishes the industrial site and creates a natural mountain rising above the city s skyline Subnature looks beyond LEED ratings green roofs and solar panels toward a progressive architecture based on a radical new conception of nature

Analogical Thinking in Architecture Jean-Pierre Chupin, 2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the

1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories The Architecture of Influence Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old The Architecture of Influence explores this fundamental question by analyzing a broad swath of twentieth century architectural works including some of the best known examples of the architectural canon modern and postmodern through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture **Building Theories** Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Brtticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l'art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material

transformations have always been at the origins of built form

will be of interest to researchers and students of architectural history and theory. Additionally, it offers a timely discussion of Mies and Le Corbusier's contributions to architecture's contemporaneity for the younger generation of architects.

Imaginary Athens Jin-Sung Chun, 2020-11-25 This book comprehensively examines architecture, urban planning, and civic perception in three modern cities as they transform into national capitals through an entangled transnational process that involves an imaginative geography based on embellished memories of classical Athens. Schinkel's classicist architecture in Berlin, especially the principle of tectonics at its core, came to be adopted effectively at faraway cities in East Asia, merging with the notion of national polity as Imperial Japan sought to reinvent Tokyo and mutating into an inevitable reflection of modern civilization upon reaching colonial Seoul, all of which give reason to ruminate over the phantasmagoria of modernity.

Creating a Visual World: From Concepts to Classrooms Elena Xenii, 2019-07-22 This volume was first published by Interdisciplinary Press in 2015. The critical role of visual literacies in the 21st century realm is widely acknowledged, and the construction of the profile of the visual literate person as a responsible participant in the face of global challenges is a top listed goal in nowadays agenda.

Cornelia Hahn Oberlander Susan Herrington, 2014-01-01 Cornelia Hahn Oberlander is one of the most important landscape architects of the twentieth century, yet despite her lasting influence, few outside the field know her name. Her work has been instrumental in the development of the late twentieth century design ethic, and her early years working with architectural luminaries such as Louis Kahn and Dan Kiley prepared her to bring a truly modern and audaciously abstract sensibility to the landscape design tradition. In *Cornelia Hahn Oberlander: Making the Modern Landscape*, Susan Herrington draws upon archival research, site analyses, and numerous interviews with Oberlander and her collaborators to offer the first biography of this adventurous and influential landscape architect. Born in 1921, Oberlander fled Nazi Germany at the age of eighteen, with her family going on to become one of the few women to graduate from Harvard University's Graduate School of Design in the late 1940s. For six decades, she has practiced socially responsible and ecologically sensitive planning for public landscapes, including the 1970s design of the Robson Square landscape and its adjoining Provincial Law Courts, one of Vancouver's most famous spaces. Herrington places Oberlander within a larger social and aesthetic context, chronicling both her personal and professional trajectory and her work in New York, Philadelphia, Vancouver, Seattle, Berlin, Toronto, and Montreal. Oberlander is a progenitor of some of the most significant currents informing landscape architecture today, particularly in the area of ecological focus. In her thorough biography, Herrington draws much deserved attention to one of the truly important figures in landscape architecture.

Amman: Gulf Capital, Identity, and Contemporary Megaprojects Majd Musa, 2017-01-20 Gulf capital flows to Amman, Jordan, in the early twenty-first century, and the investment of this capital in large-scale urban developments has significantly transformed the city's built environment. Therefore, to understand urban transformation in Amman during this period, it is important to analyze it against the backdrop of Gulf capital and its integration into Jordan's economy and the integration of both the country's economy and Gulf capital.

into the global capitalist economy This book analyzes three cases of megaprojects planned for the city in the early twenty first century The New Downtown Abdali Jordan Gate and Sanaya Amman Drawing upon theories on urban development and capitalism identity and discourse and urban development processes and cases in other cities the book investigates how contemporary megaprojects in Amman fit into the capitalist economy and its modes of production how capital flows construct a modern image of the city and how the new image and megaprojects represent the city residents as modern and create Amman as a global city This book presents a new approach to the study of the urban built environment in Amman providing a valuable interdisciplinary contribution to the scholarly work on globalizing cities especially in the Middle East

Architecture Post Mortem Donald Kunze, David Bertolini, Simone Brott, 2016-04-15 Architecture Post Mortem surveys architecture's encounter with death decline and ruination following late capitalism As the world moves closer to an economic abyss that many perceive to be the death of capital contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage naked to all Architecture is not irrelevant to fiscal and political contagion as is commonly believed it is the victim and penetrating analytical agent of the current crisis As the very apparatus for modernity's guilt and unfulfilled drives modernity's debt architecture is that ideological element that functions as a master signifier of its own destruction ordering all other signifiers and modes of signification beneath it It is under these conditions that architecture theory has retreated to an Alamo of history a final desert outpost where history has been asked to transcend itself For architecture's hoped for utopia always involves an apocalypse This timely collection of essays reformulates architecture's relation to modernity via the operational death drive architecture is but a passage between life and death This collection includes essays by Kazi K Ashraf David Bertolini Simone Brott Peggy Deamer Didem Ekici Paul Emmons Donald Kunze Todd McGowan Gevork Hartoonian Nadir Lahiji Erika Naginski and Dennis Maher
