Modern Architectures From The Marzona Collection:

Modernism and the Professional Architecture Journal Torsten Schmiedeknecht, Andrew Peckham, 2018-06-27 The production of this book stems from two of the editors longstanding research interests the representation of architecture in print media and the complex identity of the second phase of modernism in architecture given the role it played in postwar reconstruction in Europe While the history of postwar reconstruction has been increasingly well covered for most European countries research investigating postwar architectural magazines and journals across Europe their role in the discourse and production of the built environment and particularly their inter relationship and differing conceptions of postwar architecture is relatively undeveloped Modernism and the Professional Architecture Journal sounds out this territory in a new collection of essays concerning the second phase of the reception and assimilation of modernism in architecture as it was represented in professional architecture journals during the period of postwar reconstruction 1945 1968 Professional architecture journals are often seen as conduits of established facts and knowledge The role mainstream publications play however in establishing movements trends or debates tends to be undervalued In the context of the complex undertaking of postwar reconstruction the shortage of resources political uncertainty and the biographical complexities of individual architects the chapters on key European architecture journals collected here reveal how modernist architecture and its discourse was perceived and disseminated in different European countries

Architecture books from the Marzona collection Marco De Michelis, 2003 Vorwort Elisabetta Bresciani mit Texten von Marco De Michelis und Catherine de Smet und einem Gespräch der Herausgeberin mit Egidio Marzona Cut and Paste Urban Landscape Mira Engler, 2015-08-11 During the post war era the emerging consumer economy radically changed both the discourse and practice of architecture It was a time where architecture became a mainstream commodity whose products sold through mass media a time in which Thomas Gordon Cullen came to be one of Britain's best known twentieth century architectural draftsmen Despite Cullen's wide acclaim there has been little research into his life and work particularly his printed images and his methods of operation This book examines Cullen's drawings and book design and also looks into his process of image making to help explain his considerable popularity and influence which continues to this day It presents the lessons Cullen had to offer in today's design culture and practice and looks into the post war consumerist design strategies that are still used today Marzona Collection at the Kunstbibliothek Michael Lailach, Kunstbibliothek (Berlin, Germany), 2005

Minimal Art Daniel Marzona, 2004 The bare minimum Often regarded as a backlash against abstract expressionism Minimalism was characterized by simplified stripped down forms and materials used to express ideas in a direct and impersonal manner By presenting artworks as simple objects minimalist artists sought to communicate esthetic ideals without reference to expressive or historical themes This critical movement which began in the 1960s and branched out into land art performance art and conceptual art is still a major influence today This book explains the how why where and when of Minimal Art and the artists who helped define it Featured
